The New York Times #1 best-selling series. The movie adaptation of Miss Peregrine's Home for Peculiar Children is now a major motion picture from visionary director Tim Burton, starring Eva Green, Asa Butterfield, Ella Purnell, Samuel L. Jackson, and Judi Dench. Like its predecessors, Library of Souls blends thrilling fantasy with never-before-published vintage photography to create a one-of-a-kind reading experience. A boy with extraordinary powers. An army of deadly monsters. An epic battle for the future of peculiardom. The adventure began with Miss Peregrine's Home for Peculiar Children and continued in Hollow City. It now comes to a thrilling conclusion with Library of Souls. As the story opens, sixteen-year-old Jacob discovers a powerful new ability, and soon he's diving through history to rescue his peculiar companions from a heavily guarded fortress. Accompanying Jacob on his journey are Emma Bloom, a girl with fire at her fingertips, and Addison MacHenry, a dog with a special talent for sniffing out lost children. They'll travel from modern-day London to the labyrinthine alleys of Devil's Acre, the most wretched slum in all of Victorian England. It's a place where the fate of peculiar children everywhere will be decided once and for all.

Soul-Health explores the connection between reading and healing. The act of reading engages deeply with our emotions and psychology, and this book broadens our understanding of that process by the surprising revelation that feeling bad has been understood as the best thing for mental and spiritual health. The mental and emotional

impact of reading expanded in the Middle Ages into a therapeutic tool for improving the health of the soul - a state called *salus animae* - and focusing on later Medieval England, the present study explores a core set of religious texts that identify themselves as treatments for the soul. These same texts, however, evoke powerfully negative emotions. *Soul-Health* investigates each of these emotions, offering an analysis of how fear, penance, compassion and longing could work to promote the health of the soul, demonstrating how interest in mental and spiritual health far pre-dates the modern period, and is more complex and balanced than simply trying to achieve joy.

One of the most familiar North American birds, the snowbird, otherwise known as the Dark-eyed Junco, can be seen darting across forest floors, pecking at suburban birdfeeders, and foraging at the edges of parks, streams, and roads all across the continent. By one estimate, upwards of 630 million Juncos populate North America: twice the number of people living here in the U.S. "No Bird Like the Snowbird: Integrative Approaches to Understanding Evolutionary Diversity in the Avian Genus Junco" presents diverse expertise not just on the Dark-eyed Junco, but on the Junco genus more broadly. Collectively, the contributors draw on research, methods, and findings from organismal biology and evolutionary biology in order to show how juncos match their physiology and behavior to their environment via endocrine and timing mechanisms, and how Junco evolutionary history can provide insight into population divergence and the formation of new species. In so doing, they not only provide a definitive account of the Junco genus and speak to its continuing importance as a model organism in a time of rapid global change, they also merge two major biological fields that are typically kept apart, with the goal of offering biologists an integrative framework for further studies into adaptation and population divergence.

skills and confidence for life, we work to maximize successful middle school, high school, and college admissions outcomes. While some of our methods defy “conventional wisdom,” we have a proven track record with a broad range of students: the Ivy League bound to those wishing to avoid community college, the self-motivated to the intransigently jaded, and the profoundly gifted to learning disabled. We have a passion for expanding students' dreams and helping them attain their goals. Cardinal Education believes in the social value of a strong public education system and sponsors pro bono programs to bring private sector expertise to bear. However, government fiscal policies are shortchanging public schools of opportunities: activities, sports, variety of classes, advanced classes, student: teacher ratios, and counseling departments. The “private school imperative” means that despite economic trends, admission to private school is becoming so competitive that it necessitates standardized testing excellence. The philosophy of this math workbook is rigor and

drill. Because this is the first test students take that actively tries to trick students at every turn, students who sit for these standardized exams need reflexive familiarity with computation (math facts), problem types, and strategy. The entrance exams are the first standardized tests for which budgeting time is a significant issue. Students need to spend the majority of time on analysis to avoid getting tricked rather than computation. By building skills, speed, and confidence, we hope to eliminate anxiety and give students a solid foundation on which to build excellent scores. This book is intended as a supplement for our highly trained staff, so it does not include strategies. However, motivated students can use it successfully with occasional help from a teacher or parent. Each chapter is comprised of units, with each unit comprised of 4 problem sets of difficulty, increasing in a logically progressive manner. Students should do as many of the 4 problem sets for each unit as it takes to achieve a 90% accuracy rate. Students taking lower level exams should complete problems 1-10 in

each set. Students competing for high school admissions should complete each problem set in its entirety. Questions or feedback: Info@CardinalEducation.com

Peregrine falcons have their share of claims to fame. With a diving speed of over two hundred miles per hour, these birds of prey are the fastest animals on earth or in the sky, and they are now well known for adapting from life on rocky cliffs to a different kind of mountain: modern skyscrapers. But adaptability only helps so much. In 1951, there were no peregrines left in Illinois, for instance, and it looked as if the species would be wiped out entirely in North America. Today, however, peregrines are flourishing. In The Peregrine Returns, Mary Hennen gives wings to this extraordinary conservation success story. Drawing on the beautiful watercolors of Field Museum artist-in-residence Peggy Macnamara and photos by Field Museum research assistant Stephanie Ware, as well as her own decades of work with peregrines, Hennen uses a program in Chicago

as a case study for the peregrines' journey from their devastating decline to the discovery of its cause (a thinning of eggshells caused by a by-product of DDT), through to recovery, revealing how the urban landscape has played an essential role in enabling falcons to return to the wild—and how people are now learning to live in close proximity to these captivating raptors. Both a model for conservation programs across the country and an eye-opening look at the many creatures with which we share our homes, this richly illustrated story is an inspiring example of how urban architecture can serve not only our cities' human inhabitants, but also their wild ones.

But her progressive actions are not without consequence and ultimately culminate in a night of death-defying stories that take readers on a magic carpet ride from a schoolroom in the South to the banks of the Tigris (and back again).
