About the Book This book has been designed keeping in mind the needs of professionals who are preparing for the Independent Director's Online Proficiency Self-Assessment Test. The book would be immensely useful for the chartered accountants, company secretaries, lawyers and management professionals while undertaking the Independent Director's examination as it gives the updated provisions of different statutes and MCQs relevant for it. Contents Chapter 1: Companies Act, 2013 and relevant Rules (sections 3 to 246) Chapter 2: Secretarial Standards (SS-1 and SS-2) Chapter 3: Securities Laws and Regulations (covering SEBI Act, 1992; SEBI (LODR) Regulations, 2015; SEBI (ICDR) Regulations, 2018; Securities Contracts (Regulation) Act, 1956 and Depositories Act, 1996) Chapter 4: Independent Director (covering entire day-to-day reference materials specially meant for the Independent Directors) Chapter 5: Corporate Governance & Strategy (covering corporate governance and board effectiveness matters) Chapter 6: Financial Accountancy (covering understanding about the Accounting Standards, Balance-Sheet, Profit & Loss Account, Cash Flow Statements, CARO-2020 and the Financial Ratios) Chapter 7: Case Laws (Includes 7 leading case studies)

The new edition of this infertility manual has been fully revised to provide clinicians with the latest advances in the diagnosis and management of infertility. Divided into seven sections, the book provides step by step guidance on each stage of the process, from initial examination and identifying the causes of infertility in both females and males, to ovarian stimulation and assisted reproduction techniques. The final section is dedicated to laboratory management covering topics such as follicular fluid screening and oocyte assessment, culture systems, and cryopreservation. The fourth edition includes new chapters on molecular mechanisms such as endometrial receptivity, and implantation; and current trends such as the embryo scope and assisted hatching. The comprehensive text is further enhanced by case studies, clinical photographs, diagrams, flowcharts and tables. Key points Fully revised, new edition providing latest advances in diagnosis and management of infertility Fourth edition features new chapters on molecular mechanisms and current trends Highly illustrated with clinical images, flowcharts and tables Previous edition (9788184486179) published in 2009

The new edition of this text admirably fills the need for a primer on the central topics involved in Human In Vitro Fertilization (IVF). Supplying a

comprehensive and hands-on approach to IVF, this source presents established state-of-the-art procedures and techniques, as well as the most current research in the field. Expert contributors also discuss the history of IVF and the potential of future research. Offering essential information for reproductive endocrinologists, IVF practitioners and embryologists, this book guides readers through every step of human assisted conception, from patient pre-treatment to monitoring of outcomes.

Up-to-date, comprehensive textbook for IVF practitioners covering the basic science and practical details that underpin successful IVF.

Since April 2014, Secretarial Audit has become mandatory under the Companies Act, 2013.

Subsequently, SEBI has also mandated Secretarial Audit for material subsidiaries of a listed Company and obtaining a Compliance Certificate for submission to Stock Exchange. Alongwith this, MGT 7 is also required to be certified by a Practising Company Secretary whereby he/she has to confirm comprehensive compliance of the concerned

company. Therefore, there are hundreds of compliances which companies have to do in a financial year and giving such a comprehensive Compliance Certificate requires thorough knowledge, different perspective and techniques. This book covers the meaning, benefits, process, approach and entire scope of Secretarial Audit providing detailed checklists with respect to Companies Act, 2013, SEBI Regulations and FEMA Regulations which will be very useful for professionals not only while doing Secretarial Audit but also for routine certifications like MGT-7, MGT-8 or Compliance Certifications mandated under various laws. Key Features Detailed Checklists for Audit on Companies Act, 2013, SEBI (LODR) Reg., 2015, SEBI (PIT) Reg., 2015 and FEMA, 1999 Includes insights on ICSI Auditing Standards Elaborates newly introduced key concepts under Companies Act, 2013 by way of Annexures like SBO, etc. Contains a chapter elaborating key concepts under Companies Act, 2013 which will help professionals to understand and comply with law in letter and spirit. Contains a compilation of useful charts as well as specimen Management Representation Letter and various Declarations required to be obtained from the Accounts and Finance Department Brings greater clarity w.r.t. Role of Auditor, Process of Audit and duty as well as liability of auditor A complete guide to sperm retrieval methods performed for men with azoospermia, aimed at andrologists and male fertility specialists.

Critical testing information and key clinical protocols in the palm of your hand McGraw-Hill's Manual of Laboratory & Diagnostic Tests focuses specifically on what you need to know to understand the test, educate the patient, and provide safe, effective care before, during, and after the test. In addition, this easy-to-use clinical companion is the only text to actively incorporate evidence-based practice features throughout, both in test monographs and appendices—a major advantage that enhances your ability to apply the book's content to your daily practice. Features: A cohesive 5-part organization covering the full range of laboratory tests, diagnostic tests, laboratory/diagnostic assessments of body function, education, and screening Time-saving alphabetical organization of tests with handy thumb tabs Full-color icons that highlight the organization of each test, and clearly identify important features throughout Skill-sharpening references to national guidelines, including JCAHO Full coverage of clinical interventions/implications Essential insights into the possible meanings of abnormal values and contraindications Key references that pertain to evidence-based practice Timely appendix on the increasing use of evidence-based practice Critical patient teaching information

Carl Djerassi is one of “the fathers of the Pill”—he was awarded the National Medal of Science for the first synthesis of a steroid oral contraceptive—and has had a prolific additional career as a writer of fiction, plays, and dialogues about science. In these

two plays, ICSI and Taboos, he dramatizes the social transformations and contested viewpoints created by advances in reproductive science and technology. Two of the most startling developments in contemporary science have radically disrupted the historical connection between sex and reproduction: in vitro fertilization and intracytoplasmic sperm injection (ICSI)—an assisted reproductive technique that directly injects a single sperm into an egg. The word play ICSI—designed for classroom readings—presents, in the format of a contentious talk-show dialogue, the science of direct-injection fertilization and the ethical issues connected with it. A DVD included in the book provides video of the ICSI injection process as viewed through a microscope, to be used in performances of the ICSI one-act dialogue. Taboos, a full-length play, turns the screws on characters that reflect a polarized America. Two couples—lesbian partners and a conservative husband and wife struggling with infertility—must make choices in a drama that examines the disjunction of sexual reproduction and the physical act of sex.

Practical Manual of In Vitro Fertilization

Gujarat RERA (GujRERA) Manual is an attempt to understand the nuances of the Real Estate (Regulation and Development) Act, 2016 (RERA), with a special focus on the state of Gujarat along with Case Laws from all other States (incl. RERA Authorities, Tribunals, High Courts & Supreme Court). This book provides section-wise commentary RERA, along with the following:

- GujRERA Rules & Regulations
- Orders/Circulars issued by GujRERA
- Supreme Court/High Court Judgements
- RERA Appellate Tribunal/Authority Judgements
- FAQs related to GujRERA

This book will be helpful for all the stakeholders of the Real Estate Industry like:

- Chartered Accountants
- Company Secretaries
- Cost Accountants
- Advocates
- Engineers
- Architects
- Real Estate Developers
- Real Estate Agents

It covers the practical aspects of the GujRERA, which will help the Real Estate Developers and Agents for easy compliance with the RERA Law. It also covers the knowledge and practical aspects of the rights and duties of the

customers in the real estate sector. The Present Publication is the Latest Edition, authored by CA Mahadev Birla, Adv. (CA) Nipun P. Singhvi, CS Richa Birla, & Adv. Vishal J. Dave, updated till August 2021, with the following noteworthy features:

- [Encyclopedia of Gujarat RERA] covering all the Rules, Regulations, Forms, Circulars, Order, Case Law, etc., in reference to the relevant provision of RERA.
- [Rights & Duties of Builders, Brokers & Buyers] are explained in this book
- [Commentary along with Case Laws] on the Real Estate (Regulation and Development) Act, 2016, along with Case Laws from across India including: The Supreme Court High Courts RERA Appellate Tribunal Gujarat RERA Orders & Circulars
- [Interplay of GujRERA with other Laws] such as Consumer Protection Laws and Insolvency & Bankruptcy Code 2016
- [FAQs on GujRERA]

A Corporate Professional is required to equip himself with regard to corporate compliances on day- to-day basis. There are number of compliances which are required to be complied with depending on the event , whether it is incorporation / conversion / change , etc., not only from Company Law point of view but also from SEBI Regulations point of view (in case of a listed company). To assist the professional in this endeavour, this book is yet another attempt to provide all related procedures at one place along with the resolutions to make it handy and easy to use. The Book has been divided into two parts. Division-I contains Company Law Procedures of more than 115 events. Each procedure has been divided into following heads: - Applicable Section of the Companies Act, 2013 - Applicable Company Rule - Applicable Regulation in case of listed company - SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 - Synopsis (giving

Sex in an Age of Technological Reproduction

Helping IVF laboratories and clinics to maintain the highest success rates possible, this is essential reading for every IVF laboratory.

A guide to the concepts and applications of computer graphics covers such topics as interaction techniques, dialogue design, and user interface software.

Whilst assisted reproduction techniques (ART) have become increasingly successful and largely standardized, there is still only a partial understanding of what constitutes a 'true' embryo environment. Replicating the varying physiological conditions of the in-vivo environment that the embryo travels through in the in-vitro culture is still a major challenge in ART. This practical volume details how to organize and operate an IVF laboratory in order to mimic these conditions for successful embryo culture. Environments and equipment that are essential for running safe and efficient facilities such as maintaining good air quality and hygiene protocols, and utilizing an effective layout are covered in detail. Other chapters discuss the different consumables needed, optimal handling techniques and parameter monitoring systems, as well as recent advances in the area including artificial intelligence and automation. This is an indispensable guide to understanding the background science of culturing embryos, crucial to successful outcomes in ART.

The second edition of this three-volume set brings practitioners and trainees fully up to date with the latest advances in Assisted Reproductive Technology (ART). Volume One begins with an introduction to infertility, describing physiology, endocrinology and infertility in both men and women. The following sections provide in depth discussion on ART, from ovulation induction, intrauterine insemination, and ART techniques, to third

party reproduction, complications, outcomes and future clinical applications. The second volume is dedicated to laboratory aspects of In Vitro Fertilisation (IVF) andrology, and ethical and legal issues, whilst Volume Three is an atlas of human embryology. This practical manual is an invaluable reference for clinicians specialising in infertility management and includes more than 1300 full colour photographs, diagrams and tables to enhance understanding. Secretarial Audit and Compliance Manual, Third Edition Geared to primary care practitioners, The Washington Manual® of Outpatient Internal Medicine focuses on common ambulatory medical problems encountered in each medical subspecialty. The book has a quick-reference format similar to The Washington Manual® of Medical Therapeutics, with a standard chapter template, a bulleted style, numerous tables and figures, and a two-

color design. All chapters are written by house staff and faculty at Barnes-Jewish Hospital and Washington University School of Medicine. Coverage includes the traditional internal medicine subspecialties and other areas where problems are frequently seen in the ambulatory setting, such as dermatology, neurology, ophthalmology, otolaryngology, and psychiatry. Most subspecialties have separate symptom- and disease-based chapters. The Washington Manual® is a registered mark belonging to Washington University in St. Louis to which international legal protection applies. The mark is used in this publication by LWW under license from Washington University.

This is clinically sophisticated, easy-to-use medical software that helps counseling physicians reliably predict a subfertile couple's chances of achieving spontaneous conception or live birth with the aid of treatments using clomiphene, intrauterine insemination (IUI), IUI combined with controlled ovarian hyperstimulation (COH), in vitro fertilization (IVF), or IVF with intracytoplasmic sperm injection (IVF-ICSI). The program uses a combination of validated prognostic models and reference-based calculations to produce exceptionally reliable estimations of chances for conception, based upon simple input of a limited set of data for the couple. PROGNO is the only software program that makes these exceptionally complex calculations available for direct, easy application to clinical practice. Buyers receive a floppy disk containing the Windows®-based software, a Handbook, and a User's Manual. Examines the diagnostic role of cytogenetics in improving the outcome of assisted reproductive technologies (ART).

Covers basics of genetics, followed by investigative cytogenetics, applied cytogenetics, recent advances, preimplantation and prenatal cytogenetics. Comprehensive guide to Assisted Reproductive Technologies (ART) and embryology with step by step descriptions of different types of ART. Includes DVD. For around half of the couples who have trouble conceiving the cause of infertility is sperm-related.

Intracytoplasmic sperm injection (ICSI) is the most common and successful treatment for male infertility. Here, the pioneers for the technique, along with authorities in the field, describe the underlying science of ICSI and other micromanipulation techniques. Practical advice for performing the techniques is covered in depth, including sperm selection, laser-assisted ICSI, and the use of piezo in ICSI. Examining the safety of ICSI in animal models as well as the impact of ICSI on the health and well-being of the children conceived through the procedure is discussed. This manual is an essential resource for clinical embryologists and laboratory personnel wishing to refine or develop techniques and improve outcomes.

Manual of Assisted Reproductive Technologies and Clinical Embryology aims to discuss the relevance of science of reproductive biology in modern-day Assisted Reproductive Technologies and their practical applications. The readers can learn and master the large number of sophisticated

techniques which form the backbone of the fascinating and growing field of human assisted reproduction. The subject is vast and has been covered over 83 chapters. All the chapters are dealt by the experts of concerned fields. Principles and protocols pertaining to laboratory maintenance, culture media, cryofreezing of gametes, embryos, and genital tissues have been dealt with at length. This book is an invaluable reference book for the clinicians, reproductive biologists and embryologists.

Our knowledge of reproductive medicine has expanded rapidly since the birth of Louise Brown, the first baby to be conceived by in vitro fertilization, which was performed by Professors Patrick Steptoe and Bob Edwards in Oldham, Eng land, in 1978. Hardly a year goes by without the development of a new or a modification of an existing method of assisted reproduction. Within a relatively short period, in vitro fertilization has been introduced into the treatment of female infertility. Intracytoplasmic sperm injection has also created new opportunities for the treatment of male infertility. The first edition of this book was published in 1996. In the second edition most of the chapters have been updated and additional interest is focused on intracytoplasmic sperm injection (ICSI) in view of the risk of malformations in newborns. This manual addresses the techniques of assisted reproduction that are avail able today. Competent authors from

various centers present, in a concise way, their tried-and-tested procedures, so that the latter can be readily implemented. Due to different legal regulations, the scope of assisted reproduction is much more limited in Germany than in many other countries. For example, whereas only three embryos may be created and transferred in Germany, such restrictions do not exist in several other European countries and the United States. Furthermore, heterologous fertilization, oocyte donation, and surrogate mother hood are banned in Germany.

The success of Assisted Reproductive Technology is critically dependent upon the use of well optimized protocols, based upon sound scientific reasoning, empirical observations and evidence of clinical efficacy. Recently, the treatment of infertility has experienced a revolution, with the routine adoption of increasingly specialized molecular biological techniques and advanced methods for the manipulation of gametes and embryos. This textbook - inspired by the postgraduate degree program at the University of Oxford - guides students through the multidisciplinary syllabus essential to ART laboratory practice, from basic culture techniques and micromanipulation to laboratory management and quality assurance, and from endocrinology to molecular biology and research methods. Written for all levels of IVF practitioners, reproductive biologists and technologists

Johannes Klumpers Biotechnologies, such as genetic engineering, cloning and biodiversity, raise many legal and ethical concerns, so it is important that people understand these issues and feel able to express their opinions. This is why the European Commission has been, for a number of years, supporting actions to improve communication among scientists in these diverse areas. The project 'Women in Biotechnology' (WONBIT), financed under the 6th Framework programme of the European Commission, is an excellent example of what can be done to target opinion-formers such as scientists, economists and lawyers in bottom-up activities, and to encourage a debate on gender issues triggered by developments in the life sciences. WONBIT gave rise to a successful international conference highlighting the importance of adopting good practices and ethical considerations in parallel with the rapid pace of progress in biotechnology – from a woman's point of view. In particular, the conference addressed women in decision-making positions in biotechnology with specific reference to scientific excellence, social competencies and management qualities as well as issues relating to environment, society and the younger generation. But it did not stop there: a key part of the conference was dedicated to stimulating public debate among

non-specialists, which has led to a number of recommendations to policy-makers on better communication in biotechnology, on taking better account of the gender aspects of research, and on involving more women in the decision-making process that surrounds developments in biotechnology.

This handbook offers a thorough treatment of the science of linguistic annotation. Leaders in the field guide the reader through the process of modeling, creating an annotation language, building a corpus and evaluating it for correctness. Essential reading for both computer scientists and linguistic researchers. Linguistic annotation is an increasingly important activity in the field of computational linguistics because of its critical role in the development of language models for natural language processing applications. Part one of this book covers all phases of the linguistic annotation process, from annotation scheme design and choice of representation format through both the manual and automatic annotation process, evaluation, and iterative improvement of annotation accuracy. The second part of the book includes case studies of annotation projects across the spectrum of

linguistic annotation types, including morpho-syntactic tagging, syntactic analyses, a range of semantic analyses (semantic roles, named entities, sentiment and opinion), time and event and spatial analyses, and discourse level analyses including discourse structure, co-reference, etc. Each case study addresses the various phases and processes discussed in the chapters of part one.
