How modern motoring drives Grumpies to distraction We've said that Christmas is the worst thing; we've said that working for idiots is the worst thing; we've said that holidays are the worst thing. But driving is the worst thing of all. It brings together so many of the multitude of individual elements which combine to make Grumpy Old Men and Grumpy Old Women grumpy. It's got queuing - at petrol stations, on side roads, on A roads, on motorways, at car parks and even at the 'drive through'. Very few things make Grumpies more grumpy than queuing. It's got being ripped off - when you buy a car, when you have it serviced, when you buy anything for it, when anything goes wrong, when you put petrol in it, when you wash it, when you park it, when it gets towed away and when some arsehole you've never met bumps into it. It's got being pissed about - when you want to book it in for a service, and when you get to tax it, insure it and get the MOT for it, and again when you want to sell it. And last but not least, it's got the most essential ingredient of grumpiness. Driving is a triumph of disappointment over expectation. When we were kids we thought driving would be the ultimate freedom and all it has turned out to be is a total pain in the tushkin. And that is not even mentioning Top sodding Gear...

Capturing the serene beauty of planets, stars, and celestial bodies is both fine art and scientific discovery. Fascinating, challenging, and extremely rewarding, astrophotography is a pursuit that is greatly enhanced by gaining access to the type of detailed instruction this book offers, with charts, tables, over (number of TK) images, and real-life troubleshooting advice in detailed case studies. The Astrophotography Manual is for those astrophotographers who wish to swiftly move beyond using standard SLR cameras and Photoshop, and who are ready to create beautiful images of nebulae, galaxies, clusters, and the solar system. Beginning with a brief astronomy primer, this book takes readers through the full astrophotography process, from equipment choice and set-up, through image acquisition, image calibration, and processing. Along the way it explains how sensor performance and light pollution relate to image quality and exposure planning. This book will satisfy the technical and practical reader and uses case studies to illustrate the entire process, using a range of equipment (including tablets and smartphones), exploring deep sky and planetary objects, and utilizing a variety of software, including Maxim, Nebulosity, Photoshop, RegiStax and PixInsight.

It's the only book you'll need in your baby's first year. Packed with practical advice, Baby on Board is a must-read for all mums and dads. Babies have basic biological needs, which parents must meet. 'Baby on Board' outlines these needs clearly and explains the biological science underpinning them. This wonderful book gives parents the confidence they need to derive for themselves how to parent their baby successfully. It helps them navigate the endless advice directed their way by well-meaning family, friends, and passers-by. One issue that causes parents the most anguish - how to settle their distressed and crying baby - is explored in detail. Written in an accessible and frequently humorous way, Dr Chilton explains the fundamentals of parenting based on science and his forty years' experience as a neonatologist. He also explores the fascinating subject of how babies evolved over the millennia, what they perceive and how they are programmed for survival. This expanded edition has new chapters on the introduction of solids, how to play with your baby, and the essential drivers of baby sleep and how to enhance them. Many other chapters have been revised and updated. Dr Chilton's daughter, Georgina Dowden, with whom he collaborates professionally, has extensively rewritten the breastfeeding chapter. She has also contributed many useful additions, with her influence evident throughout the book.
