Have you ever wondered where the ever expanding layers of bureaucracy are taking us in the field of education? This book challenges us to think carefully about this question. The status quo in education consists of policies, practices, and power structures impacting the way we teach, and prevent students from learning in meaningful and significant ways. Assessment techniques drive our teaching practices resulting in a learning process that students strongly dislike. Technology like PowerPoint presentations and clickers force students to pay attention to lectures, but the end result is the same-memorizing information for exams. It is causing students to become less focused on comprehending what they read. It is also physically changing the way students read focusing on small sound bites on what they believe is necessary to remember for tests. Discriminating against students of color continues to be a prevalent problem as well. Data show that white educators consist of a huge majority often lacking cultural awareness in our classrooms. Reading this book will inspire you to become a courageous educator and implement meaningful changes in your classroom on how to asses your students, what kind and how much technology to use, and how to sensitively treat educators and students of color.

Jeffrey D. Sachs is one of the world's most perceptive and original analysts of global development. In this major new work he presents a compelling and practical framework for how global citizens can use a holistic way forward to address the seemingly intractable worldwide problems of persistent extreme poverty, environmental degradation, and political-economic injustice: sustainable development. Sachs offers readers, students, activists, environmentalists, and policy makers the tools, metrics, and practical pathways they need to achieve Sustainable Development Goals. Far more than a rhetorical exercise, this book is designed to inform, inspire, and spur action. Based on Sachs's twelve years as director of the Earth Institute at Columbia University, his thirteen years advising the United Nations secretary-general on the Millennium Development Goals, and his recent presentation of these ideas in a popular online course, The Age of Sustainable Development is a landmark publication and clarion call for all who care about our planet and global justice.
