Do you know what Dark Psychology is? Do you want to know how to persuade people? How to manipulate your mind and others with NLP People are often a product of their environment, whether they want to be or not. The way people are raised directly affects the way they act in later life. Someone who is raised by alcoholics has a greater chance of becoming alcoholics in adult life, or they may choose never to drink at all. People who are raised in a house where everything is forbidden may cut loose and go a bit crazy when they are finally out on their own. People who are raised in total disorganization may grow up to be totally obsessive about household cleanliness. Nurture affects people in other, less severe ways, too. Many people believe that Mom's meatloaf is the absolute best and no other recipe exists. People come from different religious and economic backgrounds. People have different beliefs about what is good and bad, what is acceptable and unacceptable. The problem comes when two people are trying to have a relationship, but neither wants to change their way of thinking. When that happens there is no relationship. There are just two people living together under the same roof. Using mind control with NLP for your love and your relationships Achieving success in love is just like achieving success in anything else. It is mostly a function of developing good relationships with other people in order to be better able to influence them. Those people who are successful in creating and keeping good, mutually satisfactory relationships with others usually enjoy much more success than people who do not do this. The ability to grow and maintain satisfactory relationships is a trait that is easier for some people. But even if the ability does not come naturally it is easy enough to learn. And Neuro-Linguistic Programming (NLP) makes this skill easier to learn by offering tools and ideas to enable almost anyone to learn the ability to develop great relationships. People never stop communicating with each other. Any type of social contact is done with some form of communication. Even if there is no actual speaking, there is communicating. If a couple has an argument and stops talking to one another, they are now using frustration and anger to communicate in silence. Teenagers who close themselves off in their rooms and refuse to speak to the remainder of the family are silently communicating their desire to be left alone. Even in situations that are more neutral people continue to communicate with looks, sighs, and body language. Becoming more aware of this will bring a hugely different perspective on personal relationships. A great deal of the actual communication between two people is unconscious and not verbal. Do we have your attention now? In this book we will discuss the following topics: Dark Personality How NLP Works Practical Use of NLP NLP Techniques What Is Persuasion And Much More! Are you excited? This text presents a new approach to the use of hypnotic suggestion. For years, hypnotherapists have used scripts which are aimed at a particular problem, like smoking or weight loss, rather than aiming at the client who smokes or has weight issues. Trevor Silvester suggests that it is not the problem that is the problem; it's the client's unique relationship with the problem that's the problem. The book aims to free you from the constraints of scripts and enable you to use your creative skill to weave subtle spells that empower your clients by changing their model of reality. It presents the science behind suggestion, and the means of using that science to create magical ways of influencing others.
