Reasonable Doubt Volume 1 Whitney Gracia Williams

The extraordinary story of the scientific expeditions that ushered in the era of relativity In 1919, British scientists led expeditions to Brazil and Africa to test Albert Einstein's new theory of general relativity in what became the century's most celebrated scientific experiment. The result ushered in a new era and made Einstein a celebrity by confirming his prediction that the path of light rays would be bent by gravity.

Yet the effort to “weigh light” during the May 29, 1919, solar eclipse has become clouded by myth and skepticism. Could Arthur Eddington and Frank Dyson have gotten the results they claimed? Did the pacifist Eddington falsify evidence to foster peace after a horrific war by validating the theory of a German antiwar campaigner? In *No Shadow of a Doubt*, Daniel Kennefick provides definitive answers by offering the most comprehensive and authoritative account of how expedition scientists overcame war, bad weather, and equipment problems to

When Jack St. Bride arrives by chance in the sleepy New England town of Salem Falls, he decides to reinvent himself. Tall, blond, and handsome, Jack was once a beloved teacher and soccer coach at a girls' prep school—until a student's crush sparked a powder keg of accusation and robbed him of his reputation. Now, working for minimum wage washing dishes for Addie Peabody at the Do-Or-Diner, Jack buries his past, content to become the mysterious stranger who has appeared out of the blue. With ghosts of her own

But as this unassuming stranger steps smoothly into the diner's daily routine, she finds him fitting just as comfortably inside her heart - and slowly, a gentle, healing love takes hold between them. Yet planting roots in Salem Falls may prove fateful for Jack. Amid the white-painted centuries-old churches, a quartet of bored, privileged teenage girls have formed a coven that is crossing the line between amusement and malicious intent. Suddenly nothing in Salem Falls is as it seems; a safe haven turns dangerous, an innocent girl meets evil face-to-face, a dishwasher with a Ph.D. is revealed to be an ex-con. As Jack's hidden past catches up with him, the seams of this tiny town begin to tear, and the emerging truth becomes a slippery concept written in shades of gray. returns to his mythological Falls, North Carolina, home of Widow. This first work in a decade offers three novellas mirroring today's face-lifted South, a zone revolutionized around freer sexuality, looser family ties, and superior telecommunications, yet it celebrates those locals who have chosen to stay local. In doing so, *Local Souls* uncovers certain old habits—adultery, incest, obsession—still very much alive in our New South, a "Winesburg, Ohio" with high-speed Internet. Wells Tower says of Gurganus, "No living writer knows more about how humans matter to each other." Such ties of love produce hilarious, if wrenching, complications: "Fear Not" gives us a banker's

In "Saints Have Mothers," a beloved high school valedictorian disappears during a trip to Africa, granting her ambitious mother a postponed fame that turns against her. And in a dramatic "Decoy," the doctor-patient friendship between two married men breaks toward desire just as a biblical flood shatters their neighborhood and rearranges their fates. Gurganus finds fresh pathos in ancient tensions: between marriage and Eros, parenthood and personal fulfillment. He writes about erotic hunger and social embarrassment with Twain's

The rich civilizations of ancient China and Greece built sciences of comparable sophistication-each based on different foundations of concept, method, and organization. In this engrossing book, two world-renowned scholars compare the cosmology, science, and medicine of China and Greece between 400 B.C. and A.D. 200, casting new light not only on the two civilizations but also on the evolving character of science. Lloyd and Nathan Sivin investigate the differences between the thinkers in the two civilizations: what motivated them, how they understood the cosmos and the human body, how they were educated, how they made a living, and whom they argued with and why. The authors' new method integrally compares social, political, and intellectual patterns and connections, demonstrating how all affected and were affected by ideas about

cosmology and the physical world. They relate conceptual differences in China and Greece to the diverse ways that intellectuals in the two civilizations earned their living, interacted with fellow inquirers, and were involved with structures of authority. By A.D. 200 the distinctive scientific strengths of both China and Greece showed equal potential for theory and practice. Lloyd and Sivin argue that modern science evolved not out of

the Greek tradition alone but from the strengths of China, Greece, India, Islam, and other civilizations, which converged first in the Muslim world and then in Renaissance Europe.

a servant in the household of the renowned Dr. Samuel Johnson. Although Barber left London for a time and served in the British navy during the Seven Years' War, he later returned to Johnson's employ. A fascinating reversal took place in the relationship between the two men as Johnson's health declined and the older man came to rely more and more upon his now educated and devoted companion. When Johnson died he left the bulk of his estate to Barber, a generous (and at the time scandalous) legacy, and a testament to the depth of their friendship. There were thousands of black Britons in the eighteenth century, but few accounts of their lives exist. In uncovering Francis Barber's story, this book not only provides insights into his life and Samuel Johnson's but also opens a window onto London when slaves had yet to win their freedom.

Across the vast ocean sailed Victoria Seaton, a free-spirited American beauty left suddenly orphaned and alone. Eager to claim her long-lost heritage, she was amazed at the formal elegance of Wakefield, the sumptuous English estate of her distant cousin...the notorious Lord Jason Fielding. Sought after at plays, operas, and balls by London's most fashionable ladies, Jason remained a mystery to Victoria. Bewildered by his arrogant demeanor, yet drawn to his panther-like grace, she came to sense the searingly painful memories that smoldered in the depths of his jade-green eyes. Unable to resist her spitfire charm, Jason gathered her at last into his powerful arms, ravishing her lips with his kisses, arousing in her a sweet, insistent hunger. Wed in desire, they were enfolded in a fierce, consuming joy, free at last from the past's cruel grasp. Then, in a

This provocative book exposes the dictator's preoccupation with his private persona, which was shaped by the aesthetic and ideological management of his domestic architecture. Hitler's bachelor life stirred rumors, and the Nazi regime relied on the dictator's three dwellings—the Old Chancellery in Berlin, his apartment in Munich, and the Berghof, his mountain home on the Obersalzberg—to foster the myth of the Führer as a morally upstanding and refined man. The #1 New York Times bestselling investigative story of how three successive presidents and their military commanders deceived the public year after year about America's longest war, foreshadowing the Taliban's recapture of Afghanistan, by Washington Post reporter and three-time Pulitzer Prize finalist Craig Whitlock. Unlike the wars in Vietnam and Iraq, the US invasion of Afghanistan in 2001 had near-unanimous public support. At first, the goals were straightforward and clear: defeat al-Qaeda and prevent a repeat of 9/11. Yet soon after the United States and its allies removed the Taliban from power, the mission veered off course and US officials lost sight of their original objectives. Distracted by the war in Iraq, the US military become mired in an

unwinnable guerrilla conflict in a country it did not understand. But no president wanted to admit failure, especially in a war that began as a just cause. Instead, the Bush, Obama, and Trump administrations sent more and more troops to Afghanistan and repeatedly said they were making progress, even though they knew there was no realistic prospect for an outright victory. Just as the Pentagon Papers changed the public's understanding of Vietnam, The Afghanistan Papers contains "fast-paced and vivid" (The New York Times Book Review) revelation after revelation from people who played a direct role in the war from leaders in the White House and the Pentagon to soldiers and aid workers on the front lines. In unvarnished language, they admit that the US government's

strategies were a mess, that the nation-building project was a colossal failure, and that drugs and corruption gained a stranglehold over their allies in the Afghan government. All told, the account is based on interviews with more than 1,000 people who knew that the US government was presenting a distorted, and sometimes entirely fabricated, version of the facts on the ground. Documents unearthed by The Washington Post reveal that President Bush didn't know the name of his Afghanistan war commander—and didn't want to meet with him. Secretary of Defense Donald Rumsfeld admitted that he had “no visibility into who the bad guys are.” His successor, Robert Gates, said: “We didn't know jack shit about al-Qaeda.” The Afghanistan Papers is a “searing indictment of the deceit, blunders, and hubris of senior

Iakovos Papaioannou is perfection on every level, except for his unpronounceable name. And Harry can't stop herself from falling hard and fast for him. Iakovos knew his sister hired

her favorite band to perform at her birthday party, he's just not sure where this six-foot-tall, wild-haired, tempestuous woman fits in, or how she's already ended up in his bed—and in his heart. Harry is so not his type. She's as infuriating as she is intriguing, and she can't keep her hands off his butt. But she just may be the woman who knocks him off the world's most eligible bachelor list for good...

I should've never agreed to this arrangement... Thirty days ago, my boss (Mr. Wolf of Wall Street), came to me with an offer I couldn't refuse: Sign my name on the dotted line and pretend to be his

fiancée for one month. If I agreed, he would let me out of my employment contract with a "very generous" severance package. The rules were pretty simple: No intimate kissing, no actual sex. Just pretend to love each other for the press, even though I've secretly wanted to knock that sexy smirk off his face since the first day we met. I definitely didn't need to think twice about this. Each author was chosen, Professor Sutherland explains, because his or her books are well worth reading and are likely to remain so for at least another century. Sutherland presents these authors in chronological order, in each case deftly combining a lively and informative biographical

sketch with an opinionated assessment of the writer's work. Taken together, these novelists provide both a history of the novel and a guide to its rich variety. Always entertaining, and sometimes shocking, Sutherland considers writers as diverse as Daniel Defoe, Henry James, James Joyce, Edgar Allan Poe, Virginia Woolf, Michael Crichton, Jeffrey Archer, and Jacqueline Susann. Written for all lovers of fiction, Lives of the Novelists succeeds both as introduction and re-introduction, as Sutherland presents favorite and familiar novelists in new ways and transforms the less favored
