In this collage of poems, 16-year-old student Jo Russo touches on many different topics and struggles he has been dealing with for the past year.

Powerful, affecting essays on mental illness, winner of the Graywolf Press Nonfiction Prize and a Whiting Award An intimate, moving book written with the immediacy and directness of one who still struggles with the effects of mental and chronic illness, *The Collected Schizophrenias* cuts right to the core.

Schizophrenia is not a single unifying diagnosis, and Esmé Weijun Wang writes not just to her fellow members of the "collected schizophrenias" but to those who wish to understand it as well. Opening with the journey toward her diagnosis of schizoaffective disorder, Wang discusses the medical community's own

disagreement about labels and procedures for diagnosing those with mental illness, and then follows an arc that examines the manifestations of schizophrenia in her life. In essays that range from using fashion to present as high-functioning to the depths of a rare form of psychosis, and from the failures of the higher education system and the dangers of institutionalization to the complexity of compounding factors such as PTSD and Lyme disease, Wang's analytical eye, honed as a former lab researcher at Stanford, allows her to balance research with personal narrative. An essay collection of undeniable power, *The Collected Schizophrenias* dispels misconceptions and provides insight into a condition long misunderstood.

Mark and Giulia's life together began as a storybook romance. They fell in love at eighteen, married at twenty-four, and were living their dream life in San Francisco. When Giulia was twenty-seven, she suffered a terrifying and unexpected psychotic break that landed her in the psych ward for nearly a month. One day she was vibrant and well-adjusted; the next she was delusional and suicidal, convinced that she was the devil and that her loved ones were not safe. All she wanted was to die. Eventually, Giulia fully recovered, and the couple had a son. But, soon after Jonas was born, Giulia had another breakdown, and then a third a few years after that. pushed to the edge of the abyss, everything the couple had once taken for granted was upended. A story of the fragility of the mind, and the tenacity of the human spirit, *My Lovely Wife* is, above all, a love story that raises profound questions: How do we care for the people we love? What and who do we live for? Breathtaking in its candor, radiant with compassion, and written with dazzling lyricism, Lukach's is an intensely personal odyssey through the harrowing years of his wife's mental illness, anchored by an abiding devotion to family that will affirm readers' faith in the power of love. This book was written for people with an interest in psychiatry. This tells how people with a psychiatric illness can be misunderstood. How psychiatry has advanced from thirty years ago. Due to patient's privacy, no names or correct initials were used. It is important to understand that mental illness is a reality. Most people don't think about someone with a mental illness, until they read the news and someone has been shot. If people would seek help before their anger gets out of hand, they could get help. It is important to realize if a family member is abusive. There are things you can do. Leave before it is too late. There are shelters for men and women who are victims of abuse. If you know of someone in danger contact your local police agency.

• **Applicable not just to those with mental health issues, but for**

churches and the church at large Christ on the Psych Ward is a series of reflections on the intersections among mental health, faith, and ministry. Beginning with his own experience, Finnegan- Hosey shares ways communities of faith can be present with those suffering from mental illness and crises. Weaving together personal testimony, theological reflection, and practical ministry experience, he offers a message of hope for those suffering and for friends and faith communities struggling to care for them. Ultimately, his journey of recovery and healing reveals the need for a theological understanding of a vulnerable God, important not solely for ministry with those with mental health struggles, but offering a hopeful vision forward for the church.

An extraordinary portrait of a brilliant mind on the brink: A new edition of the 1974 memoir by the author of the acclaimed collection *Calm Sea and Prosperous Voyage*. With an introduction by Yiyun Li. Have you ever wondered what it was really like as a patient or staff at a psychiatric hospital? These pages take you behind the scenes of mental health care professionals and the everyday lives of caring for mental health patients. It is a memoir of my most impactful experiences including a forensic patient whose circumstance is a direct result of her environment to a geriatric patient always looking for an adventure. As stigma continues to plague the mental health profession, *Psych Ward Shenanigans* promotes purpose, compassion, and leadership at the expense of my bizarre and unique experiences. Have a laugh with me, have a cry with me. Relate with me and find empathy.

"A haunting and harrowing indictment . . . [a] significant achievement." -The New York Times Book Review L.A. Times Book Prize Finalist * New York Times Book Review Paperback Row * Time Best New Books July 2020 *Waiting for an Echo* is a riveting, rarely seen glimpse into American jails and prisons. It is also a damning account of policies that have criminalized mental illness, shifting large numbers of people who belong in therapeutic settings into punitive ones. Dr. Christine Montross has spent her career treating the most severely ill psychiatric patients. This expertise—the mind in crisis—has enabled her to reckon with the human stories behind mass incarceration. A father attempting to weigh the impossible calculus of a plea bargain. A bright young woman whose life is derailed by addiction. Boys in a juvenile detention facility who, desperate for human connection, invent a way to communicate with one another from cell to cell. Overextended doctors and correctional officers who strive to provide care and security in environments riddled with danger. Our methods of incarceration take away not only freedom but also selfhood and soundness of mind. In a nation where 95 percent of all inmates are released from prison and return to our communities, this is a practice that punishes us all.

The Madness of American Incarceration

NATIONAL BESTSELLER • In 1967, after a session with a psychiatrist she'd never seen before, eighteen-year-old Susanna Kaysen was put in a taxi and sent to McLean Hospital. Her memoir of the next two years is a "poignant, honest ... triumphantly funny ... and heartbreaking story" (The New York Times Book Review). The ward for teenage girls in the McLean psychiatric hospital was as renowned for its famous clientele—Sylvia Plath, Robert Lowell, James Taylor, and Ray Charles—as for its progressive methods of treating those who could afford its sanctuary. Kaysen's memoir encompasses horror and razor-edged perception while providing vivid portraits of her fellow patients and their keepers. It is a brilliant evocation of a "parallel universe" set within the kaleidoscopically shifting landscape of the late sixties. *Girl, Interrupted* is a clear-sighted, unflinching document that gives lasting and specific dimension to our definitions of sane and insane, mental illness and recovery.

A psychiatrist chronicles his rookie year working with serial killers and mass murderers at California's Gorman State hospital for the criminally insane, which was punctuated by moments of extreme violence. 35,000 first printing.

It's New Year's Eve, the holiday of forced fellowship, mandatory fun, and paper hats. While dining out with her husband and their friends, an acerbic, mordantly witty, and clinically depressed writer fully unravels. Her breakdown lands her in the psych ward of a prestigious New York hospital where she refuses treatment. Instead she passes the time chronicling the lives of her fellow "lunatics" and writing a novel about how she got to this place. -- adapted from jacket

'My first serious blackout marked the line between sanity and insanity. Though I would have moments of lucidity over the coming days and weeks, I would never again be the same person ...' Susannah Cahalan was a happy, clever, healthy twenty-four-year old. Then one day she woke up in hospital, with no memory of what had happened or how she had got there. Within weeks, she would be transformed into someone unrecognizable, descending into a state of acute psychosis, undergoing rages and convulsions, hallucinating that her father had murdered his wife; that she could control time with her mind. Everything she had taken for granted about her life, and who she was, was wiped out. *Brain on Fire* is Susannah's story of her terrifying descent into madness and the desperate hunt for a diagnosis, as, after dozens of tests and scans, baffled doctors concluded she should be confined in a psychiatric ward. It is also the story of how one brilliant man, Syria-born Dr Najjar, finally proved - using a simple pen and paper - that Susannah's psychotic behaviour was caused by a rare autoimmune disease attacking her brain. His diagnosis of this little-known condition, thought to have been the real cause of devil-possessions through history, saved her life, and possibly the lives of many others. Cahalan takes readers inside this newly-discovered disease through the progress of her own harrowing journey, piecing it together using memories, journals, hospital videos and records. Written with passionate honesty and intelligence, *Brain on Fire* is a searingly personal yet universal book, which asks what happens when your identity is suddenly destroyed, and how you get it back. 'With eagle-eye precision and brutal honesty, Susannah Cahalan turns her journalistic gaze on herself as she bravely looks back on one of the most harrowing and unimaginable experiences one could ever face: the loss of mind, body and self. *Brain on Fire* is a mesmerizing story' -Mira Bartók, New York Times bestselling author of *The Memory Palace* Susannah Cahalan is a reporter on the New York Post, and the recipient of the 2010 Silurian Award of Excellence in Journalism for Feature Writing. Her writing has also appeared in the New York Times, and is frequently picked up by the Daily Mail, Gawker, Gothamist, AOL and Yahoo among other news aggregator sites.

An extraordinary account of a nurse's life behind the locked doors of a secure psychiatric ward. Dennis O'Donnell started work as an orderly in the Intensive Psychiatric Care Unit of a large hospital in Scotland in 2000. In his daily life he encountered fear, violence and despair but also a considerable amount of care and compassion. Recounting the stories of the patients he worked with, and those of his colleagues on the ward, here he examines major mental health conditions, methods of treatment - medication, how religion, sex, wealth, health and drugs can bear influence on mental health, the prevailing attitudes to psychiatric illness, the authorities, the professionals & society. What emerges is a document of humanity and humour, a remarkable memoir that sheds light on a world that still remains largely unknown. 'This is a superb study of people whose minds have gone wrong, and the art of caring for them' Evening Standard

This is a strange book. Make no bones about it, it's weird. What can you do? I suppose you don't have to read it. But then what would be the point of all the words sitting there if you don't even bother to read them eh? I don't know, what are you like? Thinking of jumping ship already? Lightweight. Okay. So...this book is weird, it's strange but, hopefully, it's fun! Good! Let it be so! Okie dokie then. That'll do for a prologue won't it? I don't know, do I have to say anything else? What goes into a prologue then? It's sort of the stuff before the main stuff isn't it? Um, well, er, I can't be arsed! Oh yeah...um...no... I forgot. Oh well, without further ado... hold on, I've just thought of something, yeah... SO you lot are lucky in a way, because I've read this book looooooads of times and the words by this point have kind of lost all meaning - but for you they probably still have that "new book" feeling to them. Good for you!

A Memoir of Madness and Hope

Rain is an artist who likes to paint, draw and write what God speaks to her on a daily basis. She is in community college majoring in art studies. She is trying to cope with the loss of her maternal grandparents when she also experiences a sexual assault. After these two traumatic life occurrences, she decides to commit herself into a psychiatric ward. In the ward, she meets a guy named Chase. Chase is a goth who also expresses himself through art. He is dealing with some issues of his own. But when he meets Rain, he reluctantly befriends her. She challenges his own thinking on being able to forgive as she is also working to forgive. Can they both heal from what has happened to them? Can the artistic bond they both share aid in the healing process? Can forgiveness truly cover the hurts and mistakes of the past?

From the Executive Director of Mental Health for Correctional Services in New York City, comes a revelatory and deeply compassionate memoir that takes readers inside Bellevue, and brings to life the world—the system, the staff, and the haunting cases—that shaped one young psychiatrist as she learned how to doctor and how to love. Elizabeth Ford went through medical school unsure of where she belonged. It wasn't until she did her psychiatry rotation that she found her calling—to care for one of the most vulnerable populations of mentally ill people, the inmates of New York's jails, including Rikers Island, who are so sick that they are sent to the Bellevue Hospital Prison Ward for

care. These men were broken, unloved, without resources or support, and very ill. They could be violent, unpredictable, but they could also be funny and tender and needy. Mostly, they were human and they awakened in Ford a boundless compassion. Her patients made her a great doctor and a better person and, as she treated these men, she learned about doctoring, about nurturing, about parenting, and about love. While Ford was a psychiatrist at Bellevue she becomes a wife and a mother. In her book she shares her struggles to balance her life and her work, to care for her children and her patients, and to maintain the empathy that is essential to her practice—all in the face of a jaded institution, an exhausting workload, and the deeply emotionally taxing nature of her work. Ford brings humor, grace, and humanity to the lives of the patients in her care and in beautifully rendered prose illuminates the inner workings (and failings) of our mental health system, our justice system, and the prison system.

How does a woman who had a "normal" middle-class upbringing in a Catholic home end up incarcerated twice and admitted into the psychiatric ward of the hospital for observation? Where did things turn and how did she fight to re-gain her life? Follow her journey through her relationships, including the most tumultuous, controlling, abusive one, that shaped her into the warrior-God following-advocate she is striving to be today. What happens when your first memories of life and conscious awareness centered around death and mental illness? You end up with a mental illness or illnesses. This book is an autobiography/documentary about Peter Vox, a retired school teacher and professional musician from Long Island, NY who has spent his life battling anxiety, depression and existential sadness. This book chronicles Peter's childhood, the origins of his mental illnesses, history with medications, decades spent in therapy, marriage, careers, journals written from psychiatric hospitals and theories on how to handle your own mental illness. Furthermore, it's also a book about learning from past mistakes, accepting your flaws, focusing on your positive attributes, accepting help from others and realizing that there are opportunities to start over in life if you are open minded and willing to make small changes. Along with chronicles of Peter's struggles are highly amusing anecdotes about Peter's life that show the happy go lucky person that lives somewhere in all of us.
