Core concepts in education are changing. For example, professional performance or expertise is not uniquely the fruit of specialist knowledge acquired at professional schools, but the sum of influences exerted by a complex web of continuous learning opportunities for which an individual is well (or ill) prepared by their schools and their workplace. The key contributory factors to professional expertise are how professional schools connect to professional practice, how schools pre the workplace endorses continuous development. Thus, the question this volume addresses—how to design learning and working environments that facilitate the integration of these three elements—is at the heart of contemporary pedagogical theory. The authors also ask a second vital question: how do we educate learners that go on to maximize their life's learning opportunities by regulating their own ongoing learning? Learning at the Crossroads of Theory and Practice argues this is an unprecedented opportunity for learning about learning. The book sheds light on different elements of this challenge: integrating theory and practice in business education, generating and fully exploiting workplace learning opportunities, and enriching our classrooms by coupling theoretical knowledge with the richness of real-life experience.

"Adapted from Macroeconomics, Second edition by Paul Krugman and Robin Wells."

The present thoroughly revised and updated edition of Core Economics with Video Lectures is strictly according to the latest syllabus prescribed by the CBSE, New Delhi of Class XII. As in the previous editions, I have kept the treatment as simple as possible and confined the scope of each topic to the requirement of the syllabus. The treatment has been supplemented by the real life examples and numerical illustrations to enhance the understanding of

the subject. This book is an outcome of my interaction with a large number of teachers in the Orientation Programmes organised by the CBSE and KVS in various parts of India and by School Associations in UAE and Kuwait. I have taken care of the suggestions and observations made by the teachers. My sincere thanks to them. Goyal Brothers Prakashan
