evolutionary process
Answer Key
has provided a power

of information that

can address key

questions such as -

Which immune

molecules and

pathways are

conserved across

species? Which

molecules and

pathways are

exploited by

Read PDF
Relationships And
Biodiversity Lab

pathogens to cause
disease? What

methods can be
broadly used or
readily adapted for
wild immunology?

How does co-infection
and exposure to a
dynamic environment
affect immunity?

Section 1 addresses
these questions
through an

Read PDF
Relationships And
Biodiversity Lab
evolutionary
Answer Key

approach. Laboratory mice have been instrumental in dissecting the nuances of the immune system. The first paper investigates the immunology of wild mice and reviews how evolution and ecology sculpt differences in the immune responses

Read PDF

Relationships And

Biodiversity Lab

of wild mice and
laboratory mice. A

better understanding
of wild immunology is
required and sets the
scene for the
subsequent papers.

Although nature
doesn't ask for a fee, it
is appropriate that
nature is repaid in one
form or another. The
translational theme of

Read PDF
Relationships And
Biodiversity Lab
Answer Key

the second section incorporates papers that translate wild immunology back to nature. But any non-human, non-laboratory mouse research environment is hindered by a lack of research tools, hence the underlying theme throughout the second section.

Read PDF

Relationships And

Biodiversity Lab

Answer Key

Physiological resource allocation is carefully balanced according to the most important needs of the body.

Tissue homeostasis can involve trade-offs between energy requirements of the host and compensatory mechanisms to respond to infection.

Read PDF
Relationships And
Biodiversity Lab
Answer Key

The third section comprises a collection of papers that employ novel strategies to understand how the immune system is compensated under challenging physiological situations. Technology has provided substantial advances in understanding the

Read PDF

Relationships And

Biodiversity Lab

Answer Key
immune system at
cellular and molecular

levels. The specificity
of these tools (e.g.
monoclonal

antibodies) often

limits the study to a

specific species or

strain. A consequence

of similar genetic

sequences or cross-

reactivity is that the

technology can be

interaction between human beings and the biosphere.

From global-scale variation in the distribution of light reaching the Earth's surface to the smallest chemical gradients, environmental heterogeneity, or variation in environmental

Read PDF

Relationships And

Biodiversity Lab

Answer Key

conditions over space and time, is critical to explain process and pattern in nature.

Environmental heterogeneity has long been

hypothesized to promote species coexistence by allowing niche partitioning.

Organisms respond to heterogeneity in

Read PDF

Relationships And

Biodiversity Lab

Answer Key

abiotic environmental conditions at several scales, interactions between organisms can be mediated by heterogeneity, and organisms themselves can generate additional heterogeneity that may be important for the structure of communities.

Importantly, how

Read PDF
Relationships And
Biodiversity Lab
Answer Key

environmental heterogeneity interacts with biodiversity remains an important challenge to predicting the ecosystem functioning. Moreover, given that environmental conditions and ecological process change across scales

Read PDF

Relationships And

Biodiversity Lab

of space and time,
Answer Key
investigating how

heterogeneity

influences ecological

communities – both

directly by modifying

habitat quality and

indirectly by modifying

interactions – across a

range of scales is

necessary if we want

to make predictions in

community ecology.

Ecologists often

Read PDF

Relationships And

Biodiversity Lab

Answer Key

observe and measure communities at a single scale, which often not the scale at which processes take place, so defining appropriate scales for inquiry can be challenging. If a single scale is chosen, ecologists must consider the natural history of their systems that relate to

Read PDF
Relationships And
Biodiversity Lab
Answer Key

the patterns and processes being investigated.

However, the ability of ecologists to view systems at several scales at once is improving with technological advances. My goal with this dissertation was to take what we already know about biodiversity

Read PDF

Relationships And

Biodiversity Lab

Answer Key

maintenance and ecosystem functioning and extend it to multiple trophic levels, habitats, and scales of observation, all of which are important to our general understanding of community ecology. The real world is messy, which makes the job of a community ecologist

Read PDF
Relationships And
Biodiversity Lab

simultaneous
Answer Key
fascinating and
frustrating. However,
by considering some
of the complexities
inherent in natural
systems (including
how they might
change across scale)
I aim to help in
pushing biodiversity
science into the 21st
Century. All of the
following chapters

Read PDF

Relationships And

Biodiversity Lab

Answer Key

explore some aspect of environmental heterogeneity and how it either influences biodiversity or interacts with it to determine some important ecological process. Chapter 1 explores temporal variation in a major environmental gradient in marine habitats, water flow,

Read PDF

Relationships And

Biodiversity Lab

Answer Key
and how it interacts
with species diversity
of suspension feeding
invertebrates to
predict community-
wide water filtration. I
manipulated species
diversity of
suspension feeders
and the presence of
water flow directly in
the lab and allowed
communities to
consume a diverse

Read PDF

Relationships And

Biodiversity Lab

mélange of
phytoplankton. By
tracking chlorophyll a
concentrations over
time, I was able to get
a proxy for water
filtration taking place
at the community-
level. Species
diversity enhanced
community filtration,
and this response did
not depend on
whether water was

Read PDF
Relationships And
Biodiversity Lab
Answer Key

flowing or not.

However, individual species and pairs did respond to flow, so these results suggest that interactions between organisms and their modification of water flow may be important for predicting food delivery and ultimately water filtration over time. The balance of

Read PDF

Relationships And

Biodiversity Lab

Answer Key

competition and niche complementarity appeared to change across flow regimes, which brings species interactions, and their sensitivity to environmental conditions, to the forefront. Chapter 2 investigates a common form of spatial heterogeneity on a rocky shore,

Read PDF

Relationships And

Biodiversity Lab

Answer Key

namely topography
generated by space-
holding barnacles and
how it interacts with
grazer species
diversity to drive algal
community
succession. This
chapter was part of a
project started by
Kristin Aquilino in
which we
simultaneously
manipulated barnacle

Read PDF

Relationships And

Biodiversity Lab

cover and snail grazer
diversity at small

scales relevant to

seaweed-grazer

interactions. Then we

tracked communities

over time as they

recovered from algal

clearing. The

presence and

heterogeneity of

barnacles along with

the diversity and

identity of grazing

Read PDF
Relationships And
Biodiversity Lab
Answer Key

invertebrates interacted to predict algal succession. Grazer diversity itself was important for suppressing early successional microalgae, while later successional macroalgae were promoted by the presence of a key limpet grazer. In the absence of this limpet

Read PDF

Relationships And

Biodiversity Lab

Answer Key
heterogeneity in
barnacle cover led to
increased algal
accumulation. Again,
species interactions
and the potential for
niche

complementarity
depended on habitat
heterogeneity, thus
the influence of
environment on
interactions remains
strong thread in the

Read PDF

Relationships And

Biodiversity Lab

Answer Key

dissertation. Chapter 3 also considers topographic heterogeneity on rocky shores, but this time focusing on how topography at different spatial scales modifies community structure during early succession. We have known for a long time that large elevation gradients on rocky

Read PDF

Relationships And

Biodiversity Lab

Answer Key

shores are critical for the distributions of organisms, but perhaps small scale environmental variation also matters for these communities as suggested by many previous studies. I decided to manipulate small-scale (mm) topography by making settlement plates that

Read PDF
Relationships And
Biodiversity Lab
Answer Key

mimicked real rock surfaces. Then I placed these plates across areas of mid-intertidal a rocky shore, which represented larger scale (cm to m) variation in topography, including differences in elevation and distance to shore. Importantly, both

Read PDF
Relationships And
Biodiversity Lab
Answer Key

scales of
environmental
heterogeneity
influenced community
composition, but in
different ways. Early
successional algae
responded more
strongly to the large-
scale heterogeneity
present along and
across the coastline,
while mobile
invertebrates

Read PDF
Relationships And
Biodiversity Lab
Answer Key

responded strongly to small-scale characteristics like rugosity and convexity. It is likely then that small-scale heterogeneity can have a driving influence on algal distributions indirectly through the grazing behaviors of invertebrate animals, but once again this

Read PDF

Relationships And

Biodiversity Lab

Answer Key

will depend on the traits of the grazers (e.g., body size) and how they interact with heterogeneity. One conceptual result that helps tie all of these chapters together is that in order for environmental heterogeneity to be important to ecological communities, the

Read PDF

Relationships And

Biodiversity Lab

Answer Key

scale at which heterogeneity occurs must match response and effect traits of the organisms living within the community. Body size and the way organisms of a particular size respond to, and potentially modify, their abiotic surroundings play a role in every chapter,
