Legal thinkers typically justify contract law on the basis of economics or promissory morality. But Peter Benson takes another approach. He argues that contract is best explained as a transfer of rights governed by a conception of justice. The result is a comprehensive theory of contract law congruent with Rawlsian liberalism.

The Principles of European Contract Law and Dutch Law:A Commentary

The Unidroit Principles of International Contracts, first published in 1994, have met with extraordinary success in the legal and business community worldwide. Prepared by a group of eminent experts from all major legal systems of the world, they provide a comprehensive set of rules for international commercial contracts. This new edition of An International Restatement of Contract Law is the first comprehensive introduction to the Unidroit Principles 2004. In addition, it provides an extensive survey and analysis of the actual use of the Unidroit Principles in practice with special emphasis on the different ways in which they have been interpreted and applied by the courts and arbitral tribunals in the hundred or so cases reported worldwide. The book also contains the full text of the Preamble and the 180 articles of the Unidroit Principles 2004 in Chinese, English, French, German, Italian and Russian as well as the 1994 edition in Spanish.

The Principles of European Contract Law, prepared by the so-called Lando Commission, today constitute the most advanced project on the harmonisation of European private law. As well as providing a set of rules which could facilitate cross-border trade within Europe, the Principles can be seen as a modern *lex mercatoria* which, for example, could be referred to by arbitrators deciding a case according to internationally accepted principles of law. Furthermore, the Principles provide a framework for EU legislation on contract law and, more importantly, they can be viewed as a first step towards a European Civil Code. They may also prove to be a catalyst for the development of national legislation, judicial decisions and legal doctrine. This new title, which follows the first volume covering Parts I and II of the Principles, includes chapters on plurality of parties, assignment of claims, transfer of contract, set-off, prescription, illegality and conditions. It provides a systematic overview of the Principles in comparison with Dutch law, which will be of interest not only in the Netherlands but also to lawyers in other countries who need to gain a clearer understanding of the Dutch contract law system.

The topic of harmonisation of European private law, and European contract law in particular, is rapidly gaining in importance. The topic is not only widely studied by academics and students all over Europe (and even beyond), it is also on the political agenda of the European Parliament, the European Commission, and the European Council. The most important achievement in this field is no doubt the Principles of European Contract Law (PECL), drafted by the Commission on European Contract Law. The European Commission considers the PECL to be a serious option for further harmonisation of European contract law within the European Union. This publication is the first to provide a systematic overview of the PECL in comparison with Dutch contract law as a whole. The book is concise and because of its structure it is easily accessible. Amongst the contributors there are many highly distinguished contract law specialists. It may be used at universities in courses on Comparative Law, European Private Law, and European Contract Law. It may also be used by international practitioners, foreign students, and academics interested in Dutch contract law who do not have access to Dutch contract law because they have no knowledge of the Dutch language. Last but not least, the book will be of interest to all jurists interested in the harmonisation of the European Private Law.

Contract Law in Scotland

In "Theologians and Contract Law," Wim Decock offers an account of the moral roots of modern contract law. He explains why theologians in the sixteenth and seventeenth centuries built a systematic contract law around the principles of freedom and fairness.

Foundational Principles of Contract Law not only sets out the principles and rules of contract law, it places more emphasis on what the principles and rules of contract law should be, based on policy, morality, and experience. A major premise of the book is that the best way to grasp contract law is to understand it from a critical perspective as an organic, dynamic subject. When contract law is approached in this way it is much easier to grasp and learn than when it is presented simply as a static collection of principles and rules. Professor Eisenberg covers almost all areas of contract law, including the enforceability of promises, remedies for breach of contract, problems of assent, form contracts, the effect of mistake and changed circumstances, interpretation, and problems of performance. Although the emphasis of the book is on the principles and rules of contract law, it also covers important theories in contract law, such as the theory of efficient breach, the theory of overreliance, the normative theory of contracts, formalism, and theories of contract interpretation.

This compact casebook is designed for one-semester contracts classes. It helps students synthesize groups of related cases by focusing attention on the principles, policies, and rules of contract law. It employs many transitions and notes written for the students, rather than excerpting works written for professors or practitioners. Questions are limited to central issues to avoid overwhelming and losing the students. This revision is a thorough makeover that brings everything up to date, and includes a variety of recent cases, dealing with issues such as electronic communications and Internet contracting, while retaining the brevity and "principles approach" of earlier editions.

From the ancient origins of Just War doctrine to contemporary theories of punishment, concepts of proportionality have long been an instrumental part of the rule of law and an essential check on government power. Two renowned legal scholars seek to advance such a theory.

This book is the product of a unique collaboration between Mainland Chinese scholars and scholars from the civil, common, and mixed jurisdiction legal traditions. It begins by placing the current Chinese contract law (CCL) in the context of an evolutionary process accelerated during China's transition to a market economy. It is structured around the core areas of contract law, anticipatory repudiation (common law) and defense of security (German law); and remedies and damages, with a focus on the availability of specific performance in Chinese law. The book also offers a useful comparison between the CCL and the UNIDROIT Principles of International Commercial Contracts, as well as the Convention on Contracts for the International Sale of Goods. The analysis in the book is undertaken at two levels - practical application of the CCL and scholarly commentary.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

In this volume, the Study Group and the Acquis Group present the first academic Draft of a Common Frame of Reference (DCFR). The Draft is based in part on a revised version of the Principles of European Contract Law (PECL) and contains Principles, Definitions and Model Rules of European Private Law in an interim outline edition. It covers the books on contracts and other juridical acts, obligations and corresponding rights, certain specific contracts, and non-contractual obligations. One purpose of the text is to provide material for a possible "political" Common Frame of Reference (CFR) which was called for by the European Commission's Action Plan on a More Coherent European Contract Law of January 2003.

To provide valuable legal service to persons in today's Europe, practitioners must be conversant in both national and transnational law. At the European level, the Principles of European Contract Law (PECL) are an increasingly important element of contract law, together with national contract law, as contained in Civil Codes and various national statute. Accordingly, Kluwer Law International has initiated a series of volumes, under the direction of prof. Hondius of the University of Utrecht, comparing PECL with the most important European legal systems. This volume on Italian law is the second in the series. Using a straightforward comparative method, the editors' analysis not only reveals a significant area of convergence between the PECL and Italian contract law, but also highlights the main differences between the two bodies of rules. The reasons for these differences, both legal and non-legal (such as historical, social, economic), are clearly set forth. The book provides complete texts, with annotations, of the PECL and the corresponding Italian rules. The presentation proceeds as follows: general provisions (scope of application, general duties, terminology) formation of contracts (general provisions, offer and acceptance, liability for negotiations) authority of agents (general provisions, direct and indirect representation) validity interpretation contents and effects performance non-performance and remedies in general particular remedies for non-performance (right to performance, withholding performance, termination of the contract, price reduction, damages and interest) The editors' commentary includes extensive reference to case law and legal doctrine at all essential points. In this way they provide a comprehensive description of the law in action as well as its evolving trends. In addition, incisive essays by two leading experts in the field of comparative law, prof. Rodolfo Sacco and prof. Michael Joachim Bonell, analyse the relationship of the PECL and Italian law and its wider framework in the harmonisation of private law at the European and international levels. The book is a valuable handbook and guide for both foreign and Italian lawyers. For non-Italian lawyers, be they practitioners or academics, it provides a concise but complete and up-to-date outline of current Italian contract law, organized on the basis of a system (PECL) with which many European lawyers are familiar. For Italian lawyers, it offers a clearer insight into a wider European legal contract system whose importance in the evolution of a common European private law is growing rapidly. In recent years there has been a revival of interest in the philosophical study of contract law. In 1981 Charles Fried claimed that contract law is based on the philosophy of promise and this has generated what is today known as 'the contract and promise debate'. Cutting to the heart of contemporary discussions, this volume brings together leading philosophers, legal theorists, and contract lawyers to debate the philosophical foundations of this area of law. Divided into two parts, the first explores general themes in the contract theory literature, including the philosophy of promising, the nature of contractual obligation, economic accounts of contract law, and the relationship between contract law and moral values such as personal autonomy and distributive justice. The second part uses these philosophical ideas to make progress in doctrinal debates, relating for example to contract interpretation, unfair terms, good faith, vitiating factors, and remedies. Together, the essays provide a picture of the current state of research in this revitalized area of law, and pave the way for future study and debate.

National legal systems have their own principles and rules on contract law. The trans-nationalization of trade and legal practice involves

acting in the context of legal diversity. This book provides an introductory overview of the main issues of contract law from a comparative perspective, focusing on the legal traditions of civil law and common law. Featuring short theoretical overviews, followed by cases selected from various jurisdictions, the book shows the concrete application of the principles and rules involved. Civil law and common law represent two different models of dealing with contract law issues. The book focuses on the French, German, and Italian experiences and on the English legal system, the latter being the main source of inspiration for other common law countries, with some significant exceptions. Topics covered include the structure of contract law and the rules about its formation and interpretation, the role of pre-contractual negotiations, the consequences of mistakes, and breach and supervening events (including the impact of the Covid-19 pandemic). Readers will learn about common problems that are faced when contracting with parties coming from different jurisdictions, whilst also acquiring a deeper understanding of the approach of their own legal system. This book will be key reading for undergraduate and postgraduate students of comparative contract law, and contract law more generally.

This text provides a comprehensive guide to the principles of European contract law. They have been drawn up by an independent body of experts from each Member State of the EU, under a project supported by the European Commission and many other organizations. The principles are stated in the form of articles, with a detailed commentary explaining the purpose and operation of each article and its relation to the remainder. Each article also has extensive comparative notes surveying the national laws and other international provisions on the topic.

Today, a California resident can incorporate her shipping business in Delaware, register her ships in Panama, hire her employees from Hong Kong, place her earnings in an asset-protection trust formed in the Cayman Islands, and enter into a same-sex marriage in Massachusetts or Canada--all the while enjoying the California sunshine and potentially avoiding many facets of the state's laws. In this book, Erin O'Hara and Larry E. Ribstein explore a new perspective on law, viewing it as a product for which people and firms can shop, regardless of geographic borders. The authors consider the structure and operation of the market this creates, the economic, legal, and political forces influencing it, and the arguments for and against a robust market for law. Through jurisdictional competition, law markets promise to improve our laws and, by establishing certainty, streamline the operation of the legal system. But the law market also limits governments' ability to enforce regulations and protect citizens from harmful activities. Given this tradeoff, O'Hara and Ribstein argue that simple contractual choice-of-law rules can help maximize the benefits of the law market while tempering its social costs. They extend their insights to a wide variety of legal problems, including corporate governance, securities, franchise, trust, property, marriage, living will, surrogacy, and general contract regulations. The Law Market is a wide-ranging and novel analysis for all lawyers, policymakers, legislators, and businesses who need to understand the changing role of law in an increasingly mobile world.

Lawyers involved in international commercial transactions know well that unforeseen events affecting the performance of a party often arise. Not surprisingly, exemptions for non-performance are dealt with in a significant number of arbitral awards. This very useful book thoroughly analyzes contemporary approaches, particularly as manifested in case law, to the scope and content of the principles of exemption for non-performance which are commonly referred to as 'force majeure' and 'hardship.' The author shows that the 'general principles of law' approach addresses this concern most effectively. Generally accepted and understood by the business world at large, this approach encompasses principles of international commercial contracts derived from a variety of legal systems. Its most important 'restatements' are found in the 1980 United Nations Convention on Contracts for the International Sale of Goods (CISG) and the UNIDROIT Principles of International Commercial Contracts (UPICC). Establishing specific standards and "case groups" for the exemptions under review, the analysis treats such recurring elements as the following: contractual risk allocations; unforeseeability of an impediment; impediments beyond the typical sphere of risk and control of the obligor; responsibility for third parties (subcontractors, suppliers); legal impediments (acts of public authority) and effect of mandatory rules; involvement of states or state enterprises; interpretation of force majeure and hardship clauses; hardship threshold test; frustration of purpose; irreconcilable differences; comparison with exemptions under domestic legal systems (impossibility of performance, frustration of contract, impracticability)

The book is a major contribution to the development of the use of general principles of law in international commercial arbitration. It may be used as a comprehensive commentary on the force majeure and hardship provisions of the UPICC, as well as on Art. 79 of the CISG. In addition, as an insightful investigation into the fundamental question of the limits of the principle of sanctity of contracts, this book is sure to capture the attention of business lawyers and interested academics everywhere. This book will provide readers with a clear understanding of the basic principles focusing on a study of the relevant case and statute law.

The law of contracts permeates most, if not all, other subjects of legal education. The third edition of Principles of Contract Law surveys the fundamental legal principles underlying the law of contracts, addressing such customary topics as contract formation, defenses and other doctrines of avoidance, breach and performance, remedies, as well as such other collateral but related topics involving third-party beneficiaries, assignments and delegations. The text addresses the traditional common law principles governing contracts, and yet is accompanied by a steadied discussion of relevant commercial law principles pertaining to the sale of goods under Article 2 of the Uniform Commercial Code. When able to do so, the authors remained loyal to their commitment to utilize time-honored, classic common law cases in their presentment of the subject matter.

While this textbook adopts a classical approach to the study of contracts, it also provides a relevant and robust experience for the aspiring law student. About the Authors: Kevin S. The Moral Transformation of the Ius Commune (ca. 1500-1650)

This book has two purposes: a theoretical purpose, to show how a complex legal institution, contract, can be traced to and is determined by a small number of basic moral principles; and a pedagogic purpose, to display for students the underlying structure of this basic legal institution. The author argues that that the promise principle - that principle by which persons can impose upon themselves obligations where none existed before - is the moral basis of contract law.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law of contracts in South Korea covers every aspect of the subject - definition and classification of contracts, contractual liability, relation to the law of property, good faith, burden of proof, defects, penalty clauses, arbitration clauses, remedies in case of non-performance, damages, power of attorney, and much more. Lawyers who handle transnational contracts will appreciate the explanation of fundamental differences in terminology, application, and procedure from one legal system to another, as well as the international aspects of contract law. Throughout the book, the treatment emphasizes drafting considerations. An introduction in which contracts are defined and contrasted to torts, quasi-contracts, and property is followed by a discussion of the concepts of 'consideration' or 'cause' and other underlying principles of the formation of contract. Subsequent chapters cover the doctrines of 'relative effect', termination of contract, and remedies for non-performance. The second part of the book, recognizing the need to categorize an agreement as a specific contract in order to determine

*the rules which apply to it, describes the nature of agency, sale, lease, building contracts, and other types of contract. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in South Korea will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative contract law. Written with the busy practitioner in mind, this concise and insightful book sets out the principles that guide the courts in interpreting contracts. Each principle is covered in its own dedicated chapter, supported by case law which illustrates how the principle works in practice and in its wider context. In addition to interpretation of contracts, the book also considers the implication of terms, rectification, and estoppel by convention. This new edition considers the implications of key decisions of the Supreme Court in *Arnold v Britton* and *Marks & Spencer v BNP Paribas*, and *BNY Mellon v LBG Capital*. Other writing, including from judges writing extra-judicially, is also analysed. This book provides an invaluable reference for lawyers drafting, interpreting and litigating on contracts.*
