This single-volume dictionary presents the lives ofindividual Scottish women from earliest times to the present. Drawing on newscholarship and a wide network of professional and amateur historians, itthrows light on the experience of women from every class and category inScotland and among the worldwide Scottish diaspora.The BiographicalDictionary of Scottish Women is written for the general reading public andfor students of Scottish history and society. It is scholarly in itsapproach to evidence and engaging in the manner of its presentation. Eachentry makes sense of its subject in narrative terms, telling a story ratherthan simply offering information. The book is as enjoyable to read as it iseasy and valuable to consult. It is a unique and important contribution tothe history of women and Scotland.The publisher acknowledges support fromthe Scottish Arts Council and the Scottish Executive Equalities Unit towardsthe publication of this title.

Recounts the circumstances surrounding the election of Jorge Bergoglio as pope, reviews the life of the first Argentine and the first Jesuit to become pontiff, and discusses his views on poverty, the Church, and other issues.

“One of the most profoundly illuminating studies of this century to have been published in recent decades.”—John Gray, New York Times Book Review Hailed as “a magisterial critique of top-down social planning” by the New York Times, this essential work analyzes disasters from Russia to Tanzania to uncover why states so often fail—sometimes catastrophically—in grand efforts to engineer their society or their environment, and uncovers the conditions common to all such planning disasters. “Beautifully written, this book calls into sharp relief the nature of the world we now inhabit.”—New Yorker “A tour de force.”— Charles Tilly, Columbia University Franciscan

A Practical Guide to Diagnosis and Management

Aristocrats and Itinerants, unionists and nationalists, Catholics and Protestants - the Great War united thousands of Clare men and women to a cause for which many of them would go out to fight and die.Their motives varied from a sense of duty to 'king and country' to concern about the fate of 'poor Catholic Belgium'; from mercenary motives, fuelled by poverty, to the moral duty to fight for civilization against the 'savage Huns', or, like many young men, to the simple thirst for adventure. This seminal work attempts, for the first time, to understand what really happened in County Clare during the Great War, how its economic and political life was radically transformed during this terrible conflict, and how the contribution of those who gave their lives was largely written out of history.'

An annual biographical dictionary, with which is incorporated 'Men and women of the time.'

Autobiography of a Pakistani politician and social reformer.

Excerpt from From a Surgeon's Journal, 1915-1918 Dr. Cushing saw the war on the Western Front at close quarters. His first duty was in the early spring of 1915 when he served with a Harvard Unit in the American Ambulance at Neuilly, France. At that time he became familiar with the French Service de Santé. From Paris he went on a visit to the Royal Army Medical Corps and saw at first hand their work in Flanders. On his return to this country, as part of the preparedness campaign, he set about organizing one of the Base Hospital Units which were recruited from a number of university medical schools. As director of one of these units, known as Base Hospital No. 5 - the second military organization of any kind officially sent overseas - he sailed for France again in May 1917. Throughout that year he served as an operating surgeon with the being detached from the Unit for special duty during the battles for the Messines and Passchendaele ridges. In June 1918 he was transferred to the Medical Headquarters of the a.e.f. As senior consultant in neurosurgery, and participated in the three major engagements of the campaign, chateau-thierry, St. Mihiel, and the Argonne. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The "Heinemann Mathematics" scheme has been developed by the authors of the primary course "SPMG", with the aim of building on established strengths to provide a structured development of children's mathematical knowledge and skills within the revised curricula.

This book presents a unified set of arguments about the nature of jurisprudence and its relation to the jurist's role. It explores contemporary challenges that create a need for social scientific perspectives in jurisprudence, and it shows how sociological resources can and should be used in considering juristic issues. Its overall aim is to redefine the concept of sociological jurisprudence and outline a new agenda for this. Supporting this agenda, the book elaborates a distinctive juristic perspective that recognises law's diversity of cultural meanings, its extending transnational reach, its responsibilities to reflect popular aspirations for justice and security, and its integrative tasks as a general resource of regulation for society as a whole and for the individuals who interact under law's protection. Drawing on and extending the author's previous work, the book will be essential reading for students, researchers and academics working in jurisprudence, law and society, socio-legal studies, sociology of law, and comparative legal studies.

“One of the best and most in-depth studies in English of the impact and impact of ecstatic utterances (shahiyat) in classical Islamic mysticism. It makes available an important body of mystical aphorisms and reveals not only the significance of these sayings in the Sufi tradition, but also explains their controversial impact on Islamic law and society. This study describes the development and interpretation of shahiyat in classical Sufism and analyzes the principal themes and rhetorical styles of these sayings, using as a basis the authoritative Commentary on Ecstatic Sayings by Ruzbihan Baqli of Shiraz. The special topic of mystical faith and infidelity receives particular emphasis as a type of ecstatic expression that self-reflectively meditates on the inadequacy of language to describe mystical experience. The social impact of ecstatic sayings is clarified by an analysis of the political causes of Sufi heresy trials (Nur, Hallaj, and 'Ayn al-Qadiri) and the later elaboration of Sufi martyrologies. This study also examines the attitudes of Islamic legal scholars toward shahiyat, and concludes with a comparison of Sufi ecstatic expressions with other types of inspired speech.

Genomics of Rare Diseases: Understanding Disease Genetics Using Genomic Approaches, a new volume in the Translational and Applied Genomics series, offers readers a broad understanding of current knowledge on rare diseases through a genomics lens. This clear understanding of the latest molecular and genomic technologies used to elucidate the molecular causes of more than 5,000 genetic disorders brings readers closer to unraveling many more that remain undefined and undiscovered. The challenges associated with performing rare disease research are also discussed, as well as the opportunities that the study of these disorders provides for improving our understanding of disease architecture and pathophysiology. Leading chapter authors in the field discuss approaches such as karyotyping and genomic sequencing for the better diagnosis and treatment of conditions including recessive diseases, dominant and X-linked disorders, de novo mutations, sporadic disorders and mosaicism. Complex applied case studies and methodologies, enabling researchers, clinicians and healthcare providers to effectively classify DNA variants associated with disease and patient phenotypes Discusses the main challenges in studying the genetics of rare diseases through genomic approaches and possible or ongoing solutions Explores opportunities for novel therapeutics Features chapter contributions from leading researchers and clinicians

NHM Organising and Planning Guide is an excellent teacher resource. It gives you all the support you need to implement the programme and plan your lessons.

This authoritative new work analyses European plant intellectual property rights. Whilst the focus of the work is on Europe, and in particular the European Patent Convention, the Council Regulation on Community Plant Variety Rights and the EU Directive on the Legal Protection of Biotechnological Inventions, these provisions are discussed within the context of international legislation, including the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) and the Convention on Biological Diversity. It is the first book to look at the impact of plant intellectual property rights on the European plant breeding industry and assess whether recent developments, such as the Novartis decision, will assist plant breeders, from all sectors of plant breeding activities, in the production of new plant products. In addition to a thorough discussion of the legislation, the book includes unique empirical research results obtained by the authors as part of a two-year research project funded by the European Union, which surveyed attitudes towards, and use of, plant intellectual property rights within the European plant breeding community.

This book offers clear, practical guidance on how to assess, diagnose and effectively manage traumatic dental injuries. Divided into 14 sections, with the first chapter providing an overview of first principles, each of the following sections covers a different type of injury. The book concludes with discussion on long-term consequences of dental trauma. Each chapter summarises how best to assess and manage the presenting problem, and includes advice on postoperative care and recommended follow-up. A clinical case example highlighting salient points is featured for each topic, and more than 400 clinical photographs and explanatory diagrams throughout the book further enhance learning. The book is authored by recognised consultant in restorative dentistry, Serpil Djemal, from King's College Hospital Dental Institute, London. Key points Practical guidance on assessment, diagnosis and management of traumatic dental injuries Each topic features a clinical case example highlighting salient points Includes more than 400 clinical photographs and explanatory diagrams Recognised author from King's College Hospital Dental Institute, London

Longlisted for the Booker Prize Named a Most Anticipated Book of Summer 2021 by Entertainment Weekly, Time, and CrimeReads Named a Best Book of 2021 by Time An astonishing, visceral autobiographical novel about a young man straddling two cultures: the university where he is studying English Literature and the disregarded world of London gang warfare. The unforgettable narrator of this compelling, thought-provoking debut goes by two names in his two worlds. At the university he attends, he's Gabriel, a seemingly ordinary, partying student learning about morality at a distance. But in his life outside the classroom, he's Snoopz, a hard living member of London's gangs, well-acquainted with drugs, guns, stabbings, and robbery. Navigating these sides of himself, dealing with loving parents at the same time as treacherous, endangering friends and the looming threat of prison, he is forced to come to terms with who he really is and the life he's chosen for himself. In a distinct, lyrical urban slang all his own, author Gabriel Krauze brings to vivid life the underworld of his city and the destructive impact of toxic masculinity. Who They Was is a disturbing yet tender and perspective-altering account of the thrill of violence and the trauma it leaves behind. It is the story of inner cities everywhere, and of the lost boys who must find themselves in their tower blocks.

The Clare War Dead is a comprehensive record of those men from County Clare who died during the Great War, and is the next instalment in this prolific author's series on the subject. His tireless research has been undertaken to honour those who died in service, and to shine a light on an aspect of Irish history which has for too long gone unexamined and unrecognised.Such a list, combined as it is with intricate data and previously unpublished correspondence and photographs, is an essential addition to any local historian or military enthusiast's bookshelf.This is Tom Burnell's seventh book in this series, following on from the success of similar titles on Waterford, Offaly, Wexford, Wicklow, Tipperary and Carlow.

Edited by eminent banking law scholar Ross Cranston, this is a collection of essays written in honor of Roy Goode, the Norton Rose Professor of English Law at Oxford and highly esteemed commercial law scholar. The contributors, an international group of distinguished commercial lawyers, address topics including international contracts and sales, credit and security, and commercial arbitration. Making Commercial Law is a truly international collection that will be of great interest to scholars of commercial law worldwide, and to practitioners working in the areas of finance and international banking.
