***The Old South Side has always welcomed ethnic groups. In the late 1800s, the area was developed by immigrant Poles, who became the dominant population for over 100 years. They celebrated their traditions, building churches, businesses, and service organizations and bringing over distinctive features from their homeland. While other Milwaukee ethnic neighborhoods gradually dissipated in the mid-20th century because of assimilation pressures, freeway building, or urban renewal programs, the Old South Side remained solidly Polish. Perhaps for this reason, the area became the destination of the fair housing marches. By the late 1960s, African Americans began demanding legislation that would allow them to live anywhere in the city, including the Old South Side. While African Americans never migrated to the area in great numbers, other populations did. A survey nearly a half century later revealed that people of 110 national backgrounds now lived on the Old South Side, with the three largest groups being Mexicans, Poles, and American Indians. Today, the neighborhood faith communities, businesses, sports, and celebrations strongly reflect the influence of these three communities.***

*From bestselling writer David Graeber—"a master of opening up thought and stimulating debate" (Slate)—a powerful argument against the rise of meaningless, unfulfilling jobs...and their consequences. Does your job make a meaningful contribution to the world? In the spring of 2013, David Graeber asked this question in a playful, provocative essay titled "On the Phenomenon of Bullshit Jobs." It went viral. After one million online views in seventeen different languages, people all over the world are still debating the answer. There are hordes of people—HR consultants, communication coordinators, telemarketing researchers, corporate lawyers—whose jobs are useless, and, tragically, they know it. These people are caught in bullshit jobs. Graeber explores one of society's most vexing and deeply felt concerns, indicting among other villains a particular strain of finance capitalism that betrays ideals shared by thinkers ranging from Keynes to Lincoln. "Clever and charismatic" (The New Yorker), Bullshit Jobs gives individuals, corporations, and societies permission to undergo a shift in values, placing creative and caring work at the center of our culture. This book is for everyone who wants to turn their vocation back into an avocation and "a thought-provoking examination of our working lives" (Financial Times).*

Arbor Age

The assault on North Africa on 8 November 1942 led to a bitter conflict that finally culminated in the defeat of the Axis forces in Tunisia seven months later. The campaign was, for the U.S. Army, a school in coalition warfare and an introduction to enemy tactics.
