communist superpower of the Soviet Union. America saw in the dreams of the Soviet Union the overthrow of the US government, and the end of democracy and freedom. Meanwhile, the Communist Party of the United States attempted to use deep economic and racial disparities in American culture to win over members and sympathizers. From the miscarriage of justice in the Scotsboro Boys case, to the tragedy of the Rosenbergs to the theatrics of the Hollywood Ten to the menace of the Joseph McCarthy and his war hearings,

Albert Marrin examines a unique time in American history...and explores both how some Americans were lured by the ideals of communism without understanding its reality and how fear of communist infiltration at times caused us to undermine our most deeply held values. The questions he raises ask: What is worth fighting for? And what are you willing to sacrifice to keep it? Filled with black and white photographs throughout, this timely book from an award-author brings to life an important and dramatic era in

American history with lessons that are deeply relevant today.

In the tradition of Malcolm Gladwell, Gardner explores a new way of thinking about the decisions we make. We are the safest and healthiest human beings who ever lived, and yet irrational fear is growing, with deadly consequences – such as the 1,595 Americans killed when they made the mistake of switching from planes to cars after September 11. In part, this irrationality is caused by those – politicians, activists, and the media –

who promote fear for their own gain. Culture also matters. But a more fundamental cause is human psychology. Working with risk science pioneer Paul Slovic, author Dan Gardner sets out to explain in a compulsively readable fashion just what that statement above means as to how we make decisions and run our lives. We learn that the brain has not one but two systems to analyze risk. One is primitive, unconscious, and intuitive. The other is conscious and rational. The two systems often agree, but occasionally they

come to very different conclusions. When that happens, we can find ourselves worrying about what the statistics tell us is a trivial threat – terrorism, child abduction, cancer caused by chemical pollution – or shrugging off serious risks like obesity and smoking. Gladwell told us about “the black box” of our brains; Gardner takes us inside, helping us to understand how to deconstruct the information we’re bombarded with and respond more logically and adaptively to our world. Risk is cutting-edge reading.

guns than citizens of any other country, sequester themselves in gated communities, and retreat from public spaces. And yet, crime rates have plummeted, making life in America safer than ever. Why, then, are Americans so afraid—and where does this fear lead to? In this remarkable work of social history, Elaine Tyler May demonstrates how our obsession with security has made citizens fear each other and distrust the government, making America less safe and less democratic. Fortress America charts the rise of a

and Strangers* reveals the forgotten histories of  
xenophobia—and what they mean for us today. By  
2016, it was impossible to ignore an international  
resurgence of xenophobia. What had happened?  
Looking for clues, psychiatrist and historian George  
Makari started out in search of the idea's origins. To  
his astonishment, he discovered an unfolding series  
of never-told stories. While a fear and hatred of  
strangers may be ancient, he found that the notion of

long ago. Coined by late-nineteenth-century doctors**

Makari chronicles the concept's rise, from its popularization and perverse misuse to its spread as an ethical principle in the wake of a series of calamities that culminated in the Holocaust, and its sudden reappearance in the twenty-first century. He investigates xenophobia's evolution through the writings of figures such as Joseph Conrad, Albert Camus, and Richard Wright, and innovators like Walter Lippmann, Sigmund Freud, Jean-Paul Sartre, Simone de Beauvoir, and Frantz Fanon. ***to mend our divided country. For decades Martha C. Nussbaum has been an acclaimed scholar and humanist, earning dozens of honors for her books and essays. In The Monarchy of Fear she turns her attention to the current political crisis that has polarized American since the 2016 election. Although today's atmosphere is marked by partisanship, divisive rhetoric, and the inability of two halves of the country to communicate with one another, Nussbaum focuses on what so many pollsters and pundits have overlooked. She sees a simple truth at the heart of the problem: the political is always emotional. Globalization has produced***

***feelings of powerlessness in millions of people in the West. That sense of powerlessness bubbles into resentment and blame. Blame of immigrants. Blame of Muslims. Blame of other races. Blame of cultural elites. While this politics of blame is exemplified by the election of Donald Trump and the vote for Brexit, Nussbaum argues it can be found on all sides of the political spectrum, left or right. Drawing on a mix of historical and contemporary examples, from classical Athens to the musical Hamilton, The Monarchy of Fear untangles this web of feelings and provides a roadmap of where to go next.***

since the invention of the atomic bomb. Cheap to acquire, easy to deny, and usable for a variety of malicious purposes, cyber is now the weapon of choice for democracies, dictators, and terrorists. Two presidents—Bush and Obama—drew first blood with Operation Olympic Games, which used malicious code to blow up Iran’s nuclear centrifuges, and yet America proved remarkably unprepared when its own weapons were stolen from its arsenal and, during President Trump’s first year, turned back on the United States and its allies. And if Obama would begin his presidency by helping to launch the new era of cyberwar, he would end it struggling unsuccessfully to defend the 2016 U.S. election from interference by Russia, with Vladimir Putin drawing on the same playbook he used to destabilize Ukraine. Moving from

the White House Situation Room to the dens of Chinese government hackers to the boardrooms of Silicon Valley, New York Times national security correspondent David Sanger reveals a world coming face-to-face with the perils of technological revolution, where everyone is a target. “Timely and bracing . . . With the deep knowledge and bright clarity that have long characterized his work, Sanger recounts the cunning and dangerous development of cyberspace into the global battlefield of the twenty-first century.”—Washington Post

9/11 reverberated through the mind of every Muslim American that day and every day after.... Our fear, and the collective breath or brace for the hateful backlash that ensued, symbolize the existential tightrope that defines Muslim American identity today.” The term “Islamophobia” may be fairly new, but irrational fear and hatred of Islam and Muslims is anything but. Though many speak of Islamophobia’s roots in racism, have we considered how anti-Muslim rhetoric is rooted in our legal system? Using his unique lens as a critical race theorist and law professor, Khaled A. Beydoun captures the many ways in which law, policy, and official state rhetoric have fueled the frightening resurgence of Islamophobia in the United States. Beydoun charts its long and terrible history, from the plight of enslaved

African Muslims in the antebellum South and the laws prohibiting Muslim immigrants from becoming citizens to the ways the war on terror assigns blame for any terrorist act to Islam and the myriad trials Muslim Americans face in the Trump era. He passionately argues that by failing to frame Islamophobia as a system of bigotry endorsed and emboldened by law and carried out by government actors, U.S. society ignores the injury it inflicts on both Muslims and non-Muslims. Through the stories of Muslim Americans who have experienced Islamophobia across various racial, ethnic, and socioeconomic lines, Beydoun shares how U.S. laws shatter lives, whether directly or inadvertently. And with an eye toward benefiting society as a whole, he recommends ways for Muslim Americans and their allies to build coalitions

with other groups. Like no book before it, American Islamophobia offers a robust and genuine portrait of Muslim America then and now.

Our world has increasingly become fear based, but we don't understand the sources of this fear so that we can heal them. We have collective fears we each hold, such as dying from a pandemic, and we have individual fears we hold, many of which we are not aware of because they arise from conditioning and deeply embedded beliefs. We are meant to live in joy, not fear, and A Book About Fear will help us do this by taking us on a treetop journey through quantum physics, psychology, philosophy, spirituality, and more. When we see how our belief systems were created, how they limit us, and what we have become attached to that creates fear,

we will come to know ourselves at a deeper level. Then we can make different choices to transform our fears, which will uncover our intrinsic joy.

Sets out a comprehensive framework of analysis for security studies, examining the distinctive character and dynamics of security in five sectors: military, political, economic, environmental, and societal. It rejects traditionalists' case for restricting security in one sector, arguing that security is a particular type of politics applicable to a wide range of issues, and offers a constructivist operational method for distinguishing the process of securitization from that of politicization.
