Communication is one of life's most fundamental joys, yet one often taken for granted until it is lost or fails to develop. Yet for millions of children each year, the skills that encompass communication stall or do not emerge at all. Even a mild disorder or temporary interruption in long-term effects and result in serious and far-reaching deficits that touch every aspect of a child's life. Each year, millions of children and their families join the ranks of those who are navigating a life they never expected, and frequently feel they are unable to take on. While it child's deficits with supports and specific interventions, it is equally important to directly address the impact on the family, from the marital relationship to the well-being of siblings. With a warm and compassionate approach, Suzanne Ducharme provides parents with comprehensive speech and language development and the intervention process, but also delves deeply into the fears, concerns, and questions that every parent faces when something goes wrong. She provides families with information and resources, but also support and perspective. Using real-life examples, Suzanne Ducharme is able to illustrate the range of difficulties, challenges, and triumphs of families who love and support children with speech and language issues.

Here's How to Do Accent Modification: A Manual for Speech-Language Pathologists is designed for speech-language pathologists (SLPs) working with clients on accent modification in American English. A growing number of non-native speakers are interested in improving their communication skills and SLPs need preparation to work with this clientele. The text provides copious advice and many diverse techniques for teaching accent modification, from the level of basic sounds to the level of discourse. The text emphasizes realistic goal setting, so that clients focus on becoming effective communicators as opposed to sounding exactly like native speakers. The objective is a balance between clear and natural speech. Many SLPs favor intelligibility over naturalness because of their backgrounds working with speech delayed children, but with non-native speakers this often leads to unnatural speech and listeners focus on how something is said as opposed to what is said. Here's How to Do Accent Modification is uniquely geared toward the skills and backgrounds of SLPs working with clients in a one-on-one setting, but is also an excellent introductory text for any English as a Second Language (ESL) teacher. Robert McKinney brings this unique perspective as a speech-language pathologist with degrees in both Communication Disorders and Teaching English as a Second Language. Also included with the text are numerous practical activities and worksheets for working with clients. The ebook includes audio files and video clips to demonstrate working with non-native speakers.
