You live in any sprawl long enough, you'll find out that there's a lot more to it than businessmen and soykaf stalls. Any sprawl worth its mettle has its dark corners, its forgotten places, its spots that are just as wild and untamed as the deepest rainforest. Seattle, the prime metroplex in the world for shadowrunning, is filled with such places, and Sprawl Wilds gives shadowrunners a chance to tour them. From a fortress-like Barrens farm recovering from a mysterious attack to a dark secret hidden in a clinic, runners have a chance to see the sites most people never encounter, and uncover information that some people want to stay secret at any cost. They'll meet jaded smugglers, wary police officers, passionate activists, hardened criminals, wounded warriors, and at least one deranged killer. The questions are, will they survive long enough to collect a paycheck and how much of the sprawl will be nothing more than dust when they're done with it? Sprawl Wilds is a collection of Shadowrun Missions developed for major summer gaming conventions. These adventures have been adapted for both Shadowrun, Twentieth Anniversary Edition and Shadowrun, Fifth

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "O" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and

also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

The World Is No Longer Flat Culo is an art, fashion, and pop-culture movement that defies all national, cultural, and linguistic boundaries. No matter if you were raised to call it derriere, tush, rear end, or booty, culo is the new epicenter of female sexuality, desire, and empowerment. Over the past decade, some of the world's most celebrated women have subtly shifted our long-held ideals of physical perfection toward a shape that is more authentic and bold. While culo has long been venerated in certain cultures, it is now becoming the object of worldwide mainstream admiration. This emerging global love affair with culo is as much about the blending of African, Latin, European, and Asian beauty as it is about celebrating the female form's most coveted asset. Culo by Mazzucco pays tribute to this phenomenon through a singular artistic vision. In more than 200 photographs and artworks created on

Clever, athletic and dignified, Yagan was already a leader among his people when pale-faced foreigners spilled uninvited upon the shores of the Swan River and started to make themselves at home - his home. Over the next four years, Yagan took a stand, and in the process forever etched his name on the story of Western Australia.

From the Tyrannosaurus rex to Velociraptors, the Spinosaurus to Triceratops, Dinosaurs is a large board book, with beautiful illustrations by Neiko Ng, jam-packed with dinosaurs! There are seven themed scene: forest, dinnertime, desert, swamp, the coast, volcanic eruption and prehistoric museum - with sturdy tabs for young children to find their favourite pages. Children can then explore the big scenes, find the dinosaurs and read the name labels in the panels. With a baby dinosaur to spot in each scene, there is plenty here for parents and children to talk about and return to again. Also available:

Contemporary artists Robert Colescott (1925-2009), Kerry James Marshall (b. 1955), and Mickalene Thomas (b. 1971) are distinguished by their attention to a history of representation, which they re-visit and revise to reflect on individual and collective Black experience. Equally engaged with social and political histories, and the history of art, Colescott, Marshall, and Thomas have created works that at times poignantly and satirically critique dominant narratives and posit alternatives. By considering these artists together, this thought-provoking book

expands our understanding of contemporary history painting, a genre first defined during the 17th century and known for didactic paintings that often depicted Biblical or mythological subjects, and expressed the tastes and narratives of a ruling class. Colecott, Marshall, and Thomas marry appreciation of these traditional forms of representation to a deep understanding of contemporary American culture to create insightful works that disrupt historic narratives and read canonic art history against the grain.

Onesimus is a slave. Eirene is a rich merchant's daughter. Onesimus longs to gain his freedom and Eirene's love. However, he doesn't realize where true freedom lies. He wants nothing to do with Jesus Christ. His master, Philemon, may follow the teachings of the Christ and his apostle Paul... but Onesimus has other plans.

In life and in the financial markets, thinking counter-intuitively will keep you afloat, allowing you to effectively traverse the choppy waters. With the articles in this book, you will find insights into lessons such as: ? Happiness Versus Fun ? Believing in Your Competitiveness? Enjoying the Journey ? Embracing Change Do you ever feel like the waters of life or investments are moving just too fast for you to keep up? Or maybe worse yet, you feel as if the rapids are pulling you under? In this book of vignettes, you will find strategies for successfully navigating the rapids of life and the financial markets. The best approach to solving many problems may initially seem counter-intuitive. When kayaking, if the current is getting the best of you, your first instinct is to stop paddling and assess the situation. But if you did that, you would be assessing the situation upside down within seconds! The right answer is to keep paddling; otherwise, you have no control over the boat.

1001 Quotations To Inspire You Before You Die is full of smart remarks - not just sassy one-

liners (although there are plenty of those), but also more considered, philosophical epigrams that make us pause and reflect on a range of profound topics. Each quotation is accompanied by an insightful account of its meaning and the historical context in which it was first uttered or written. Some famous quotations are straightforward, but many need contextualising - it's often not exactly what was said, but who said it, and in what context, that is more important. Many oft-quoted remarks open up whole new worlds of thought and interpretation. What, for example, did Voltaire mean when he wrote 'If God did not exist, it would be necessary to invent him'? - was he hinting at his own atheism (unlikely, given the age in which he lived) or making a more subtle point about the difficulty of apprehending the Almighty? This book looks into these and a host of other such questions, and takes the reader from the source material into illuminating discussions of its wider significance. We all love quotations - we use them to make our points, to plead our cases and to justify our opinions, as well as to honour, glorify, motivate, incite, besmirch, bewitch and beguile. 1001 Quotations To Inspire You Before You Die will help you do all that and more.

*More Food: Road to Survival* is a comprehensive analysis of agricultural improvements which can be achieved through scientific methods. This reference book gives information about strategies for increasing plant productivity, comparisons of agricultural models, the role of epigenetic events on crop production, yield enhancing physiological events (photosynthesis, germination, seedling emergence, seed properties, etc.), tools enabling efficient exploration of genetic variability, domestication of new species, the detection or induction of drought resistance and apomixes and plant breeding enhancement (through molecularly assisted breeding, genetic engineering, genome editing and next generation sequencing). The book concludes with a case study for the improvement of small grain cereals. Readers will gain an understanding of the biotechnological tools and concepts central to sustainable agriculture *More Food: Road to Survival* is, therefore, an ideal reference for agriculture students and researchers as well as professionals involved sustainability studies.
