In this book, the technical explanation of the nature of analog sound creation is followed by the story of its birth and its subsequent development by various designers, manufacturers and performers. The individual components of analog sound creation are then examined in detail, with step by step examples of sound creation techniques. Then the modern imitative analog instruments are examined, again with detailed instructions for programming and using them, and the book is completed with appendices listing the major instrument lines available, hints on values and purchasing, other sources of information, and a discography of readily available recordings which give good examples of analog sound synthesis. The CD which accompanies the book gives many examples of analog sound creation basics as well as more advanced techniques, and of the abilities of the individual instruments associated with classical and with imitative analog sound synthesis.

In the setting of the beautiful, unspoiled Grand Canyon National Park, young and lovely Autumn Sky, a physician's assistant begins

her second career as a national park ranger. Her adventures of serving the public will find Autumn caught in a web of three different men, whose paths will cross with hers: the debonair, yet dangerous Park Ranger, Blake Hampton, who works side by side with Autumn; the handsome kindhearted Human Resource Director of the park, Matt Higgins and the dark, alluring Native American, Joshua Foxfire, the law enforcement officer in Havasu Canyon. All three men are infatuated with Autumn, but she will only choose one for her beloved, lifelong partner. Who will capture Autumn's heart in the heat of the canyon?

Despite a long and rich tradition of oral history research, few are aware of the innovative and groundbreaking work of oral historians in Canada. For this first primer on the practices within the discipline, the editors of The Canadian Oral History Reader have gathered some of the best contributions from a diverse field. Essays survey and explore fundamental and often thorny aspects in oral history methodology, interpretation, preservation and presentation, and advocacy. In plain language, they explain how to conduct research with indigenous communities, navigate difficult relationships with informants, and negotiate issues of copyright, slander, and libel. The authors ask how people's memories and stories can be used as historical evidence – and whether it is ethical to use them at all. Their detailed and compelling case studies draw readers into the thrills and predicaments of recording people's most intimate experiences, and refashioning them in transcripts and academic analyses. They also consider how to best present and preserve this invaluable archive of Canadian memories. Canadian Oral History Reader provides a rich resource for community and university researchers, undergraduate and graduate students, independent scholars and documentarians, and serves as a springboard and reference point for global discussions about Canadian contributions to the international practice of oral history. Contributors include Brian Calliou (independent scholar), Elise Chenier (Simon Fraser University), Julie Cruikshank (University of British Columbia), Alexander Freund (University of Winnipeg), Steven High (Concordia University), Nancy Janovicek (University of Calgary), Jill Jarvis-Tonus (independent scholar), Kristina R. Llewellyn (Renison University College, University of Waterloo), Bronwen Low (McGill University), Claudia Malacrida (University of Lethbridge), Joy Parr (Western University), Joan Sangster (Trent University), Emmanuelle Sonntag (Université du Québec à Montréal), Pamela Sugiman (Ryerson University), Winona Wheeler (University of Saskatchewan), and Stacey Zembrzycki (Concordia University).

This book explores the new performativity in art theory and practice, examining ways of rethinking interpretive processes in visual culture. Since the 1960s, visual art practices - from body art to minimalism - have taken contemporary art outside the museum and gallery; by embracing theatricality and performance and exploding the boundaries set by traditional art criticism. The contributors argue that interpretation needs to be recognised as much more dynamic and contingent. Offering its own performance script, and embracing both canonical fine artists such as Manet, De Kooning and Jasper Johns, and performance artists such as Vito Acconci and Gunter Brus, this offers radical re-readings of art works and points confidently towards new models for understanding art.

Get progressive, positive, and constructive sex tips and ideas from one of today's most popular sex educators. When it comes to sex, there's practically no question that Zoë Ligon hasn't heard and researched. Her Instagram and YouTube videos, as well as product reviews, are extremely popular for their up-front approach. Now, she brings her wealth of experience and open-minded attitude to a sex-positive guidebook that's honest, inclusive, and right on time. Lusciously illustrated, this book takes readers through every aspect of sexuality--from body basics and physiology to maintaining healthy relationships. It highlights the usefulness of sex toys in aiding solo and partnered exploration and explains why there should really be no stigma around using these practical tools. It also includes advice on setting boundaries, being respectful of other people's gender identities, and thinking outside the orgasm. Elizabeth Renstrom's dreamy, colorful photographs drive home Ligon's philosophy that there's no one "right" way to have sex. With its focus on intimacy, body positivity, and care, Carnal Knowledge can lead you to enjoy sex with security and confidence.

The most comprehensive, all-inclusive look at the history and evolution of shot on video horror films. In 1982, "Boardinghouse" became the first shot on video feature-length horror film ever made. Totally lensed on videotape, the film was later transferred to 16mm and blown-up to 35mm for theatrical exhibition. In 1983, David A. Prior shot "Sledgehammer" on video and eventually released the film on videotape. For the first time, analog video became the format used in motion picture productions. It was smeary, messy and it wasn't film... but it was cheap. In 1985, United Home Video boldly released "Blood Cult" with the claim it was "the first movie made for the home video market." The booming popularity of video stores coupled with a never-satisfied demand for content ensured these films longevity. Soon hundreds of titles followed, all video-created features by independent unknowns. They weren't from Hollywood. They weren't trained. But they had a lot of heart and a love for horror. And they made their own movies against the odds. For the first time EVER - "ANALOG NIGHTMARES" has brought these films together. Everything from "Boardinghouse" to "Zombie Holocaust" individually reviewed, categorized and presented chronologically by production year. Over 260 films! Featuring in-depth interviews with the filmmakers themselves - some speaking for the very first time! TIM

Although programming in memory-restricted environments is never easy, this holds especially true for digital signal processing (DSP). The data-rich, computation-intensive nature of DSP makes memory management a chief and challenging concern for designers. *Memory Management for Synthesis of DSP Software* focuses on minimizing memory requirements during the synthesis of DSP software from dataflow representations. Dataflow representations are used in many popular DSP design tools, and the methods of this book can be applied in that context, as well as other contexts where dataflow is used. This book systematically reviews research conducted by the authors on memory minimization techniques for compiling synchronous dataflow (SDF) specifications. Beginning with an overview of the foundations of software synthesis techniques from SDF descriptions, it examines aggressive buffer-sharing techniques that take advantage of specific and quantifiable tradeoffs between code size and buffer size to achieve high levels of buffer memory optimization. The authors outline coarse-level strategies using lifetime analysis and dynamic storage allocation (DSA) for efficient buffer sharing as one approach and demonstrate the role of the CBP (consumed-before-produced) parameter at a finer level using a merging framework for buffer sharing. They present two powerful algorithms for combining these sharing techniques and then introduce techniques that are not restricted to the single appearance scheduling space of the other techniques. Extensively illustrated to clarify the mathematical concepts, *Memory Management for Synthesis of DSP Software* presents a comprehensive survey of state-of-the-art research in DSP software synthesis.

Capitalism has been a controversial concept. In the second half of the 20th century, many historians have either not used the concept at all, or only in passing. Many regarded the term as too broad, holistic and vague or too value-loaded, ideological and polemic. This volume brings together leading scholars to explore why the term has recently experienced a comeback and assess how useful the term can be in application to social and economic history. The contributors discuss whether and how the history of capitalism enables us to ask new questions, further explore unexhausted sources and discover new connections between previously unrelated phenomena. The chapters address case studies drawn from around the world, giving attention to Europe, Africa and beyond. This is a timely reassessment of a crucial concept, which will be of great interest to scholars and students of economic history.

Most societies in today's world are multilingual. 'Language contact' occurs when speakers of different languages interact and their languages influence each other. This book is an introduction to the subject, covering individual and societal multilingualism, the acquisition of two or more languages from birth, second language acquisition in adulthood, language change, linguistic typology, language processing and the structure of the language faculty. It explains the effects of multilingualism on society and language policy, as well as the consequences that long-term bilingualism within communities can have for the structure of languages. Drawing on the author's own first-hand observations

of child and adult bilingualism, the book provides a clear analysis of such phenomena as language convergence, grammatical borrowing, and mixed languages.

To uphold family honor and tradition, Sheetal Prasad is forced to forsake the man she loves and marry playboy millionaire Rakesh Dhanraj while the citizens of Raigun, India, watch in envy. On her wedding night, however, Sheetal quickly learns that the stranger she married is as cold as the marble floors of the Dhanraj mansion. Forced to smile at family members and cameras and pretend there's nothing wrong with her marriage, Sheetal begins to discover that the family she married into harbors secrets, lies and deceptions powerful enough to tear apart her world. With no one to rely on and no escape, Sheetal must ally with her husband in an attempt to protect her infant son from the tyranny of his family.

Receiving a text from Sasha, my girlfriend, at work was always risky. Especially when she wanted to know if her girlfriend was horny. A short and sweet (and filthy) story.

"This book brings performance and flight together in conversation as a means to explore the ways in which human heavier-than-air aviation and space travel have been fundamentally connected to images, gestures, narrative tropes, and performative acts.

Performance has shaped the enterprise of flight in public perception and consciousness and in many cases has guaranteed its success as modes of entertainment, travel, research, and warfare. From the early professional aerial entertainers known as barnstormers, whose name was drawn from the itinerant theatre troupes of the nineteenth century, to the emerging industry of space tourism, which now uses performative means to cement its importance as both manifest destiny and an escape route from a failed planet, performance and flight have been inextricably linked in ways that have heretofore been underexamined"--

Imagine that you are living in a country that does not recognize you as a citizen in spite of the fact that your people have maintained a continuous existence there for several centuries. If that was not enough of a traumatic experience, consider that because of your racial, ethnic and religious identity other ethnic groups that are fighting the brutal military regime in your country for their self-determination and human rights consider you as "settlers" from a neighboring country. It must be your worst nightmare when you realize that half of your people (almost 2 million) have been forced to take asylum or refuge outside, and you may be the next in line to seek a way out of this living hell of xenophobia, discrimination, intolerance, racism and bigotry. The victims are the Rohingya people of Burma (Myanmar). Because of their religion, race, ethnicity, color and language they are the most discriminated and persecuted people in our planet. Some argue that they are also one of the most forgotten. The Myanmar military regime has denied their citizenship rights, claiming that they are illegal settlers from nearby Bangladesh who have moved into Arakan during the British occupation of Burma in the 19th century. Is there any truth to such allegations? Does the military junta apply the same litmus test against all ethnic and religious groups in matters of citizenship? What is the basis for a nation's claim to self-determination? Must a people wander in the wilderness for two millennia and suffer repeated persecution, humiliation and genocide to qualify? How about the rights of a minority community to survive with their culture and traditions intact? Do they need to be 'children' of a 'higher' God to qualify? What makes the children of a 'lesser' God to be forgotten and denied the same treatment and privilege that was granted hitherto to other nations? For much of its history, Burma has been ruled by military. As has once again been demonstrated recently they are brutal, savage and tyrannical. They have ignored people's verdict in the election and imprisoned leaders and workers of the democracy movement. They cannot be guarantors or protectors of human rights of anyone, let alone religious and ethnic minorities. Do you know that the Rohingyas - face cruel restriction on marriage and those married without government authorization are paraded naked on the streets?- Are restricted from traveling outside their villages?- Have no legal right to own land or property?- Are restricted from getting education, finding work, getting medical and health care? - Are subjected to land confiscation, forced eviction and destruction of homes, offices, schools, mosques, shops, etc., and face religious persecution on a daily basis? - Are victims of staged riots, forced starvation, arbitrary taxation, extortion, arrest, torture and extra-judicial killings?- Are forced to do slave labor for establishment of government infrastructure,

new Buddhist settlements, pagodas and monasteries on evicted lands with the government intent of changing the landscape and demography of Arakan? - Are forced to convert to Buddhism &/or worship Buddha? Do you know that when it comes to the Rohingya people, the Burmese government doesn't uphold any of the Articles of the Universal Declaration of Human Rights? Nothing can excuse us from the criminal silence that we practice in not voicing our concern about the plight of the Rohingya people. "The Forgotten Rohingya" makes a strong case for mobilizing concerned citizens of our globe to ease their sufferings. The author analyzes origin of the Rohingya people and offers ideas to solve their problem. The author also discusses problems of xenophobia and racism, which are so rampant in this country of many races, ethnicities and religions. He also analyzes the role of Daw Suu Kyi and failure of Burma's orange revolution.

When health crises strike—measles, MERS, Zika, dengue, Ebola, pandemic flu—and the American people grow alarmed, the U.S. government springs into action. But all too often, when the crisis fades and fear subsides, urgency morphs into complacency. Investments dry up, attention shifts, and a false sense of security takes hold. The CSIS Commission on Strengthening America's Health Security urges the U.S. government to replace the cycle of crisis and complacency that has long plagued health security preparedness with a doctrine of continuous prevention, protection, and resilience. Such a strategic approach can restore U.S. leadership, strengthen financing and the speed of response, foster resilient health systems abroad, enhance the U.S. government's ability to operate in disordered settings, and accelerate select technological innovations to secure the future.

The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, Yvain, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. Yvain is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

In the late eleventh century, Sicily - originally part of the Islamic world - was captured by Norman, French and Italian adventurers, led by Roger de Hauteville. For the next 150 years, Roger and his descendants ruled the island and its predominantly Arabic-speaking Muslim population. Jeremy Johns' 2002 book represents a comprehensive account of the Arabic administration of Norman Sicily. While it has generally been assumed that the Normans simply inherited their Arabic administration from the Muslim governors of the island, the author uses the unique Sicilian Arabic documents to demonstrate that the Norman kings restructured their administration on the model of the contemporary administration of Fatimid Egypt. Controversially, he also suggests that, in doing so, their intention was not administrative efficiency but the projection of their royal image. This is a compelling and accessible account of the Norman rulers and how they related to their counterparts in the Muslim Mediterranean.

In a time when the Industrial Revolution has become an all-out war, mad science rules the world—with mixed success. In Agatha H and the Siege of Mechanicsburg, Agatha Heterodyne, the last of the Heterodyne family, has returned to her family's hereditary town with the might of the Wulfenbach Empire hot on her heels. The only thing holding off an outright attack is Gilgamesh Wulfenbach, the heir to the Empire, who has joined Agatha and her friends inside the great artificially intelligent fortress of Castle Heterodyne. Now they must race to repair the mechanisms that once allowed the Castle to defend Mechanicsburg, before the rest of Europa shows up to take all the revenge the mad Heterodynes of the past so richly earned. From the Hugo Award-winning Girl Genius online comics comes this fourth book in the Agatha H. series, and like the previous three books, it will engage you in a unique world of adventure, romance, and mad science!
