CAREER GUIDANCE

Bangladesh is committed to achieving universal health coverage (UHC) by 2032; to this end, the government of Bangladesh is exploring policy options to increase fiscal space for health and expand coverage while improving service quality and availability. Despite Bangladesh's impressive strides in improving its economic and social development outcomes, the government still confronts health financing and service delivery challenges. In its review of the health system, this study highlights the limited fiscal space for implementing UHC in Bangladesh, particularly given low public spending for health and high out-of-pocket expenditure. The crisis in the country's human resources for health (HRH) compounds public health service delivery inefficiencies. As the government explores options to finance its UHC plan, it must recognize that reform of its service delivery system with particular focus on HRH has to be the centerpiece of any policy initiative.

Lippincott NCLEX-RN Alternate-Format Questions, 7th edition is designed to help anyone preparing to take the RN licensing examination. This updated 7th edition has everything needed for students to be fully prepared to answer every type of question found on the NCLEX. More than 600 questions include multiple-response, drag-and-drop, hotspot, audio, chart, graphic option, and fill-in-the blank questions. Also included are two comprehensive tests with 100 questions each. Rationales are clear and detailed and cover correct as well as incorrect answers. Test-taking strategies help students dissect each question to its core components and provide keys to choosing the right answer. The book reviews all the topics covered on the actual NCLEX-RN. Hundreds of questions at the application level or above prompt active learning and higher-order thinking. Questions are aligned with the National Council of State Boards of Nursing (NCSBN) 2019 RN test plan and are written in the style used on the licensing examination. An accompanying PassPoint trial provides an additional opportunity for students to practice for NCLEX while also giving a glimpse of the full PassPoint experience.

**Industrial agriculture is responsible for widespread environmental degradation and undermines the pursuit of human well-being. With a projected global population of 10 billion by 2050, it is urgent for humanity to achieve a more sustainable approach to farming and food systems. This concise text offers an overview of the key issues in sustainable food production for all readers interested in the ecology and environmental impacts of agriculture. It details the ecological foundations of farming and food systems, showing how knowledge from the natural and social sciences can be used to create sustainable alternatives to the industrial production methods used today. Beginning with a discussion of the role of agriculture in human development, the primer examines how twentieth-century farming methods are environmentally and socially unsustainable, contributing to global change and perpetuating inequalities. The authors explain the principles of environmental sustainability and explore how these principles can be put into practice in agrifood systems. They emphasize the importance of human well-being and insist on the centrality of social and environmental equity and justice. Sustainable Food Production is a compelling guide to how we can improve our ability to feed each other today and preserve the ability of our planet to do so tomorrow. Appropriate for a range of courses in the natural and social sciences, it provides a comprehensive yet accessible framework for achieving agricultural sustainability in the Anthropocene.**
