The genomics revolution would not have been possible without the 'parallelisation' offered by microarray technology. This technological - and commercial - success has been since emulated by other applications areas, with a tremendous amplification of innovation. This book describes the fundamentals and latest developments in microarray technology, as well as its future directions. It presents detailed overviews of the different techniques of fabricating microarrays, of the chemistries and preparative steps involved, of

This report provides an update on the local currency sustainable bond markets in the Association of Southeast Asian Nations and the People's Republic of China, Japan, and the Republic of Korea (ASEAN+3). Historically, green bonds have dominated the sustainable debt market in ASEAN+3, but the coronavirus disease (COVID-19) pandemic has spawned the next generation of social- and sustainability-labeled instruments to fund a broader range of environmental and social benefits. This report provides a comprehensive summary of regional developments, identifies existing obstacles and challenges, highlights green investment opportunities in key sectors, and offers practical recommendations to further develop sustainable local currency bond markets in ASEAN+3.

This consultation paper explains that several years of sound macroeconomic policies and political reforms have left Morocco well equipped to address the 2008 international crisis and to respond to pressing social demands. In this challenging environment, Morocco has performed well economically and has seen its social indicators improve. It is stressed that containing and reorienting public expenditure, particularly by reforming the generalized subsidies system, will be the key to ensuring medium-term fiscal sustainability. A well-targeted subsidy system would be less costly and would better support the neediest segment of the population.
