Thoroughly updated and enhanced by new print and electronic ancillaries, this full-color text provides accurate, practical information and instruction on phlebotomy procedures with a comprehensive background in theory and principles. Reflecting current CLSI guidelines, NAACLS competencies, and federal regulations, this Fourth Edition includes updated information on safety issues and equipment, laboratory

information systems and instrumentation, legal issues, and diagnostic tests. This edition also includes caution notes identifying dangerous practices and problem areas. An accompanying CD-ROM includes clinical procedures videos, animations, electronic flashcards, and a glossary with audio pronunciations. Other ancillaries include a new companion Workbook, an Instructor's Resource CD-ROM, and online resources at thePoint. We're pleased to introduce the fourth edition of

Lippincott Williams & Wilkins' Comprehensive Medical Assisting, the medical assisting text designed to meet your challenges. This dynamic package of text and resources represent more than just a textbook, instead providing a suite of learning resources. This is the one text aimed at making sure that every graduate can quickly change their cap and gown for a set of scrubs and immediately be a vital member of the medical office. We do this by: Providing the content in an

engaging style that speaks to students. Putting pedagogy to work in the text through key features like patient education boxes, competency checklists, procedure boxes, etc. Placing students in the real environment in through our web-based EMR and PMS software package. Showing what we teach through skills videos that demonstrate the procedures and skills described. Constantly reinforcing the learning through additional online ancillaries including animations, ESL resources,

etc. Helping instructors lessen planning time, with robust instructor resources. A competency spreadsheet helps faculty members and students track their progress through the material. New content in the fourth edition focuses on addressing crucial changes in policy and technology. Without changing the engaging writing style we're known for, we've made sure that the content is up-to-date and in-line with the needs of the market. We've added content on emergency preparedness, a crucial

topic in today's medical office. In addition, instructors will be happy to find the latest CAAHEP and ABHES competencies clearly addressed throughout the text. Written in a concise, readable style, the Fourth Edition of this leading text continues to set the standard in the constantly evolving field of clinical chemistry. Completely revised and updated, this text reflects the latest developments in clinical chemistry. Recent advances in quality assurance, PCR and laboratory automation

receive full coverage. The immunochemistry chapter has been expanded to reflect the latest technological advances, and two entirely new chapters on cardiac function and point of care testing have been added. Chapters have been combined and restructured to match the changes that have occurred in the clinical laboratory. Plus, the contributors continue to be the leaders in the field of clinical chemistry. Other text features include outlines, objectives, case studies, practice questions and

exercises, a glossary and more.

This best-selling resource provides a general overview and basic information for all adult intensive care units. The material is presented in a brief and quick-access format which allows for topic and exam review. It provides enough detailed and specific information to address most all questions and problems that arise in the ICU. Emphasis on fundamental principles in the text should prove useful for patient care outside the ICU as well. New chapters
