Leverage digital technologies to achieve competitive advantage through market-leading processes, products and services, customer relationships, and innovation How does Information Technology enable competitive advantage? Digital Disciplines details four strategies that exploit today's digital technologies to create unparalleled customer value. Using non-technical language, this book describes the blueprints that any company, large or small, can use to gain or retain market leadership, based on insights derived from examining modern digital giants such as Amazon, Netflix, and Uber, established firms such as Burberry, GE, Nike, and Procter & Gamble, and lesser-known innovators such as Alvio, Fruition Sciences, Opower, and Quirky. Companies can develop a competitive edge through four digital disciplines—information excellence, solution leadership, collective intimacy, and accelerated innovation—that exploit cloud computing, big data and analytics, mobile and wireline networks, social media, and the Internet of Things. These four disciplines extend and update the value disciplines of operational excellence, product leadership, and customer intimacy originally defined by Michael Treacy and Fred Wiersema in their bestselling business classic *The Discipline of Market Leaders*. Operational excellence must now be complemented by information excellence—leveraging automation, information, analytics, and sophisticated algorithms to make processes faster, better, and more cost-effective, seamlessly fuse digital and physical worlds, and generate new revenue through techniques such as exhaust data monetization Product leadership must be extended to solution leadership—smart digital products and services ranging from wind turbines and wearables to connected healthcare, linked to each other, cloud services, social networks, and partner ecosystems, focused on customer outcomes and creating experiences and transformations Customer intimacy is evolving to collective intimacy—as face-to-face relationships not only go online, but are collectively analyzed to provide individually targeted recommendations and personalized services ranging from books and movies to patient-specific therapies Traditional innovation is no longer enough—accelerated innovation goes beyond open innovation to exploit crowdsourcing, idea markets, innovation networks, challenges, and contest economics to dramatically improve processes, products, and relationships This book provides a strategy framework, empirical data, case studies, deep insights, and pragmatic steps for any enterprise to follow and attain market leadership in today's digital era. It addresses improved execution through techniques such as gamification, and pitfalls to beware, including cybersecurity, privacy, and unintended consequences. Digital Disciplines can be exploited by existing firms or start-ups to disrupt established ways of doing business through innovative, digitally enabled value propositions to win in competitive markets in today's digital era.

A new book by the author of *A is for Activist* is a rhyming, boldly illustrated vision of a better world. When you go

to a march And raise your sign high You'll make people smile who thought you were shy And you'll make people wonder, does that kid really know why? You DO know of course That's why you are there You're there to say STOP! What's happening's not fair Then they say, we know what you're against End poverty stop war... But okay then what are you for? Oh! What are we for! That's my favorite question And I'm sure it's yours too Because you pay attention You have so many answers And so many options And so many solutions that you want to impart The only hard question is where does one start? Oh, The Things We're For! is a celebration of the better world that is not only possible, but is here today if we choose it. Today's kids are well aware of the many challenges that they face in a world they are inheriting, from climate change to police violence, crowded classrooms to healthcare. Poetically written and beautifully illustrated in Innosanto Nagara's (A is for Activist) signature style, this book offers a vision of where we could go--and a future worth fighting for. Oh, the Things We're For! is a book for kids, and for the young at heart of all ages.

Branded as rebels and traitors, the members of the Alliance worked from the shadows, gathering information and support from across the galaxy to bring an end to the Empire's tyranny. This information has been kept hidden until now. Discovered in the ruins of an abandoned rebel base, these files have been passed among members of the Resistance, who have added notes, updates, and new insights to the documents. A repository of Alliance intelligence, The Rebel Files weaves together classified documents, intercepted transmissions, and gathered communications to trace the formation of the Rebel Alliance. Unlock the secrets of the Rebel Alliance!

A journey through the otherworldly science behind Christopher Nolan's award-winning film, Interstellar, from executive producer and Nobel Prize-winning physicist Kip Thorne. Interstellar, from acclaimed filmmaker Christopher Nolan, takes us on a fantastic voyage far beyond our solar system. Yet in The Science of Interstellar, Kip Thorne, the Nobel prize-winning physicist who assisted Nolan on the scientific aspects of Interstellar, shows us that the movie's jaw-dropping events and stunning, never-before-attempted visuals are grounded in real science. Thorne shares his experiences working as the science adviser on the film and then moves on to the science itself. In chapters on wormholes, black holes, interstellar travel, and much more, Thorne's scientific insights—many of them triggered during the actual scripting and shooting of Interstellar—describe the physical laws that govern our universe and the truly astounding phenomena that those laws make possible. While living in Tudor England wasn't a picnic for many people, the unluckiest were at the top of the social ladder—queens. Henry VIII was one of the Tudor kings and he famously divorced and killed many of his queens in his quest for a male heir. That's not all that happened during the Tudors' reign! Readers learn about the place of rebellions, the plague, and even the use of leeches in the history of England. A colorful layout, playful tone, and relatable content keep readers engaged with a distinctive historic era.

10TH ANNIVERSARY EDITION Is the financial plan of mediocrity -- a dream-stealing, soul-sucking dogma known as "The Slowlane" your plan for creating wealth? You know how it goes; it sounds a lil something like this: "Go to school, get a good job, save 10% of your paycheck, buy a used car, cancel the movie channels, quit drinking expensive Starbucks mocha lattes, save and penny-pinch your life away, trust your life-savings to the stock market, and one day, when you are oh, say, 65 years old, you can retire rich." The mainstream financial gurus have sold you blindly down the river to a great financial gamble: You've been hoodwinked to believe that wealth can be created by recklessly trusting in the uncontrollable and unpredictable markets: the housing market, the stock market, and the job market. This impotent financial gamble dubiously promises wealth in a wheelchair -- sacrifice your adult life for a financial plan that reaps dividends in the twilight of life. Accept the Slowlane as your blueprint for

wealth and your financial future will blow carelessly asunder on a sailboat of HOPE: HOPE you can find a job and keep it, HOPE the stock market doesn't tank, HOPE the economy rebounds, HOPE, HOPE, and HOPE. Do you really want HOPE to be the centerpiece for your family's financial plan? Drive the Slowlane road and you will find your life deteriorate into a miserable exhibition about what you cannot do, versus what you can. For those who don't want a lifetime subscription to "settle-for-less" and a slight chance of elderly riches, there is an alternative; an expressway to extraordinary wealth that can burn a trail to financial independence faster than any road out there. Why jobs, 401(k)s, mutual funds, and 40-years of mindless frugality will never make you rich young. Why most entrepreneurs fail and how to immediately put the odds in your favor. The real law of wealth: Leverage this and wealth has no choice but to be magnetized to you. The leading cause of poorness: Change this and you change everything. How the rich really get rich - and no, it has nothing to do with a paycheck or a 401K match. Why the guru's grand deity - compound interest - is an impotent wealth accelerator. Why the guru myth of "do what you love" will most likely keep you poor, not rich. And 250+ more poverty busting distinctions... Demand the Fastlane, an alternative road-to-wealth; one that actually ignites dreams and creates millionaires young, not old. Change lanes and find your explosive wealth accelerator. Hit the Fastlane, crack the code to wealth, and find out how to live rich for a lifetime.

A morbidly fascinating and articulate collection of essays, this book explores the grim underside of America's cult of the automobile and the disturbing, frequently conspiratorial, speculations that arise whenever the car becomes the cause or the site of human death. Through analysis of fatal celebrity car accidents and other examples of death by automobile, as well as through personal memoir and forensic reports, cultural critics ponder our very human fascination with the car crash. Topics include the roles and experiences of passengers and bystanders, car crash conspiracy theories, the automobile as a site

of murder, studies of car crash cinema, and psychological interpretations of the notion of the 'accident.' The book features original essays by such underground icons as Kenneth Anger and Adam Parfrey.

Digging Up Armageddon

"In 1925 a team of archaeologists was sent by famed archaeologist James Henry Breasted, the Director of the Oriental Institute at the University of Chicago, to search for the city that King Solomon built in the tenth century BCE. These excavations are rightfully famous for the light they shed on one of the most important cities in biblical times: the ancient city of Megiddo, in Israel, the site of the biblical Armageddon. The books and articles that the original participants published are still used, and debated, by archaeologists working in the region today. However, these scholarly publications provide only a small window into the daily activities of the team members and the stories behind their amazing discoveries. Using a treasure trove of other writing - including more than three decades' worth of letters, cablegrams, cards, and diaries, archaeologist and historian Eric Cline, who spent twenty years digging at Megiddo himself, brings the Chicago excavators and their discoveries to life situating them against the backdrop of the Great Depression in the United States as well as the growing troubles and tensions in British Mandate Palestine. Their story, as recounted by Cline, often reads more like melodrama than dry archaeological report and provides a unique glimpse of the internal workings of a dig in the early years of biblical archaeology. In the course of telling their story, Cline gives readers the full picture of an archaeological site from its first discoveries to its most recent excavations placing it all in the larger scheme of the rise and fall of civilizations, from the Neolithic Revolution through the Romans"--

"Written specifically for Edexcel's new IGCSE Physics (from 2009) qualification in a clear and engaging style that students will find easy to understand. This book includes a wide range of activities and exercises for self-study, as well as examination style questions and summaries to aid revision."--Publisher's description.

The classic work on the music of Afrofuturism, from jazz to jungle More Brilliant than the Sun: Adventures in Sonic Fiction is one of the most extraordinary books on music ever written. Part manifesto for a militant posthumanism, part journey through the unacknowledged traditions of diasporic science fiction, this book finds the future shock in Afrofuturist sounds from jazz, dub and techno to funk, hip hop and jungle. By exploring the music of such musical luminaries as Sun Ra, Alice Coltrane, Lee Perry, Dr Octagon, Parliament and Underground Resistance, theorist and artist Kodwo Eshun mobilises their concepts in order to open the possibilities of sonic fiction: the hitherto unexplored intersections between science fiction and organised sound. Situated between

electronic music history, media theory, science fiction and Afrodiasporic studies, *More Brilliant than the Sun* is one of the key works to stake a claim for the generative possibilities of Afrofuturism. Much referenced since its original publication in 1998, but long unavailable, this new edition includes an introduction by Kodwo Eshun as well as texts by filmmaker John Akomfrah and producer Steve Goodman aka kode9.

294 pages, 130 black & white illustrations, size 5.5 x 8.5 inches. In 1963, Temple Press UK published a revised and expanded 4th UK edition of 'Tuning for Speed' and, in 1965, they published a reprint of that 1963 edition. Both the 1963 and the 1965 publications are identical in content and contain 294 pages, a significant increase from the previous 208 page 1960 printing. With a total of 294 pages, the revised and expanded 4th UK edition is the most comprehensive of all of the 'Tuning for Speed' editions ever published. Earlier editions only stretched to 208 pages and later editions shrunk to 260 pages (or less) as what was thought to be 'dated information' was deleted from the contents. This 'dated information' is considered valuable today by those enthusiasts interested in vintage motorcycle tuning and modification. Consequently, this makes the revised 4th UK publication the most complete and desirable edition. Therefore, it is our pleasure to offer this reprint of the Floyd Clymer 'Revised 4th UK Edition or Second American Edition of 'Tuning for Speed' to motorcycle enthusiasts worldwide. 'Tuning for Speed' was originally published in 1948 and continuously reprinted and updated in order to keep pace with the constantly evolving range of British motorcycles and engines. While the primary focus of this publication is on 1965 and prior British motorcycles, the theory and engineering it contains is still applicable to the current crop of high revving imports. 'Tuning for Speed' is considered by many knowledgeable motorcycle enthusiasts to be one of the best books ever written on how to improve, modify and fine tune a motorcycle engine and it is often referred to as one of the 'top 10' classic motorcycle books. The Floyd Clymer association with this publication dates back to the early 1960's when he purchased the United States Publishing rights for 'Tuning for Speed' from Temple Press in the UK and, in 1967, Clymer published the 1st American edition of that title. However, by 1967, the Clymer publication had been preceded by 8 printings of

the UK edition and was incorrectly identified by Clymer as a 9th edition. In fact, the 1967 Clymer publication is actually a reprint of the less desirable 208 page 1960 UK edition. However, in 1963, the 4th UK edition was revised and expanded to 294 pages (with a second identical re-print in 1965). Therefore, this 2nd American edition of the Floyd Clymer publication of 'Tuning for Speed' includes all of that valuable 'dated information' that was deleted from the later editions and is identical in all respects to the 294 page 1963/1965 revised and expanded 4th UK edition - with the exception that 7 pages of UK-based advertising to the rear of the book are not included in the Clymer publication.

Royals, Rebels, and Horrible Headchoppers

The first edition of Caroline Whitbeck's *Ethics in Engineering Practice and Research* focused on the difficult ethical problems engineers encounter in their practice and in research. In many ways, these problems are like design problems: they are complex, often ill defined; resolving them involves an iterative process of analysis and synthesis; and there can be more than one acceptable solution. In the second edition of this text, Dr Whitbeck goes above and beyond by featuring more real-life problems, stating recent scenarios and laying the foundation of ethical concepts and reasoning. This book offers a real-world, problem-centered approach to engineering ethics, using a rich collection of open-ended case studies to develop skill in recognizing and addressing ethical issues.

Best-selling author David Hough is the anti-bad ass of motorcyclists, a serious down-to-earth master of two- (and three-) wheeled street rods who is interested in the safety and road smarts of his fellow motorcyclists. *Mastering the Ride* is his follow-up book to one that put him on the map, *Proficient Motorcycling*, and it goes one better. For motorcyclists ready to take their rides to the next level, *Mastering the Ride* is an exhilarating course in skills, safety, and common sense. Hough's writing style is straightforward and conversational, never professorial, preachy, or boring. With instructional color photographs and drawings, the book covers improving the rider's skills of speed and passing on superslabs, mountain roads, and city streets; anticipating and handling street and road hazards, from treacherous tar snakes to lane-weaving drivers; and learning the limits of sight distances, executing quick stops at sudden hazards as well as curves. The book devotes two full

chapters to the skills involved in mastering cornering, with specific advice about rolling on and off the throttle, shifting, braking, countersteering, body steering and positioning, and cornering lines. In the chapter "Mastering the Art of Conspicuity," Hough recommends riders understand and employ conspicuity, that is understanding how motorcyclists and car drivers see their surroundings and getting others to see you on the road by use of hi-viz clothing, LED lights, and other gear. The key to safety rests in increased situational awareness; the topic of the next chapter; the ability to predict how road events will unfold by thinking through the possibilities way before a potential hazard presents itself. Thanks to Hough's direct and specific instructions to riders for what they need to know, to improve, to avoid, and to do every time they get on their bikes, this chapter and the skills it describes are nothing short of life-saving. In short, Mastering the Ride is a crash course in how not to crash; that is, after all is read and done, what every motorcyclist must avoid for his own life and the lives of others on the road. As Eric Trow, a motorcycle safety journalist and instructor states on the back cover, "Mastering the Ride should be required reading for every road-going motorcyclist and become the companion of any rider serious about advancing his or her road craft." Voni Graves, the record-setting million-mile BMW rider, is a long-time Hough fan who relied on Hough's "wisdom" back in the 1970s when the author was a columnist. "The latest from David brings together his years of experience and his unique analysis to make the case for mastery in a conversational way that makes [Mastering the Ride] impossible to put down. The breadth and depth of the information; is astounding." A section on the aging rider, including ways to compensate for older riders' slower reaction times and readapting their skills, is included in the appendix, as is a travelogue of Hough's road trips to some of his favorite locations. A glossary, resources section, and index complete the book.

Four Women, Six Countries - An Adventure of a Lifetime

A fresh cultural analysis of female monsters from Greek mythology, and an invitation for all women to reclaim these stories as inspiration for a more wild, more “monstrous” version of feminism The folklore that has shaped our dominant culture teems with frightening female creatures. In our language, in our stories (many written by men), we underline the idea that women who step out of bounds—who are angry or greedy or ambitious, who are overtly sexual or not sexy enough—aren’t just outside the norm. They’re unnatural. Monstrous. But maybe, the traits we’ve been told make us dangerous and undesirable are actually our greatest strengths. Through fresh analysis of 11 female monsters, including Medusa, the Harpies, the Furies, and the Sphinx, Jess Zimmerman takes us on an illuminating feminist journey through mythology. She guides women (and others) to reexamine their relationships with traits like hunger, anger, ugliness, and ambition, teaching readers to embrace a new image of the female hero: one that looks a lot like a monster, with the agency and power to match. Often, women try to avoid the feeling of monstrousness, of being grotesquely alien, by tamping down those qualities that we’re told fall outside the bounds of natural femininity. But monsters also get to do what other female characters—damsels, love interests, and even most heroines—do not. Monsters get to be complete, unrestrained, and larger than life. Today, women are becoming increasingly aware of the ways rules and socially constructed expectations have diminished us. After seeing where compliance gets us—harassed, shut out, and ruled by predators—women have never been more ready to become repellent, fearsome, and ravenous.

Poetic and sparse, a bedtime story told by the elements.

Since the turn of the century the world has been swept by a succession of Black American dance beats, from Ragtime to Rap - followed in recent years by the popular "world" music of Africa itself. This book examines why all this Black "roots" and ethnic music has become the dominant sound of our global age. The book 's first section, deals with the symbolic knowledge of Sub-Saharan Africa embedded in its music and traditional worldviews. Its second section examines how some areas of recent scientific research have moved away from the mechanistic and deterministic ethos of industrialism towards relativistic, holistic, circular, and participatory ideas that are, surprisingly, in tune with the old African symbols discussed in the first section. In short, the old insights and musical wisdom of Africa and its Diaspora are helping provide the contemporary age with the means of harmonizing our heads and feet, mind and matter, inner and outer and generally putting breathing-space, play and "swing" into a materialist world. John Collins has been active in the Ghanaian/West African music scene since 1969 as a guitarist, band leader, music union activist, journalist and writer. He obtained his B.A.degree in sociology/archaeology from the University of Ghana in 1972 and his PhD in Ethnomusicology from SUNY Buffalo in 1994. He began teaching at the Music Department of the University of Ghana in 1995,obtained a Full Professorship there in 2002 and in 2003 became Head of Department. He is currently manager of Bokoor Recording Studio, chairman of the BAPMAF African Music Archives Foundation, a consultant for several Ghana music unions and coleader of the Local Dimension Highlife Band.

Crack the Code to Wealth and Live Rich for a Lifetime

Super Mario Encyclopedia: The Official Guide to the First 30 Years

Even the most hands-on of classic bike enthusiasts will often shy away from working on their bike's electrical system, believing they have neither the skill nor the knowledge for such work. Dr James Smith explains in

Classic Motorcycle Electrics Manual that this need not be the case. Starting with basic electrical theory, the book demonstrates a wealth of electrical tips and techniques, providing a progressive and detailed guide to tasks ranging from simple repairs and upgrades, through to completely rewiring a classic motorcycle. Illustrated profusely with full-colour photographs and easy-to-follow wiring diagrams, this book will be an invaluable resource for all classic bike owners and restorers. The book covers: basic electrical theory; correct usage of a multimeter; comprehensive fault-finding techniques; making good electrical connections; fuses and circuit protection; dynamo and alternator charging systems; correct battery selection and maintenance; improving lighting and installing LEDs; selecting the right spark plug, and much more. Fully illustrated with 420 colour photographs and 167 CAD easy-to-follow wiring diagrams, this is an essential reference work for all classic bike owners.

For fifty-six days, four women left their 'regular lives', homes, families and comfort, to ride their motorbikes through scenic landscapes, inhospitable terrain and diverse regions. In this process, they covered 17,000 kilometres through six countries. What inspired them to follow this dangerous, and at times maddening, adventure trail? In Road to Mekong, Piya Bahadur recounts her once-in-a-lifetime journey through Southeast Asia. With little prior experience in expeditions of this nature, the group successfully planned and executed an exhilarating trip from Hyderabad, through the east Indian coast and the northeast of India, weaving through Myanmar, Thailand, Laos and Vietnam, along the river Mekong, and finally to Cambodia. By the time they returned, the lives of these audacious women had changed forever. Piya takes the reader along on her travels through places rarely visited by the itinerant Indian and shares the new world that unfolds as she journeys from being a working mother constrained by her own inhibitions to a confident traveller accepting of whatever adventures life has to offer. 'The inspirational and adventurous journey of these four women across nations and through thousands of kilometres makes for an exhilarating read. The book should lead many more people to explore India and it's scenic places' MEENAKSHI SHARMA, Director General for Tourism, Incredible India
