Strategic Marketing Management: Theory and Practice offers a systematic overview of the fundamentals of marketing theory, defines the key principles of marketing management, and presents a value-based framework for developing viable market offerings. The theory presented stems from the view of marketing as a value-creation process that is central to any business enterprise. The discussion of marketing theory is complemented by a set of practical tools that enable managers to apply the knowledge contained in the generalized frameworks to specific business problems and market opportunities. The information on marketing theory and practice contained in this book is organized into eight major parts. The first part defines the essence of marketing as a business discipline and outlines an overarching framework for marketing management that serves as the organizing principle for the information presented in the rest of the book. Specifically, we discuss the role of marketing management as a value-creation process, the essentials of marketing strategy and tactics as the key components of a company's business model, and the process of developing an actionable marketing plan. Part Two focuses on understanding the market in which a company operates. Specifically, we examine how consumers make choices and outline the main steps in the customer decision journey that lead to the purchase of a company's offerings. We further discuss the ways in which companies conduct market research to gather market insights in order to make informed decisions and develop viable courses of action. Part Three covers issues pertaining to the development of a marketing strategy that will guide the company's tactical activities. Here we focus on three fundamental aspects of a company's marketing strategy: the identification of target customers, the development of a customer value proposition, and the development of a value proposition for the company and its collaborators. The discussion of the strategic aspects of marketing management includes an in-depth analysis of the key principles of creating market value in a competitive context. The next three parts of the book focus on the marketing tactics, viewed as a process of designing, communicating, and delivering value. Part Four describes how companies design their offerings and, specifically, how they develop key aspects of their products, services, brands, prices, and incentives. In Part Five, we address the ways in which companies manage their marketing communication and the role of personal selling as a means of persuading customers to choose, purchase, and use a company's offerings. Part Six explores the role of distribution channels in delivering the company's offerings to target customers by examining the value-delivery process both from a manufacturer's and a retailer's point of view. The seventh part of the book focuses on the ways in which companies manage growth. Specifically, we discuss strategies used by companies to gain and defend market position and, in this context, address the issues of pioneering advantage, managing sales growth, and managing product lines. We further address the process of developing new market offerings and the ways in which companies manage the relationship with their customers. The final part of this book presents a set of tools that illustrate the practical application of marketing theory. Specifically, Part Eight delineates two workbooks: a workbook for segmenting the market and identifying target customers and a workbook for developing the strategic and tactical components of a company's business model. This part also contains examples of two marketing plans—one dealing with the launch of a new offering and the other focused on managing an existing offering.

Essentials of Marketing, seventh edition, provides an accessible, lively and engaging introduction to marketing. Taking a practical, tactical approach, the authors cover traditional marketing techniques and theories, as well as offering the most up to date critical perspectives.

Optimizing Distribution Systems in Asset Management

"...This is a very profound concept put in a very simple and beautiful format"

as written in the Foreword by His Holiness the Dalai Lama.

In October 2007, author Satya Saurabh Khosla's article predicting the recession was published in Business Times, Singapore. Millions suffered despite its accurate warning. While analysing this later, he felt that preventing a recession will help society more. How to Prevent Recession seeks to rely on ethics in the strategy used for life and work. Values are a 'Strategy for living life'. These are applied at work to prevent recession. If profit becomes the only purpose of life, it disturbs the framework which sustains society. How to Prevent Recession uses the ancient framework of four goals of life. It applies these goals to business from a strategy of life. This book compares profit to the speed of a car. If personal and firm's profit is only maximised brakes are forgotten. Management Ideas given by Porter state that strategy is an 'optimisation effort'. Profit, too, should result from it. A car's speed is optimised when it considers criteria like bad roads to avoid jerks for passengers, fuel efficiency and reducing speed to prevent a crash. Ancient wisdom trains the human mind. Then, the Truth about optimum strategy emerges from within, as we drive the car of life to work. Strategy is a way of achieving a goal. So, ancient Indian wisdom of four goals of life are like a car's four wheels. An 'optimisation effort' balances the pressure. The wisdom of using righteous conduct prevents recession.

"The book makes the important point that any business strategy should emerge from a conception of a decent life rooted in spirituality." Pradip Khandwala, former Director, Indian Institute of Management, Ahmedabad. "Excellent work. Brilliant in its integration of ancient Indian Truths with the concept of management" Prof P.N. Sharma, Member, Governing Body, Library of Tibetan Works & Archives.
