There is a growing recognition of the increasing importance of 'local leadership' practice within multi-unit service contexts, given the threat to costly land-based retail infrastructures from smart technologies. Multi-site organizations are economically significant, but currently under-researched and poorly understood. In Effective Multi-Unit Leadership, Chris Edger looks at that key managerial cohort in the retail, hospitality and service sectors operating between the centre and unit - the Multi-Unit Leader (MUL). This district, area or regional manager, is tasked with maximising revenue and profit from a complex and ambiguous positional space, being sandwiched between the centre and unit, facing the MUL paradox: how do they motivate unit managers and team members to provide great service whilst simultaneously fulfilling the Centre's compliance agenda? Based on extensive case study research across a range of multi-unit service organisations, Edger advances an Integrated Model of MUL that elucidates how key activities (sales-led service, systems and standards - 3Ss) are driven through behavioural practices (commitment, control and change - 3Cs) underpinned by MUL personal characteristics (expertise, emotional intelligence and energy - 3Es). Central to this model is the notion of 'portfolio optimisation through social exchange' (POSE) where MULs apply 'local leadership', leveraging their portfolios through the deft application of exchange-based currencies. Replete with case studies, Effective Multi-Unit Leadership will appeal to high potential unit managers; existing multi-unit leaders who want to improve their performance levels; and retail/service directors wishing to train and coach their direct reports; as well as business educators and those with an academic interest in organisational studies.

Abstract: Private labeling of products is not new. Many large merchandisers such as Sears and A&P, have marketed products under their own labels since the 19th century. In the past decade, there has been tremendous growth of private labels in both the food and drug chains. Private labels are continually changing to meet customer demands. They give consumers a price break plus value for their money. Generics, an extension of private labels, have created shockwaves throughout the marketplace. A private label magazine, Private Label, and Private Label Manufacturers Association have elevated the private label to first-class citizenship in the marketplace. Developing a "philosophy," organizing a private label program, setting up a quality control program, packaging, pricing, and merchandising strategies, and the legal aspects of the private label are discussed. A listing of private labels by distributor; tabular data gathered in studies done by Selling-Area-Marketing, Inc., (SAMI), from the 1st Gallup study on Private Labels 1981, and the brand preferences of foodservice operators are appended. . . . for practitioners considering whether to use economists to evaluate merger proposals, this book provides a relevant insight into the types of information that would be necessary to develop even a basic simulation model, and some guidance as to circumstances where such technique may be appropriate. Vanessa Holliday, Competition and Consumer Law Journal . . . highly recommended for practitioners as well as academics interested in merger remedies. Arndt Christiansen, European Competition Law Review Headlines are made when the European Commission prohibits a merger, but this is actually very rare. Clearances subject to conditions (i.e. remedies) happen ten times as frequently, but have received far less attention in academic literature. This book provides an empirical assessment of the effectiveness of merger remedies, employing a novel simulation methodology based on formal economic theory. The authors were given unprecedented access to data available to case handlers, concerning a range of remedied mergers covering 21 markets. Using this they have adapted simple simulation techniques to appraise the competitive effects of these mergers and the impact of potential and actual remedies. Ex-ante results are then compared with ex-post impact to examine the actual effectiveness of remedies. The results provide a critique of both simple market share analysis and remedy design. This research thus contributes to economics research and practical merger policy. This rare empirical assessment of the efficacy of remedies in competition policy will be of great significance and interest to policy makers, as well as to economists, lawyers, practitioners and students in competition law.
