Killer Verse: Poems of Murder
and Mayhem is a spine-tingling
collection of terrifically creepy
poems about the deadly art of
murder. The villains and victims

who populate these pages range from Cain and Abel and Bluebeard and his wives to Lizzie Borden, Jack the Ripper, and Mafia hit men. The literary forms they inhabit are just as varied, from the colorful melodramas of old Scottish ballads to the hard-boiled poetry of twentieth-century noir, from lighthearted comic riffs to profound poetic musings on murder. Robert Browning, Thomas Hardy, W. H. Auden, Stevie Smith, Mark Doty, Frank Bidart, Toi Derricotte, Lynn Emanuel, and Cornelius Eady are only a few of the many poets, old and new, whose work

Transport Revolutions: Moving

People and Freight without Oil

sets out the challenges to our

growing dependence on transport

fuelled by low-priced oil. These

challenges include an early peak

in world oil production and

profound climate change resulting

in part from oil use. It proposes

responses to ensure effective,

secure movement of people and

goods in ways that make the best use of renewable sources of energy while minimizing environmental impacts. Transport Revolutions synthesizes engineering, economics, environment, organization, policy and technology, and draws extensively on current data to present important conclusions. The authors argue that land transport in the first half of the 21st century will feature at least two revolutions. One will involve the use of electric drives rather than internal combustion engines. Another will involve powering many of these drives directly from the electric grid - as trains and

trolley buses are powered today - rather than from on-board fuel.

They go on to discuss marine transport, whose future is less clear, and aviation, which could see the most dramatic breaks from current practice. With its expert analysis of the politics and business of transport, Transport Revolutions is essential reading for professionals and students in transport, energy, town planning and public policy.

"The Routledge Companion to Career Studies is an in-depth reference for researchers, students and practitioners looking for a comprehensive overview of the state of the art of career

studies. Split into five parts, with each part opening with a contextualising introduction, the volume looks at major areas of research within career studies and reflect on the latest developments in the area of theory, empirical studies and methodology. The books five parts cover (1) major theoretical and methodological debates and approaches to studying careers; (2) careers as dynamic, ongoing processes covering such issues as time, shaping careers, career outcomes and patterns, and the forces shaping careers; (3) the local, national, and global context of careers, (4) implementing career

research to design practical interventions in areas such as education, counselling, and national policy; and (5) a commentary on the current state of career scholarship and its future development as represented in this volume, by founding scholars in the field. This book will be a sourcebook for scholars studying careers, research students intending to take up the study of careers, and anyone - scholars and practitioners - with an interest not only in understanding careers, the factors shaping them and where they lead, but also in how this understanding might be used in

One of the central features in current educational reforms is a focus on learning outcomes. Many countries have established or revised standards to describe what teachers are supposed to teach and students are expected to learn. More recently, the emphasis has shifted to considerations of how standards can be operationalized in order to make the outcomes of educational efforts more tangible. This book is the result of a symposium held in Kiel, that was arranged by two science education groups, one at the IPN (Leibniz-

Institute for Science and Mathematics Education at the University of Kiel) in Germany and the other at the University of York, UK. The seminar brought together renowned experts from 12 countries with different notions of the nature and quality of learning outcomes. The aim was to clarify central conceptions and approaches for a better understanding among the international science education community. The book is divided into five parts. In Part A, the organizers set the scene, describing the rationale for arranging the symposium. Part B provides a broad overview about different approaches, challenges, and pitfalls on the road to the clarification of meaningful and fruitful learning outcomes. The set

of papers in Part C provides deep insights into different, although comparable approaches which aim to frame, to assess, and to promote learning and learning outcomes in science education. Smaller projects are presented as well as broad, coordinated national programs. The papers in Part D outline the individual historical development from different national perspectives, reflecting the deficits and problems that led to current reforms. Finally, a summary of the organizers analyses the conclusions from different vantage points.

functions, markets and fields of application, which has changed the way companies operate and consumers perceive and process media content. These transformations have not only led business practices to change and required companies to adapt to new conditions, they also continue to have a lasting impact on research in this area. This book's main purpose is to shed some light on crucial phenomena of media and convergence management, while also addressing more specific issues brought about by innovations related to media, technologies, industries, business models, consumer behavior and content management. sexual awakening, this book shares true stories from 20 visionary pioneers in the sexual shamanism movement, all of them associated with the International School of Temple Arts (ISTA), a mystery school that works to illuminate the path of sexual shamanism and heal the split between sex and spirit, release the shame surrounding sexual awakening, and inspire more sexual liberation around the world. The teachers reveal intimate details of their life stories and sexual awakening journeys, showing how, by surrendering to the wisdom of the erotic current of the universe, transformation occurs. Each story is accompanied by an in-depth embodiment exercise with step-by-step instructions, including soul gazing, contacting your spirit guides,

"This is a personal matter. Someone killed my brother. I don't like that. If the police can't take care of it, then I'll bury my own dead." Nick English meant every word, but his efforts to find his brother's killer started a chain

reaction of murder and violence that would nearly end his own life. Here is a story of organized blackmail punctuated by sudden and gruesome murder. Written with the punch and speed of a rivet gun, I'll Bury My Dead confirms James Hadley Chase's reputation as a leading writer of all-action, edge-of-your-seat thrillers that demand to be read in a single sitting.

The demise of state Socialisms caused radical social, cultural and economic changes in Eastern Europe. Since then, young people have been confronted with fundamental disruptions and transformations to their daily

environment, while an unsettling, globalized world substantially reshapes local belongings and conventional values. In times of multiple instabilities and uncertainties, this volume argues, young people prefer to try to adjust to given circumstances than to adopt the behaviour of potential rebellious, adolescent role models, dissident counter-cultures or artistic breakings of taboo. Eastern European Youth Cultures in a Global Context takes this situation as a starting point for an examination of generational change, cultural belongings, political activism and everyday practices of young

people in different Eastern European countries from an interdisciplinary perspective. It argues that the conditions of global change not only call for a differentiated evaluation of youth cultures, but also for a revision of our understanding of 'youth' itself - in Eastern Europe and beyond.

When the 1st German Inverted Classroom Conference was staged in 2012, the organizers thought that it may have been the first and last conference of this kind: Too few teachers seemed to be familiar with this model in the first place and only a tiny fragment of them would actually apply

this model to their own teaching scenarios. However, in the 2013 conference, we were overwhelmed with a large number of teachers who not only wanted to find out about this teaching and learning concept but had already used it.

Consequently, the focus of the 2nd German Inverted Classroom Conference to which this conference volume is dedicated was no longer the “installation” of the Inverted Classroom Model (ICM) but fine adjustments in the actual application of it. This is reflected in the contributions to this volume. Even though all three central aspects of the ICM are

addressed, (1) content production and delivery, (2) testing, and (3) the in-class phase, there has been a shift away from mere content production towards an expansion of the model as well as a move towards fine adjustments of the three components.
