Learning is among the most basic of human activities. The study of learning, and research into learning is becoming a central part of educational studies. This is a comprehensive introduction to

Remarkably, this is its first, long overdue publication in English. Eco's approach is anything but dry and academic. He not only offers practical advice but also considers larger questions about the value of the thesis-writing exercise. How to Write a Thesis is unlike any other writing manual. It

reads like a novel. It is opinionated. It is frequently irreverent, sometimes polemical, and often hilarious.

Eco advises students how to avoid “thesis neurosis” and he answers the important question “Must You Read Books?” He reminds students “You are not Proust” and “Write everything
