***This is a USMLE physiology review and study aid for medical students. It summarizes the basic concepts of physiology in a straightforward way, system by system, and explains, step by step, how to solve numerical problems, as in acid-base balance. Each chapter opens with an outline that helps organize the material and guide the student's progress. And each chapter closes with a set of 20 self-assessment questions accompanied by answers and detailed explanations. The questions are similar in style to those in the USMLE, including both multiple-choice and extended matching formats. The answer explanations contain memorization tips as well as additional information supplied to make the content of each chapter as thorough as possible.***
