Creating an idealized image of a subject  
is a portrait photographer's job.  
However, the approach is not quite  
formulaic. From one subject to the next  
and one day to the next, there are  
different goals and scenarios—on  
Monday, you may be tasked with  
photographing your subjects under  
cloudy skies on a beach; on Tuesday,  
you may need want to downplay your  
client's wide hips in the studio; on  
Wednesday, you may want to create  
dramatic lighting for an actor's  
portfolio—on-stage. Every day, there is a  
unique challenge to meet, often under  
varying conditions. So, how do you

make a magically good portrait during every shoot? In this book, Bill Israelson shows you how to tackle the problem of creating a great portrait of your every client. Beginning with a discussion on equipment essentials, breaking the discussion into two topics—gear for studio work and portable equipment for location work. Next, you'll learn simple posing strategies for making women, men, kids, and groups look their best in any presentation. You'll learn how to position the body from head to toe to maximize assets and downplay common problem areas. Lighting is the backbone of every image. In the studio, you have complete control over every facet of the lighting—from its hardness or softness to its color temperature and direction. On location, the basic principles of good lighting still apply—but the quality and quantity of light is subject to change.
