Two magic-takers from another world, arguing about whether they can collect what they came for before you wake up. It sounds like a crazy dream, or a practical joke. But what if the air around you started to vibrate with an invisible force field? What if, all at once, it felt scary yet familiar too? You would have no way of knowing that your life would change forever. That this discovery would set you on a path no-one from our world has taken for centuries. Towards a deadly enemy, and a fight that you will almost certainly lose. All you know is that your heart is beating so fast you're worried they will hear it, and your brain is starting to buzz as the force field reaches it. Would you open your eyes? Join Jax and Shannon as they live through the most exciting and terrifying ten days of their lives (so far!) The Legacy of Androva is a series of contemporary fantasy books, for ages 9 and older.*

*In Putting on the Dog, Melissa Kwasny explores the age-old relationship between humans and the animals that have provided us with our clothing: leather, wool, silk, feathers, pearls, and fur. From silkworms grown on plantations in Japan and mink farms off Denmark's western coast to pearl beds in the Sea of Cortés, Kwasny offers firsthand accounts of traditions and manufacturing methods—aboriginal to modern—and descriptions of the marvel and miracle of the clothing itself. What emerges is a fresh look at the cultural history of fashion. Kwasny travels the globe to visit both large-scale industrial manufacturers and community-based, often subsistence production by people who have spent their lives working with animals—farmers, ranchers, tanners, weavers, shepherds, and artisans. She examines historical rates of consumption and efforts to move toward sustainability, all while considering animal welfare, worker safety, environmental health, product accountability, and respect for indigenous knowledge and practice. At its heart, Putting on the Dog demonstrates how what we choose to wear represents one of our most profound engagements with the natural world.*

The compartmentation of genetic information is a fundamental feature of the eukaryotic cell. The metabolic capacity of a eukaryotic (plant) cell and the steps leading to it are overwhelmingly an endeavour of a joint genetic cooperation between nucleus/cytosol, plastids, and mitochondria. Alteration of the genetic material in anyone of these compartments or exchange of organelles between species can seriously affect harmoniously balanced growth of an organism. Although the biological significance of this genetic design has been vividly evident since the discovery of non-Mendelian inheritance by Baur and Correns at the beginning of this century, and became indisputable in principle after Renner's work on interspecific nuclear/plastid hybrids (summarized in his classical article in 1934), studies on the genetics of organelles have long suffered from the lack of respectability. Non-Mendelian

inheritance was considered a research sideline~ifnot a freak~by most geneticists, which becomes evident when one consults common textbooks. For instance, these have usually impeccable accounts of photosynthetic and respiratory energy conversion in chloroplasts and mitochondria, of metabolism and global circulation of the biological key elements C, N, and S, as well as of the organization, maintenance, and function of nuclear genetic information. In contrast, the heredity and molecular biology of organelles are generally treated as an adjunct, and neither goes as far as to describe the impact of the integrated genetic system.

*This book has Paper Panda's very distinctive stamp on it and begins with a design section which takes the reader through a very personal account of what inspires her, how she works, and how Paper Panda came about. The techniques involved in papercutting are fairly simple and easy to explain, and this is covered through step-by-step demos. There is a design section, taking readers through the design process itself and including numerous examples of Louise's papercut designs. Starting with the themes and subjects that inspire her, it explains how she creates finished artwork suitable for papercutting, followed by how to make the template itself, and how to use the papercut to make cards, framed pictures, and so on. The aim of this section will be not only to provide readers with an insight into Paper Panda's creative world, but also to inform and inspire people to design papercuts for themselves. There are 20 papercut projects in the book; five from Paper Panda herself and five each from three of Paper Panda's design colleagues (Sarah Trumbauer, Louise Dyer and Suzy Taylor - all accomplished papercutters with online presences). Each project will consist of a template, which will be reproduced full-size at the back of the book, and a finished paper cut, together with some step-by-step instructions. The designs will be simple enough for beginners, though attractive and interesting enough to inspire more advanced paper cutters. The projects themselves will include cards, decorations, and mounted and framed pictures to hang on the wall, all using a variety of colored and patterned papers to show off Paper Panda and friends' distinctive and beautiful designs to their best advantage.*
