*Long before Oliver Sacks became a distinguished neurologist and bestselling writer, he was a small English boy fascinated by metals—also by chemical reactions (the louder and smellier the better), photography, squids and cuttlefish, H.G. Wells, and the periodic table. In this endlessly charming and eloquent memoir, the author of The Man Who Mistook His Wife for a Hat and Awakenings chronicles his love affair with science and the magnificently odd and sometimes harrowing childhood in which that love affair unfolded. In Uncle Tungsten we meet Sacks’ extraordinary family, from his surgeon mother (who introduces the fourteen-year-old Oliver to the art of human dissection) and his father, a family doctor who imbues in his son an early enthusiasm for housecalls, to his “Uncle Tungsten,” whose factory produces tungsten-filament lightbulbs. We follow the young Oliver as he is exiled at the age of six to a grim, sadistic boarding school to escape the London Blitz, and later watch as he sets about passionately reliving the exploits of his chemical heroes—in his own home laboratory. Uncle Tungsten is a crystalline view of a brilliant young mind springing to life, a story of growing up which is by turns elegiac, comic, and wistful, full of the electrifying joy of discovery.*

Tangram celebrates awe-inspiring expression across all creative disciplines. The physical journal itself is designed to express a philosophy of play as art. Within the pages, a curious reader can find tactile, visual, and intellectual excitement. Tangram can spark a shift in perspective—things begin to glimmer that never did before. The world becomes a more astonishing place.

From the author of The Tenth Gift comes another story of exotic, foreign lands, entwining storylines spanning generations, and the quests to overcome love lost. The desert lay before them, and the secrets of the amulet. . . . From Tatraou's magnificent mountainside, Isobel absorbs the heat and romance of the Moroccan vista before her, with mosque and homes scattered far below. But a mere slip sees her tumbling uncontrollably into the arms of handsome rescuer Taib, who notices her unusual silver amulet, and that her fall has revealed a tiny scroll hidden within.

Entranced by the possibilities of its intricate and illegible script, they set out for the Sahara in search of a Tuareg elder to unlock the riddles of its past. Little does Izzy realize that the desert holds the key to more mysteries than the amulet's. From beneath the beating sun emerges nomadic Princess Mariata, whose stories of tortured love bind her to the precious talisman in Izzy's hands. She's battled the sands; she's found and lost love among its dunes. And where the amulet crosses both their paths, answers to the deepest secrets lie.

A charming portrait of one man ’ s dreams and schemes, by “ the greatest Italian writer of the twentieth century ” ( The Guardian). In this enchanting book of linked stories, Italo Calvino charts the disastrous schemes of an Italian peasant, an unskilled worker in a drab northern industrial city in the 1950s and ’ 60s, struggling to reconcile his old country habits with his current urban life. Marcovaldo has a practiced eye for spotting natural beauty and an unquenchable longing for the unspoiled rural world of his imagination. Much to the continuing puzzlement of his wife, his children, his boss, and his neighbors, he chases his dreams and gives rein to his fantasies, whether it ’ s sleeping in the great outdoors on a park bench, following a stray cat, or trying to catch wasps. Unfortunately, the results are never quite what he anticipates. Spanning from the 1950s to the 1960s, the twenty stories in Marcovaldo are alternately comic and melancholy, farce and fantasy. Throughout, Calvino ’ s unassuming masterpiece “ conveys the sensuous, tangible qualities of life ” ( The New York Times).

A timely and deeply moving debut picture book that explores the power our words hold.

Essays. Theater. Edited by Daniele Benati. Translated by Adria Bernardi. "Baldini's texts have the wonderful simplicity of fairy tales. It is for this reason that they can be read again and again without becoming tiresome. In the entire civilized western world, simplicity is usually considered as something inferior. Baldini is one of the few who makes us realize that simplicity is the

highest conquest of words. But he achieves it through an unbelievably pliable, modulated, and complex prosody, which revolves around a few fundamental sounds, as in modern music. His dialect is a reservoir of these fundamental sounds of emotion" - Gianni Celati.

Frightened by the talking log, Master Cherry does not know what

to do until his neighbor Geppetto drops by looking for a piece of wood to build a marionette. Antonio gives the block to Geppetto. And thus begins the life of Pinocchio, the puppet that turns into a boy.Pinocchio. *From ten-year-old Enaiatollah Akbari's small village in Afghanistan falls prey to Taliban rule in early 2000, his mother shepherds the boy across the border into Pakistan but has to leave him there all alone to fend for himself. Thus begins Enaiat's remarkable and often punishing five-year ordeal, which takes him through Iran, Turkey, and Greece before he seeks political asylum in Italy at the age of fifteen. Along the way, Enaiat endures the crippling physical and emotional agony of dangerous border crossings, trekking across bitterly cold mountain pathways for days on end or being stuffed into the false bottom of a truck. But not everyone is as resourceful, resilient, or lucky as Enaiat, and there are many heart-wrenching casualties along the way. Based on Enaiat's close collaboration with Italian novelist Fabio Geda and expertly rendered in English by an award-winning translator, this novel reconstructs the young boy's memories, perfectly preserving the childlike perspective and rhythms of an intimate oral history. Told with humor and humanity, In the Sea There Are Crocodiles brilliantly captures Enaiat's moving and engaging voice and lends urgency to an epic story of hope and survival.*

The book that inspired the major new motion picture Mandela: Long Walk to Freedom. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's antiapartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. LONG WALK TO FREEDOM is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph.

If someone told you that mathematics is quite beautiful, you might be surprised. But you should know that some people do mathematics all their lives, and create mathematics, just as a composer creates music. Usually, every time a mathematician solves a problem, this gives rise to many oth ers, new and just as beautiful as the one which was solved. Of course, often these problems are quite difficult, and as in other disciplines can be understood only by those who have studied the subject with some depth, and know the subject well. In 1981, Jean Brette, who is responsible for the Mathematics Section of the Palais de la Decouverte (Science Museum) in Paris, invited me to give a conference at the Palais. I had never given such a conference before, to a non-mathematical public. Here was a challenge: could I communicate to such a Saturday afternoon audience what it means to do mathematics, and why one does mathematics? By "mathematics" I mean pure mathematics. This doesn't mean that pure math is better than other types of math, but I and a number of others do pure mathematics, and it's about them that I am now concerned. Math has a bad reputation, stemming from the most elementary levels. The word is in fact used in many different contexts. First, I had to explain briefly these possible contexts, and the one with which I wanted to deal.

**This handbook is designed to help school staff members and others broaden their view of assessment and put assessment into the broader context of school restructuring while keeping the focus on students. The handbook is arranged in sections, each dealing with a separate topic. Each section contains a number of papers by different authors that represent the best thinking on the topic. Each section begins with an overview that discusses the major perspectives, ideas, issues, and concerns that relate to the section topic and describes how each paper fits into this fabric. The sections are: (1) "Setting the Stage"; (2) "Placing Student Performance Assessment within the Context of School Restructuring"; (3) "Developing Student Learning Goals for the 21st Century"; (4) "Aligning Assessment with Curriculum and Instruction"; (5) "Designing Performance Tasks"; (6) "Establishing Performance Criteria"; (7) "Using Performance Assessment Information for Improvement"; and (8) "Implementing Performance Assessment." In all, there are 98 papers in the handbook and 3 "resources": a glossary, a list of assessment information sources, and a list of contributors. Most of the articles contain references and illustrations. (SLD)**
