The Story of Rama Part 2

The third and final book of the Janitors of the Post-Apocalypse follows a group of unlikely heroes trying to save the galaxy from a zombie plague. Marion "Mops" Adamopoulos and her team were trained to clean spaceships. They were absolutely not trained to fight an interplanetary war with the xenocidal Prodryans or to make first contact with the Jynx, a race who

might not be as primitive as they seem. But if there's one lesson Mops and her crew have learned, it's that things like "training" and "being remotely qualified" are overrated. The war is escalating. (This might be Mops' fault.) The survival of humanity—those few who weren't turned to feral, shambling monsters by an alien plague—as well as the fate of all other non-Prodryans, will depend on what Captain Mops and the crew of the EDFS Pufferfish discover on the ringed planet of Tuxatl. But the Jynx on Tuxatl are fighting a war

of their own, and their world's long-buried secrets could be more dangerous than the Prodryans. To make matters worse, Mops is starting to feel a little feral herself...

In the year 2130 a mysterious spaceship, Rama, arrived in the solar system. It was huge - big enough to contain a city and a sea - and empty, apparently abandoned. By the time Rama departed for its next, unknown, destination many wonders had been uncovered, but few mysteries solved. Only one thing was clear: everything the

Sadhana: The Path to Enlightenment

Rama: The Omnibus

The Story of Rama Part 1

In the sequel to "Rendezvous with Rama," a

second Raman spacecraft is discovered approaching Earth in 2196, an event of potentially devastating consequences for humankind

The focus of the second volume of Yoga the Sacred Science is sadhana, spiritual practice. In this volume Swami Rama reminds us that we are here in this world because we have a purpose to fulfill. That purpose is enlightenment, a state of awareness of the Self, the one Absolute beneath all forms and names. The height of enlightenment is the realization that God is within. The path to enlightenment is sadhana. At first, only a few things are known about the

celestial object that has arrived in the galaxy and has been dubbed Rama by the astronomers observing it. It is a huge cylindrical object, weighing more than ten trillion tons. And it is hurtling through the solar system at inconceivable speed. Then a space probe confirms the unthinkable: Rama is no natural object. It is, incredibly, an interstellar spacecraft. Space explorers and planet-bound scientists alike prepare for mankind's first encounter with alien intelligence. It will kindle their wildest dreams ... and fan their darkest fears. For no one knows who the Ramans are or why they have come. And now the moment of

rendezvous awaits - just behind a Raman airlock door.

man into contact with an extra-galactic civilization Rama Gita is the quintessential book of non-dualism. In it, Lord Rama tells his younger brother Lakshmana about the nature of reality and ignorance. Using references from the Upanishads, he proves that knowledge alone is the means of liberation. Moreover, actions cannot lead us to an eternal life. As knowledge and action are opposite to each other like light and darkness, there is no question of their association either. One might now ask, "Which type of knowledge can give us liberation?" To this, he says, "By understanding the identity between soul and super-soul, one can experience the eternal freedom." He explains the real nature of soul by discarding the external shells which are not part of it but we associate them with it due to our

ignorance. Just as one peels off the layers of onion one by one, he removes the layers of errors in our judgement about our real nature. Then, he equates this purest form of soul with the super-soul. He further discusses the nature of reality and ignorance to make us aware of what we need to lose, why it is required to discard and what will be the gain. After that, he answers how we can know his reality, which is ever present in us, through perseverance, focus and faith.

Astronauts explore an alien spacecraft hurtling toward the sun in this Hugo and Nebula Award–winning novel—“a stone-cold classic” of hard sci-fi (The Guardian). An enormous cylindrical object has entered Earth’s solar system on a collision course with the sun. A team of astronauts are sent to explore the mysterious craft, which the denizens of the solar system name Rama. What they find is astonishing evidence of a civilization far more advanced than ours. They find an interior stretching over fifty kilometers; a forbidding cylindrical sea; mysterious and inaccessible buildings; and strange machine-animal hybrids, or “biots,” that inhabit the ship. But what they don’t find is an alien
