The field of pediatric oncology encompasses four groups of malignancies - acute leukemias, brain tumors, lymphomas and solid tumors. The history, diagnosis and management of

Bookmark File

PDF Pediatric

Oncology 1

children with acute leukemias and lymphomas has been thoroughly examined in several excellent textbooks of pediatric hematology and oncology. Brain tumors have historically been managed by neurosurgeons and

Bookmark File
PDF Pediatric
Oncology 1

radiation therapists. The role of the pediatric oncologist in the management of these patients is evolving. This book was written to provide a thorough historical evaluation of the most frequent solid tumors of children. A detailed examination of the

Bookmark File
PDF Pediatric
Oncology 1

natural history of these tumors is essential to the design and evaluation of therapeutic trials. The highly lethal nature of many of these tumors, the occurrence of some of them at several different primary sites and the rarity

Throughout, rapid orientation is ensured by the clear, consistent layout and the concise, lucid style. Pediatric Oncology: A Comprehensive Guide is an excellent, easy-to-use reference that belongs on the shelf

Bookmark File
PDF Pediatric
Oncology 1

of every practitioner who encounters or treats malignancies in the pediatric age group.

This book identifies the various ethical challenges that arise in pediatric hematology/oncology and provides the necessary tools to

Bookmark File
PDF Pediatric
Oncology 1

overcome these challenges. Aiming to expand upon and strengthen providers' knowledge and experience in pediatric health care ethical issues, the text positions providers to be beneficial resources

Bookmark File
PDF Pediatric
Oncology 1

to faculty, staff, patients, and families within their institution. It presents a multidisciplinary approach to sound ethical practices that is necessary to effectively care for these patients and their families. The

Bookmark File
PDF Pediatric
Oncology 1

book reviews the principles of ethical decision-making, the unique difficulties in using children as research subjects, common ethical conundrums involved in providing end-of-life care, and general moralities of

pediatric cancer
drug development.
The purpose of this
thesis was to
determine the
proportion of
interventions in
pediatric anti-cancer
trials that advance or
“ graduate ” to
later stages of
development and/or

Bookmark File PDF Pediatric Oncology 1

clinical practice, and the proportion of participants enrolled in such trials who participate in graduating trials. We used ClinicalTrials.gov to search and collect all anti-cancer drug trials recruiting patients below the

Bookmark File PDF Pediatric Oncology 1

age of 21 years and/or that were specifically indicated for pediatric malignancies. Key characteristics of trials were extracted, including cancer indication, drug type, and certain trial design features. Each trial was

Bookmark File PDF Pediatric Oncology 1

assessed for whether the intervention it tested graduated within 1-6 years of the trial launch to: a subsequent phase, a randomized trial, a Children ' s Oncology Group (COG)-supported trial, FDA approval, and/or FDA label

Bookmark File

PDF Pediatric

Oncology 1

changes of approved drugs regarding pediatrics.

Secondarily, we used logistic regression analysis to determine whether certain trial features are predictive of graduation. We identified 410 pediatric anti-cancer

Bookmark File

PDF Pediatric

Oncology 1

trials launched between 1987 and 2013, enrolling 30,279 participants. Interventions tested in 69 trials (16.8%) graduated to a subsequent phase of clinical development and/or clinical practice, and 4,560 participants (15.1%)

Bookmark File PDF Pediatric Oncology 1

enrolled in these trials. We calculated that 19.9% (enrolling 22.2% participants) of interventions tested in phase 1 trials graduated to phase 2, and 1.6% (enrolling 2.8% participants) of interventions in

Bookmark File PDF Pediatric Oncology 1

phase 2 graduated to phase 3. FDA approval for a pediatric cancer as the primary or secondary indication was achieved for 2.9% of unapproved interventions in trials, and 5.1% of trials led to FDA label revisions

Bookmark File

PDF Pediatric

Oncology 1

reflecting pediatric treatment. Of the seven trial characteristics tested, only biomarker enrichment was statistically significantly predictive of graduation from phase 1 to phase 2. Our results suggest

Bookmark File PDF Pediatric Oncology 1

that the greatest prospect of graduation occurs for phase 1 to phase 2 graduations. The success rate for an intervention advancing from phase 1 to FDA approval for pediatric cancer was slightly lower than

Bookmark File

PDF Pediatric

Oncology 1

reported estimates in adult oncology. Our findings highlight the magnitude of challenges of developing new pediatric anti-cancer interventions. They can also help patients and their guardians assess prospects of their

Bookmark File

PDF Pediatric

Oncology 1

enrollment leading to important advances in research and care, as well as inform priority setting in pediatric cancer drug development"--
