This volume explores the reception of Premchand's works and his influence in the perception of India among Western cultures, especially Russian, German, French, Spanish and English. The essays in the collection also take a critical look at multiple translations of the same work (and examine how each new translation expands the work's textuality and annexes new readership for the author) as well as representations of celluloid adaptations of Premchand's works. An important intervention in the field of translation studies, this book will interest scholars and researchers of comparative

This book responds to the call for praxis in L2 education by documenting recent and ongoing projects around the world that see partnership with classroom teachers as the essential driver for continuing to develop both classroom assessment practice and conceptual frameworks of assessment in support of teaching and

learning. Taken together, these partnerships shape the language assessment literacy, the knowledge and skills required for theorizing and conducting assessment activities, of both practitioners and researchers. While united by their orientation to praxis, the chapters offer considerable diversity with regard to languages taught, learner populations included (varying in age and proficiency level), specific innovations covered, research methods employed, and countries in which the work was conducted. As a whole, the book presents a way of engaging in research with practitioners that is likely to

Student affairs work—like higher education—is fundamentally about change. Principally, the change work performed by student affairs practitioners is about supporting the growth and development of individual students and student groups.

Increasingly, that work has called for practitioners to become more active in working to change higher education so that it lives up to its radically democratic, inclusive ideals. This means adopting new strategies to transform student affairs staff, students, and institutions, and drawing on insights from critical, liberatory theories. This text represents an effort to describe and document these practices of intentionally

centering critical theories. The first section of this text examines the ways that critically-minded practitioners lead through equitable, liberatory frameworks, offering important models for reimagining the future of higher education. In the second section, the editors take up thinking and acting to support the development of critical consciousness in students, providing examples of programs, initiatives, and student support offices that center social justice in their work, and foster a critical lens through their interactions with students. In their conclusion, the editors provide a model for critical praxis, offering enduring strategies for practitioners seeking to incorporate critical, socially just praxis into their everyday work, and defining areas for future research and praxis,
