The De Gruyter Handbook of Personal Finance provides a robust review of the core topics comprising personal finance, including the primary models, approaches, and methodologies being used to study particular topics that comprise the field of personal finance today. The contributors include many of the world's leading personal finance researchers, financial service professionals, thought leaders, and leading contemporary figures conducting research in this area whose work has been published and practiced. The first section of the handbook provides a broad introduction to the discipline of personal finance. The following two sections are organized around the core elements of personal finance research and practice: saving, investing, asset management, and financial security. The fourth section introduces future research, practice, and policy directions. The handbook concludes with a discussion on an educational and research agenda for the future. This handbook will be a valuable resource for students, teachers, and policymakers and an excellent supplementary source of readings for those teaching undergraduate and graduate-level courses in personal finance, financial planning, consumer studies, and household finance.

Written by the authors, include Readings and Cases allows students to review and apply text concepts. Each chapter includes a chapter overview, a pre-test, self-guided study questions, a post-test, problems, applications, cases, and recent articles from BusinessWeek. Together, these exercises reinforce important concepts and offer students additional opportunities to use their critical thinking and writing skills.
