Supplement your social studies curriculum with 180 days of daily practice! This essential classroom resource provides teachers with weekly social studies units that build students' content-area literacy, and are easy to incorporate into the classroom. Students will analyze primary sources, answer text-dependent questions, and improve their grade-level social studies knowledge. Each week covers a particular topic within one of the four social studies disciplines: history, economics, civics, and geography. Aligned to the National Council for the Social Studies (NCSS) and state standards, this social studies workbook includes digital materials.

The traditional system of education requires students to hold their questions and compliantly stick to the scheduled curriculum. But our job as educators is to provide new and better opportunities for our students. It's time to recognize that compliance doesn't foster innovation, encourage critical thinking, or inspire creativity--and those are the skills our students need to succeed.

Do your students fail to even finish a timed test? Do they read word by word? Do they simply move their eyes over the page, never remembering what they read? If you suspect that students' test scores are being confounded by any of these traits, or if you have students who need to process greater amounts of information, the Timed Readings books can help. For over thirty years, Jamestown has been helping students increase their reading rate and fluency while maintaining comprehension. Timed Readings Plus in Social Studies features 400-word nonfiction timed passages on current social studies topics, similar to those found on state and national tests.

Reading, writing, and research merge into meaningful learning experiences with this unique collection of flexible, easy-to-make projects. Students follow simple step-by-step directions to create engaging timelines, accordion books, quilts, banners, scrolls, zipper books, and much more! Projects reinforce literacy skills and can be used with any social studies topic from geography, map skills, and history to citizenship, government, and national holidays and celebrations. Perfect for students of all learning styles. For use with Grades 2-3.

This book focuses on assigned reading events in middle grade social studies courses and the 14 actions proficient readers take before, during, and after reading to comprehend assigned course texts including textbook chapters, book chapters, passages, and articles.

They rowed hard, away from the battleships and the bombs. Water sprayed over them. The rowboat pitched one way and then the other. Then, before his eyes, the Arizona lifted up out of the water. That enormous battleship bounced up in the air like a rubber ball and split apart. Fire burst out of the ship. A geyser of water shot into the air and came crashing down. Adam was almost thrown out of the rowboat. He clung to the seat as it swung around. He saw blue skies and the glittering city. The boat swung back again, and he saw black clouds, and the Arizona, his father's ship, sinking beneath the water. -- from A Boy at War "He kept looking up, afraid the planes would come back. The sky was obscured by black smoke...It was all unreal: the battleships half sunk, the bullet holes in the boat, Davi and Martin in the water." December 7, 1941: On a quiet Sunday morning, while Adam and his friends are fishing near Honolulu, a surprise attack by Japanese bombers destroys the fleet at Pearl Harbor. Even as Adam struggles to survive the sudden chaos all around him, and as his friends endure the brunt of the attack, a greater concern hangs over his head: Adam's father, a navy lieutenant, was stationed on the USS Arizona when the bombs fell. During the subsequent days Adam -- not yet a man, but no longer a boy -- is caught up in the war as he desperately tries to make sense of what happened to his friends and to find news of his father. Harry Mazer, whose autobiographical novel, The Last Mission, brought the European side of World War II to vivid life, now turns to the Pacific theater and how the impact of war can alter young lives forever.

The story of Jonah, often read as a simple children's story, is a multifaceted and elaborate narrative with serious intent. Treating the biblical book as a fictitious story based on real locations and recognizable persons, 'Jonah's World' examines the background to the story and draws on social science approaches to describe its imaginative world. The book explores the geography, theology, myth, human characters, natural landscape, and the ideology behind the story to uncover a vision of reality shaped by literary technique. Jonah's World will be invaluable to students and scholars seeking a new approach to the reading of this colourful text.

Teaching Social Studies: A Methods Book for Methods Teachers, features tasks designed to take preservice teachers deep into schools in general and into social studies education in particular.

Organized around Joseph Schwab's commonplaces of education and recognizing the role of inquiry as a preferred pedagogy in social studies, the book offers a series of short chapters that highlight learners and learning, subject matter, teachers and teaching, and school context. The 42 chapters describe tasks that the authors assign to their methods students as either in?class or as outside?of?class assignments. The components of each chapter are: > Summary of the task > Description of the exercise (i.e., what students are to do, the necessary resources, the timeframe for completion, grading criteria) > Description of how students respond to the activity > Description of how the task fits into the overall course > List of readings and references > Appendix that supplements the task description

Preparing students to be active, informed, literate citizens is one of the primary functions of public schools. But how can students become engaged citizens if they can't read, let alone understand, their social studies texts? What can educators--and social studies teachers in particular--do to help students develop the knowledge, skills, and motivation to become engaged in civic life? Building Literacy in Social Studies addresses this question by presenting both the underlying concepts and the research-based techniques that teachers can use to engage students and build the skills they

need to become successful readers, critical thinkers, and active citizens. The authors provide targeted strategies—including teaching models, graphic organizers, and step-by-step instructions—for activities such as * Building vocabulary, * Developing textbook literacy skills, * Interpreting primary and secondary sources, * Applying critical thinking skills to newspapers and magazines, and * Evaluating Internet sources. Readers will also learn how to organize classrooms into models of democracy by creating learning communities that support literacy instruction, distribute authority, encourage cooperation, and increase accountability among students. Realistic scenarios depict a typical social studies teacher's experience before and after implementing the strategies in the classroom, showing their potential to make a significant difference in how students respond to instruction. By making literacy strategies a vital part of content-area instruction, teachers not only help students better understand their schoolwork but also open students' eyes to the power that informed and engaged people have to change the world.

Prologue and Change

Plan and deliver a curriculum to help your students connect with the humanity of others! In the wake of 2020, we need today's young learners to be prepared to develop solutions to a host of entrenched and complex issues, including systemic racism, massive environmental problems, deep political divisions, and future pandemics that will severely test the effectiveness and equity of our health policies. What better place to start that preparation than with a social studies curriculum that enables elementary students to envision and build a better world? In this engaging guide two experienced social studies educators unpack the oppressions that so often characterize the elementary curriculum—normalization, idealization, heroification, and dramatization—and show how common pitfalls can be replaced with creative solutions. Whether you're a classroom teacher, methods student, or curriculum coordinator, this is a book that can transform your understanding of the social studies disciplines and their power to disrupt the narratives that maintain current inequities.

A team of researchers from 35 states across the country developed a survey designed to create a snapshot of social studies teaching and learning in the United States. With over 12,000 responses, it is the largest survey of social studies teachers in over three decades. We asked teachers about their curricular goals, their methods of instruction, their use of technology, and the way they address the needs of English language learners and students with disabilities. We gathered demographic data too, along with inquiries about the teachers' training, their professional development experiences, and even whether they serve as coaches. The enormous data set from this project was analyzed by multiple research teams, each with its own chapter. This volume would be a valuable resource for any professor, doctoral student, or Master's student examining the field of social studies education. It is hard to imagine a research study, topical article, or professional development session concerning social studies that would not quote findings from this book about the current status of social studies. With chapters on such key issues as the teaching of history, how teachers address religion, social studies teachers' use of technology, and how teachers adapt their instruction for students with disabilities or for English language learners, the book's content will immediately be relevant and useful.

Reading Social Research: Studies in Inequalities and Deviance, by Jeffrey Dixon and Royce Singleton, consists of a collection of 20 such studies, carefully chosen to represent a broad range of approaches and methods of contemporary social research. Selected journal articles and book excerpts illustrate the relationship between theory and research, the ethical and political dimensions of research, methods of selecting cases and measuring concepts, and various ways of gathering and analyzing data. Focusing on issues of race/ethnicity, gender, class, and crime and deviance, readings expose students to substantive topics fundamental to and at the forefront of the social sciences. In addition, they provide examples of both qualitative and quantitative social research; are rigorous applications of methodological concepts; and are abridged carefully to make them accessible to students.
