sensitize students to the necessity of learning how not to defer to the mysterious authority of the experts, but rather to learn how to be a critical consumer of others' research, and to gain confidence in their ability to be producers of research. Sue McGregor shows students how to be research literate, and how to find, critique and apply other people's scholarship. This textbook is grounded in a solid understanding of the prevailing research methodologies for creating new knowledge (philosophical underpinnings), which in turn dictate problem posing, theory selection, and research methods (tasks for sampling, collecting and analyzing data, and reporting results).

Though seen by many as two sides of the same coin, they have come to have widely different connotations. Nationalism is increasingly seen as destructive, and at the root of the world's bloodiest conflicts; patriotism seems something more benign, a political virtue. How are we to mark the distinction between these two phenomena? How can we rescue patriotism from the tainted grasp of nationalism? Reconstructing the historical the meaning of the terms, Maurizio Viroli shows how the two concepts have been used within specific cultural and ideological contexts. He reviews the political

Research Question(s): How does scaffolding of in-class debates and peer evaluations improve students' academic persuasive writing? How did students express self-efficacy about writing in English and Spanish over the course of the study? Research Activities: Context: This inquiry targeted the needs of my Spanish

Language AP class, which consisted of twelve seniors and two juniors. Seven students were classified as English Language Learners, and another five students have been re-designated. All of my students were considered to be native/heritage speakers of Spanish. Instructional Approach: The inquiry lasted four weeks and was divided into two equal phases. The first phase was completed prior to winter vacation in December; the second phase was completed in January. Students prepared for and participated in debates as a means of showing them how an effective argument is created. The debates

targeted two issues: the drug trafficking problem in Mexico and the controversy surrounding immigration and amnesty.

Students then participated in scaffolded activities to explore how to write argumentative essays. These activities included class analysis of argument structure in their peers' essays, the use of graphic organizers, and structured peer-editing workshops. Data Gathering: Data collection included a baseline and outcome quick write, the first drafts and the final essays turned in by the students as the primary achievement data. Students also completed surveys which asked

them to specify their degree of confidence while writing, in English and Spanish. Finally, observations were taken during student work days in preparation for the debate and peer-editing workshops. The observation data were behavior notes taken every 10 minutes examining a student's level of engagement on the task at hand. Findings and Conclusions: Comparisons of the baseline and outcome data indicate that the majority of students had a much better understanding of the structure and content of an argumentative essay after the intervention. The majority of students (54%) wrote more in the

outcome data essays than in the baseline data essays.

Furthermore, 85% of students included some sort of representation of the other side in their second essay. A rebuttal is a key component of an effective argument, which zero students included on their first essay. The findings of the intervention achievement data suggests that scaffolding, peer-editing, and revising stabilize and standardize the essays turned in. For example, although 42% of students wrote less (in regards to the number of paragraphs), 75% of students still expressed the same number of ideas (typically three for a

standard five paragraph essay). Confidence results indicated that the percentage of students who rated their confidence levels as high while writing a persuasive essay in Spanish grew throughout the course of the study: 43% rated their confidence levels as high prior to the intervention, 60% half-way through the intervention, and 64% after the intervention. Grade Level: Grades 11 and 12. Data Collection Methods: Student writing, student survey, observation field notes. Project Descriptors: Argumentative/persuasive writing, debate, native Spanish speakers.

The Dark Side of the All- American Meal

A heated debate is raging over our nation's public schools and how they should be reformed, with proposals ranging from imposing national standards to replacing public education altogether with a voucher system for private schools. Combining decades of experience in education, the authors propose an innovative approach to solving the problems of our school system and find a middle ground between these extremes. Reinventing Public Education shows how contracting would radically

change the way we operate our schools, while keeping them public and accessible to all, and making them better able to meet standards of achievement and equity. Using public funds, local school boards would select private providers to operate individual schools under formal contracts specifying the type and quality of instruction. In a hands-on, concrete fashion, the authors provide a thorough explanation of the pros and cons of school contracting and how it would work in practice. They show how contracting would free local school boards from operating schools so they can focus on improving educational policy; how it would allow parents to choose the best school for their children; and, finally, how it

would ensure that schools are held accountable and academic standards are met. While retaining a strong public role in education, contracting enables schools to be more imaginative, adaptable, and suited to the needs of children and families. In presenting an alternative vision for America's schools, Reinventing Public Education is too important to be ignored.

essays common at the post-secondary level, the most important being expository writing, persuasive writing, and timed essay exams. Each chapter uses the same five-step approach to writing that is used in the two lower-level books. In each chapter, students analyze a model essay, noticing key organizational and linguistic features; brainstorm ideas; write multiple drafts; revise their work; engage in peer reviews; and share their finished work. Chapters recycle and build upon previously taught material.
