Police Psychology: New Trends in Forensic Psychological Science is a relatively new specialty that can be broadly defined as the application of psychological principles and methods to assist law enforcement. This publication aims to bring together the contributions of some of the most prolific authors in the field to bridge the gap between the knowledge base of researchers, practitioners, and policymakers regarding the interface of psychological sciences and law enforcement. Explores the contribution of psychology on the way patrol officers deal with offenders with mental illness or respond and assess the risk of vulnerable victims (e.g. domestic violence, sexual assault) Contains ethically correct investigation techniques Written by the foremost authorities on the subject from around the globe

Bullock, Hadow, and Coppola have set the standard for homeland security textbooks, and they follow up best-selling third edition with this substantially improved version. As with its predecessor, the book clearly delineates the bedrock principles of preparing for, mitigating, managing, and recovering from emergencies and disasters. However, this new edition emphasizes their value with improved clarity and focus. What's more, it has been thoroughly revised to include changes that are based on transformations relevant to the political, budgetary, and legal aspects of homeland security that have changed since the 2008 Presidential election (and subsequent change in the administration). These include: new chapters on intelligence and counterterrorism, border security, transportation security, and cybersecurity; an expansion of material on the organization of the Department of Homeland Security; strategic and philosophical changes that are recommended and/or that have occurred as a result of the Quadrennial Homeland Security Review completed in 2010; updated budgetary information on both homeland security programs, and on the homeland security grants that have supported safety and security actions at the state and local levels, as well as in the private sector; and changes in the way the public perceives and receives information about security risk, including the possible elimination of the Homeland Security Advisory System. \* New chapter that focuses specifically on the border and transportation security missions \* An increased focus on cyber security and infrastructure security, both of which are rapidly growing in importance in the homeland security field among officials at all levels \* A companion website that includes a full online Instructor's Guide and PowerPoint Lecture Slides.

Imagine a company where people love coming to work and are highly productive on a daily basis. Imagine a company whose top executives, in a quest to create the most "fun" workplace ever, obliterate labor-management divisions and push decision-making responsibility down to the plant floor. Could such a company compete in today's bottom-line corporate world? Could it even turn a profit? Well, imagine no more. In *Joy at Work*, Dennis W. Bakke tells the true story of this extraordinary company--and how, as its co-founder and longtime CEO, he challenged the business establishment with revolutionary ideas that could remake America's organizations. It is the story of AES, whose business model and operating ethos -"let's have fun"-were conceived during a 90-minute car ride from Annapolis, Maryland, to Washington, D.C. In the next two decades, it became a worldwide energy giant with 40,000 employees in 31 countries and revenues of \$8.6 billion. It's a remarkable tale told by a remarkable man: Bakke, a farm boy who was shaped by his religious faith, his years at Harvard Business School, and his experience working for the Federal Energy Administration. He rejects workplace drudgery as a noxious remnant of the Industrial Revolution. He believes work should be fun, and at AES he set out to prove it could be. Bakke sought not the empty "fun" of the Friday beer blast but the joy of a workplace where every person, from custodian to CEO, has the power to use his or her God-given talents free of needless corporate bureaucracy. In *Joy at Work*, Bakke tells how he helped create a company where every decision made at the top was lamented as a lost chance to delegate responsibility--and where all employees were encouraged to take the "game-winning shot," even when it wasn't a slam-dunk. Perhaps Bakke's most radical stand was his struggle to break the stranglehold of "creating shareholder value" on the corporate mind-set and replace it with more timeless values: integrity, fairness, social responsibility, and a sense of fun.

Griffin/VanFleet, MANAGEMENT SKILLS: ASSESSMENT AND DEVELOPMENT, 1E, offers a comprehensive, real world approach to mastering the skills needed for a career in management. Because instructors often express the difficulty of creating an active learning environment, this text offers an active, not passive, way for students to learn management skills by challenging students to be self-reflective and asking them to complete numerous assessments, exercises, cases, and other activities. The authors also address another major concern instructors have about students being visual learners by providing a unique Visualize the Skill section not found in any other text. To better enable students to learn about management, chapters are organized in an easy-to-follow format that contains: Assessing Your Skills (pre-assessment scales); Learning About the Skills (concept portion of the text); Practicing Your Skills (exercises); Using Your Skills (case analysis); Extending Your Skills (group and individual exercises); Visualizing the Skills (video exercises); Your Skills Now (assessing skills after working through the chapter); and Interpretations (scoring keys and comparison data). The ninth edition of MANAGEMENT: MEETING AND EXCEEDING CUSTOMER EXPECTATIONS is a comprehensive survey of the principles and practices of management as they are currently being applied in the United States and around the world. The content and features are structured to reinforce

two continuing themes that are woven into the chapters' narratives: (1) the never-ending effort by managers and organizations to meet or exceed customers' needs and (2) the need organizations and their people have to be guided by effective leadership.
