

Read Collage Of Agriculture

This is a must read book for African Government policy makers to help them go over hunger...an annual 'predictable disaster. It is a vital support material for high school students and College students. Whereas It is aligned along the Agriculture syllabi for Botswana and Kenya, it has 90% of the syllabi items for the High School syllabi for most other developing countries. A hungry nation is on a journey to nowhere.

Excerpt from Farmers' Reading Courses NO apology is needed for the extension movement; yet there are those who say that persons who will not make the effort to learn of their own volition should be left in ignorance. There are certainly two considerations which make it imperative that such persons shall be taught - the consideration of altruism, or regard for one's neighbors; the consideration or the desire that the State shall prosper. If progress is desirable, then the extension movement must abide. Every farmer should be awakened. I suppose that it will never be possible to discover which was the very first reading-course movement for farmers. One can not read far in the history of the agricultural colleges without finding germs of the idea - the desire that farmers be given more and better reading matter. This idea was expressed before any of the agricultural colleges came into being. It was thought, however, that the normal work of the college would spread sufficiently the reading habit. But so many farmers do not go to college and are not touched by it, and so much new knowledge has come into the farmer's horizon, that some special machinery is needed to carry something of the college influence to the farm. This machinery embraces itinerant lectures and experiment station bulletins and reading courses. As early as 1882 President James Mills, of the Agricultural College Of Ontario, outlined a reading course for farmers. The council of agriculture and arts for the province cooperated in the enterprise. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. A Profile

This book examines the theology and ethics of land use, especially the practices of modern industrialized agriculture, in light of critical biblical exegesis. Nine interrelated essays explore the biblical writers' pervasive concern for the care of arable land against the background of the geography, social structures, and religious thought of ancient Israel. This approach consistently brings out neglected aspects of texts, both poetry and prose, that are central to Jewish and Christian traditions. Rather than seeking solutions from the past, Davis creates a conversation between ancient texts and contemporary agrarian writers; thus she provides a fresh perspective from which to view the destructive practices and assumptions that now dominate the global food economy. The biblical exegesis is wide-ranging and sophisticated; the language is literate and accessible to a broad audience.

Cornell Reading Course for the Farm

Although few Americans work as farmers these days, agriculture on the whole remains economically important--playing a key role in such contemporary issues as consumer health and nutrition, worker safety and animal welfare, and environmental protection. This publication provides a comprehensive picture of the primary education system for the nation's agriculture industry: the land grant colleges of agriculture. Colleges of Agriculture at the Land

Grant Universities informs the public debate about the challenges that will shape the future of these colleges and serves as a foundation for a second volume, which will present recommendations for policy and institutional changes in the land grant system. This book reviews the legislative history of the land grant system from its establishment in 1862 to the 1994 act conferring land grant status on Native American colleges. It describes trends that have shaped agriculture and agricultural education over the decades--the shift of labor from farm to factory, reasons for and effects of increased productivity and specialization, the rise of the corporate farm, and more. The committee reviews the system's three-part mission--education, research, and extension service--and through this perspective documents the changing nature of funding and examines the unique structure of the U.S. agricultural research and education system. Demographic data on faculties, students, extension staff, commodity and funding clusters, and geographic specializations profile the system and identify similarities and differences among the colleges of agriculture, trends in funding, and a host of other issues. The tables in the appendix provide further itemization about general population distribution, student and educator demographics, types of degree programs, and funding allocations. Concise commentary and informative graphics augment the detailed statistical presentations. This book will be important to policymakers, administrators, educators, researchers, and students of agriculture.

Excerpt from The Old Guard; The Famous "Faculty of Four;" The Mission and Future of the College; Its Debt to Amherst College, Harvard College and Other Institutions: Read at the Fortieth Anniversary of the Opening of the Massachusetts Agricultural College, Oct. 2, 1871 As President Hitchcock's report was published broadcast, it is more than likely that Senator Morrill of Vermont read that report, and perhaps gained from it the inspiration which led him to introduce into Congress in 1857 a bill requesting that public lands be donated to each State which provides colleges for the benefit of agriculture and the mechanic arts. Consideration of this bill was postponed because of the civil war, but it was finally enacted in 1862; and to it we owe the great, democratic land - grant colleges of this country, such as Cornell University and the universities of Iowa, Michigan, Illinois and Wisconsin, in fact, we have one in every northern State. A School for Others covers my time in Belize, Central America as a Peace Corps Volunteer. It is about my personal growth, some adventure, unintentional altruism, and finding true love, despite my best efforts not to. I live in a Mayan village and one day I discover an abandon school in the jungle. It is the beginning of a vision to develop a school for students who are unable to continue their education in a system that is designed to weed out the "academically challenged." They are the "other" kids who don't have the privilege of attending secondary school.

“Anyone who eats should read this book: You will come to the table with new appreciation for the intersections between race and food . . . powerful.”—Anna Lappé, author of Diet for a Hot Planet The growing trend of organic farming and homesteading is changing the way the farmer is portrayed in mainstream media, and yet, farmers of color are still largely left out of the picture. The Color of Food seeks to rectify this. By recognizing the critical issues that lie at the intersection of race and food, this stunning collection of portraits and stories challenges the status quo of agrarian identity. Author, photographer, and biracial farmer Natasha Bowens’ quest to explore her own roots in the soil leads her to unearth a larger story, weaving together the seemingly forgotten history of agriculture for people of color, the issues they face today, and the culture and resilience they bring to food and farming. The Color of Food teaches us that the food and farm movement is about more than buying local and protecting our soil. It is about preserving culture and community, digging deeply into the places we’ve overlooked, and honoring those who have come before us. Blending storytelling, photography, oral history, and unique insight, these pages remind us that true food sovereignty means a place at the table for everyone.

“Natasha Bowens, through her compelling stories and powerful images of a rainbow of farmers, reminds us that the industrialization of our food system and the oppression of our people—two sides of the same coin—will, if not confronted, sow the seeds of our own destruction.”—Mark Winne, author of Food Town, USA
