Etienne Balibar, one of the foremost living French philosophers, builds on his landmark work 'Spinoza and Politics' with this exploration of Spinoza's ontology. Balibar situates Spinoza in relation to the major figures of Marx and Freud as a precursor to the more recent French thinker Gilbert Simondon's concept of the transindividual.

competence, namely, our ability to apply words to the world. This monograph proposes a dual picture of human lexical competence in which inferential and referential abilities are separate--a proposal confirmed by neuropsychological research on brain-damaged persons. According to the author, artificial systems for natural-language understanding could come much closer to achieving their goal if they conformed to this dual picture of competence. Georges Bataille (1897-1962) was an essayist, poet, novelist and philosopher of excess. His philosophy emerges from the aesthetic avant-garde of the 1920s and 30s, when he was associated with the surrealist movement, and has since been explored by the major figures of poststructuralism and postmodernism. His classic works include *The Story of the Eye* and *The Accursed Share*. *On Nietzsche* takes up Nietzschean thought where Nietzsche left off - with the Death of God. God and Golem, Inc., which won the National Book Award in 1964, Norbert Wiener was no ordinary mathematician. With the ability to understand how things worked or might work at a very deep level, he linked his own mathematics to engineering and provided basic ideas for the design of all sorts of inventions, from radar to communications networks to computers to artificial limbs. Wiener had an abiding concern about the ethics guiding applications of theories he and other scientists

developed. Years after he died, the manuscript for this book was discovered among his papers. The world of science has changed greatly since Wiener's day, and much of the change has been in the direction he warned against. Now published for the first time, this book can be read as a salutary corrective from the past and a chance to rethink the components of an environment that encourages inventiveness. Wiener provides an engagingly written

insider's understanding of the history of discovery and invention, emphasizing the historical circumstances that foster innovations and allow their application. His message is that truly original ideas cannot be produced on an assembly line, and that their consequences are often felt only at distant times and places. The intellectual and technological environment has to be right before the idea can blossom. The best course for society is to encourage the best minds

to pursue the most interesting topics, and to reward them for the insights they produce. Wiener's comments on the problem of secrecy and the importance of the "freelance" scientist are particularly pertinent today. Steve Heims provides a brief history of Wiener's literary output and reviews his contributions to the field of invention and discovery. In addition, Heims suggests significant ways in which Wiener's ideas still apply to dilemmas facing the

It was wonderful to watch the few lights still lit in the skyscrapers that lit up like stars on a Manhattan night. Who knows how many times James had stopped to contemplate them, but that night, for a strange reason he was reliving the same emotion as when he first arrived in New York many years before. This unexpected feeling made him melancholic and he was reminded of his entire past, retracing like a flash back the road that had brought him there and this moved him. A good book in my opinion, should be read as you smoke a good cigar enjoying the intense aroma that

sticks in your mouth, before blowing out the smoke. This book is about a journey, a long journey, the longest a man can make... the one within himself. It is the only trip that knows no boundaries, the only one that does not need a boarding pass, the only one able to make us go back in time, to meet lost people again, desired faces and faces that we would rather forget. A journey in which you go in the spasmodic search of yourself, searching for something that will never turn into certainty. "How are we really made?" "Why are we here?" "Why do certain circumstances happen?" To these questions James drew his personal conclusion: that we are part of someone's project,

because by analyzing the processes of their lives, everyone can understand, even if not immediately, that everything eventually happens for a precise purpose. In life you have to do things before to understand others later, and if you didn't do the previous ones that seemed wrong you wouldn't be able to understand what you understood afterwards. Everything is a cycle that ends until you get to the final conclusion, until you understand why you came into the world, until you reach your true goal. Each of us has a very specific purpose here, each one of us is like a piece of a puzzle, we are all intersected with each other, we are all interconnected, I am useful to

you, you are useful to me, even if we do not know how or why.

□The pieces collected together in this book were written by Sri Aurobindo between 1910 and 1940. None of them were published during his lifetime; none received the final revision he gave to his major works. Most of the pieces were first printed in various journals published by the Ashram, and subsequently in the different editions of *The Hour of God*, beginning with the first edition (1959).□ In reading these essays, one gets the very distinct feeling that the author really does know whereof he speaks. Here, we are able to sit in his lap and listen as he fabricates one description after

another of the ineffable and explains how we too can share in the realization awaiting us at the end of what seems, in the clarity of his vision, to be not such an arduous path. It is not that he ever says that the way is easy, quite the contrary; but the certainty with which he speaks seems to put it into reach.

Riveting, obsessive, impassioned, and scandalous, here is a major biography of one of the great Renaissance men of the 20th century. Pier Paolo Pasolini was uncompromising, homosexual, anti-Fascist, anti-Communist, anti-clerical, even as he yielded to his callings as world-renowned novelist (*A Violent Life*, *The Ragazzi*), poet,
