Who is God? That is the question Elizabeth A. Johnson has spent her life exploring. As a Catholic theologian, writer, teacher, and religious woman, Johnson has searched for “the Living God” and ways to understand God that make sense for our time, perhaps most famously in her groundbreaking book *She Who Is*. Her work is firmly grounded in the Catholic tradition while it explores the edges of that tradition, pushing it to be more

inclusive—a project that has caught the attention of other scholars, everyday Catholics, and sometimes critics. Johnson's own relationship with God as Holy Mystery has helped her to navigate her life's challenges, including finding herself thrust into the spotlight as a headline-making symbol of religious women facing challenges from the church leadership. With this first biography of one of the preeminent Catholic theologians of our time, those who have been enriched by Johnson's work will now find themselves

inspired by her remarkable life story. Lawrence Alloway (1926–1990) was a key figure in the development of modern art in Europe and America from the 1950s to the 1980s. He is credited with coining the term pop art and with championing conceptual art and feminist artists in America. His interests as a critic and as a curator at the Solomon R. Guggenheim Museum in New York were wide-ranging, however, and included architecture, design, earthworks, film, neorealism, science fiction, and public sculpture.

Early in his career he was associated with the Independent Group in London and although he was largely self-taught, he was a noted educator and lecturer. A prolific writer, Alloway sought to escape the conventions of art-historical discourse. This volume illuminates how he often shaped the field and anticipated approaches such as social art history and visual and cultural studies. Lawrence Alloway: Critic and Curator provides the first critical analysis of the multiple facets of Alloway's life and career,

exploring his formative influence on the disciplines of art history, art criticism, and museum studies. The nine essays in this volume depend on primary archival research, much of it conducted in the Lawrence Alloway Papers held by the Getty Research Institute. A political history of the most famous desegregation crisis in America The desegregation crisis in Little Rock is a landmark of American history: on September 4, 1957, after the Supreme Court struck down racial segregation in public schools, Arkansas Governor Orval Faubus called up

the National Guard to surround Little Rock Central High School, preventing black students from going in. On September 25, 1957, nine black students, escorted by federal troops, gained entrance. With grace and depth, Little Rock provides fresh perspectives on the individuals, especially the activists and policymakers, involved in these dramatic events. Looking at a wide variety of evidence and sources, Karen Anderson examines American racial politics in relation to changes in youth culture, sexuality, gender relations, and economics, and she locates the conflicts of Little Rock within the larger political and historical context. Anderson considers how white groups at the time, including middle class women and the working

class, shaped American race and class relations. She documents white women's political mobilizations and, exploring political resentments, sexual fears, and religious affiliations, illuminates the reasons behind segregationists' missteps and blunders. Anderson explains how the business elite in Little Rock retained power in the face of opposition, and identifies the moral failures of business leaders and moderates who sought the appearance of federal compliance rather than actual racial justice, leaving behind a legacy of white flight, poor urban schools, and institutional racism. Probing the conflicts of school desegregation in the mid-century South, Little Rock casts new light on connections between social inequality and the

In his most extraordinary book, the bestselling author of Awakenings and "poet laureate of medicine" (The New York Times) recounts the case histories of patients inhabiting the compelling world of neurological disorders, from those who are no longer able to recognize common objects to those who gain extraordinary new skills. Featuring a new preface, Oliver Sacks's *The Man Who Mistook His Wife for a Hat* tells the stories of individuals afflicted with perceptual and intellectual disorders: patients who have lost their memories and with them the greater part of their pasts; who are no longer able to

recognize people and common objects; whose limbs seem alien to them; who lack some skills yet are gifted with uncanny artistic or mathematical talents. In Dr. Sacks's splendid and sympathetic telling, his patients are deeply human and his tales are studies of struggles against incredible adversity. A great healer, Sacks never loses sight of medicine's ultimate responsibility: "the suffering, afflicted, fighting human subject."

During the War of Independence around 10,000 Irishwomen were actively involved in the fight for Irish freedom. So why, with the outbreak of Civil War and in the years following this conflict, did the role of women in Irish politics steadily decline until by the

early 1940s only a handful of women were involved? 'Dissidents' explores the reasons for this decline. From the divisions caused by the signing of the Anglo-Irish Treaty, which led to a fatal splintering of the women's Republican organisation Cumann na mBan, through the effects of internment during the Civil War on female prisoners and the relegation of the majority of women in Irish politics to the margins, Ann Matthews reveals the story of Republican women in the years following Irish independence. She also asks whether they were responsible for their own demise in the political arena, leaving future generations of Irish women without a foundation on which to build.

Teaching Justice explores the role that teaching and learning in higher education

Access Free Personal Statement Papers

can play in solving problems of social injustice. Examining a range of approaches to education, it considers the challenges that exist in teaching about justice, drawing on extensive empirical data gathered amongst college lecturers and professors, as well as the author's own experience. With an analysis of the strategies commonly used this book will shed light on the manner in which students can be engaged in activism and concerned with issues of social injustice. By overcoming apathy and engaging students with social problems,

education can thus address matters of injustice and begin to effect change. Presenting extensive international research and insightful analyses, Teaching Justice reveals the classroom and the lecture theatre to be important sites in the pursuit of social justice and will appeal to teachers and researchers with interests in social problems, education and educational methods, and criminal justice, as well as community engagement and service learning outside the classroom. Homeostasis involves a delicate interplay

between generative and degenerative processes to maintain a stable internal environment. In biological systems, equilibrium is established and controlled through a series of negative feedback mechanisms driven by a range of signal transduction processes. Failures in these complex communication pathways result in instability leading to disease. Cancer represents a state of imbalance caused by an excess of cell proliferation. In contrast, neurodegeneration is a consequence of excessive cell loss in the nervous system.

Both of these disorders exhort profound tolls on humanity and they have been subject to a great deal of research designed to ameliorate this suffering. For the most part, the topics have been viewed as distinct and rarely do opportunities arise for transdisciplinary discussions among experts in both fields. However, cancer and neurodegeneration represent yin-yang counterpoints in the regulation of cell growth, and it is reasonable to hypothesize that key regulatory events mediated by oncogenes and tumor suppressor genes in

cancer may also affect neurodegenerative processes

In 1967, Reies Lopez Tijerina led an armed takeover of a New Mexico courthouse in the name of land rights for disenfranchised Spanish-speaking locals. The small-scale raid surprisingly thrust Tijerina and his cause into the national spotlight, catalyzing an entire generation of activists. The actions of Tijerina and his group, the Alianza Federal de Mercedes (the Federal Alliance of Land Grants), demanded that Americans attend to an overlooked part of the country's

history: the United States was an aggressive empire that had conquered and colonized the Southwest and subsequently wrenched land away from border people—Mexicans and Native Americans alike. To many young Mexican American activists at the time, Tijerina and the Alianza offered a compelling and militant alternative to the nonviolence of Cesar Chavez and Martin Luther King Jr. Tijerina's place at the table among the nation's leading civil rights activists was short-lived, but his analysis of land dispossession and his prophetic zeal for

the rights of his people was essential to the creation of the Chicano movement. This fascinating full biography of Tijerina (1926-2015) offers a fresh and unvarnished look at one of the most controversial, criticized, and misunderstood activists of the civil rights era. Basing her work on painstaking archival research and new interviews with key participants in Tijerina's life and career, Lorena Oropeza traces the origins of Tijerina's revelatory historical analysis to the years he spent as a Pentecostal preacher and his hidden past as

a self-proclaimed prophet of God. Confronting allegations of anti-Semitism and accusations of sexual abuse, as well as evidence of extreme religiosity and possible mental illness, Oropeza's narrative captures the life of a man--alternately mesmerizing and repellant--who changed our understanding of the American West and the place of Latinos in the fabric of American struggles for equality and self-determination.

This book examines the range and complexity of unionist political identities,

ideas and beliefs in the non-English parts of the United Kingdom in the mid-twentieth century. It discusses the careers of eight politicians from Scotland, Wales and Northern Ireland and uncovers the varieties of unionism that held the multi-national UK together. Challenging the idea that Britain was in the process of breaking up, it argues that the Union provided a focus for loyalty in the United Kingdom that contributed to the continuing formation of identities of Britishness.

This volume examines to what extent the positive atmosphere created by the Helsinki Accords contributed to the change in political circumstances seen in the countries of Central Europe, under Soviet domination. It focuses in

particular on - firstly - a consequent new impetus to bolster human rights in international politics, as Western democracies - especially the US - integrated human rights concerns into its foreign policy relations with Soviet Bloc countries and - secondly - how this Western embrace of human rights seemed to create new incentives for increased dissident activity in Central and Eastern Europe and from 1976 onward. Finally, the book reminds us of the significant role of the Helsinki Accords in developing democratic practices in Eastern European societies under Soviet domination in 1975-1989 and in creating the

Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. The history of the Irish republican movement is dominated by the story of the men who took up arms in Ireland's fight for freedom against the British. The names of men like Pearse, Connolly, Collins and Barry still resonate today as heroes who won independence for Ireland. However, the critical role of women in this fight for freedom has

often been overlooked. Renegades examines the part played by women in the major political and social revolutions that took place from 1900- 1922. It explores the growing separation of republican women into two distinct groups, those active on the military side in Cumann na mBan and those involved on the political side, particularly with Sinn Féin. It also looks at the often ignored 'war on women', which manifested itself in the form of physical

and sexual assaults by both sides during the War of Independence, and the fury of female republicans as the political establishment accepted the Anglo-Irish Treaty. In this evocative account, Renegades restores the women of the republican movement to the prominent place they deserve in Irish history.

"A new edition with a final chapter written forty years after the explosion." This book discusses the development of Edward Tolman's purposive

behaviourism from the 1920s to the 1950s, highlighting the tension between his references to cognitive processes and the dominant behaviourist trends. It shows how Tolman incorporated concepts from European scholars, including Egon Brunswik and the Gestalt psychologists, to justify a more purposive form of behaviourism and how the theory evolved in response to the criticisms of his contemporaries. The manuscript also discusses Tolman's

political activities, culminating in his role in the California loyalty oath controversy in the 1950s. Tolman was involved in a number of progressive causes during his lifetime, activities that drew the attention of both state legislators in California and the Federal Bureau of Investigation. It treats Tolman's theoretical and political activities as emanating from the same source, a desire to understand the learning process in a scientific manner and to

apply these concepts to improve the human condition.

A State of Play explores how the British have

imagined their politics, from the parliament worship of Anthony Trollope to the cynicism of The Thick of It. In an account that mixes historical with political analysis, Steven Fielding argues that fictional depictions of politics have played an important but insidious part in shaping how the British think about their democracy and have helped ventilate their many frustrations with Westminster. He shows that dramas and fictions have also performed a significant role in the battle of ideas, in a way undreamt of by those who draft party manifestos. The book examines the work of overtly political writers have treated the subject, discussing the novels of H.G. Wells, the comedy series Yes, Minister and the plays of David Hare.

However, it also assesses how less obvious sources, such as the films of George Formby, the novels of Agatha Christie, the Just William stories and situation comedies like Steptoe and Son, have reflected on representative democracy. A State of Play is an invaluable, distinctive and engaging guide to a new way of thinking about Britain's political past and present.
