In companies that produce goods and services, productivity and efficiency
improvements are a constant challenge. This book reviews the differences between
productivity and efficiency. It proposes a new method and makes available a
computational tool for implementation that contributes to facilitating the use of Data
Envelopment Analysis (DEA). The book presents a discussion about productivity and
efficiency, illustrating the potentials of use and conceptual differences. It covers the
concepts and techniques for analysis of productivity and efficiency, analyzing critical
benefits and limitations, explains in detail how to use DEA for analysis, provides
innovative methods for using DEA, offers a free online computer tool with a direction

guide, shows real empirical applications, and covers other techniques that can be used to complement the analysis performed. The book is for professionals, managers, consultants, students working and taking courses in productive systems of goods and services. Ancillary materials include a free online computer tool to operationalize the concepts and methods proposed in the book, a guide on how to use the method and the software developed for the DEA application. Solutions manual, instructor's manual, PowerPoint slides, and figure slides also will be available upon qualified adoption.

Motor Body, Paint and Trim

This book presents a panorama about the recent progress of industrial mathematics from the point of view of both industrials and researchers. The chapters correspond to a selection of the contributions presented in the "Industry Day" and in the Minisymposium "EU - MATHS - IN: Success Stories of Applications of Mathematics to Industry" organized in the framework of the International Conference ICIAM 2019 held in Valencia (Spain) on July 15-19, 2019. In the Industry Day, included for the first time in this series of Conferences,

representatives of companies from different countries and several sectors presented their view about the benefits regarding the usage of mathematical tools and/or collaboration with mathematicians. The contributions of this special session were addressed to industry people. Minisymposium contributions detailed some collaborations between mathematicians and industrials that led to real benefits in several European companies. All the speakers were affiliated in some of the European National Networks that constitute the European Service Network of Mathematics for Industry and Innovation (EU-MATHS-IN).

Covers all models of Alliance, Encore, Fuego, Gordini, LeCar R-12, R-15, R-17, R-18, R-18i and SportWagon.

The immense, global transportation and logistics sector is vital to businesses of all types.

This carefully-researched book covers exciting trends in supply chain and logistics

management, transportation, just in time delivery, warehousing, distribution, intermodal shipment systems, logistics services, purchasing and advanced technologies such as

RFID. This reference tool includes thorough market analysis as well as our highly respected trends analysis. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. It contains thousands of contacts for business and industry leaders, industry associations, Internet sites and other resources. This book also includes statistical tables, an industry glossary and thorough indexes. The corporate profiles section of the book includes our proprietary, in-depth profiles of the 500 leading companies in all facets of the transportation and logistics industry. Here you'll find complete profiles of the hot companies that are making news today, the largest, most successful corporations in the business. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.

Originally published in 1959, this book was one of the first to give a comprehensive view of the motor industry from an economic standpoint. Although the book concentrates on the UK motor industry, many references are made to that of the USA and other leading automobile manufacturers. Among the subjects discussed are the structure of the British motor industry, the demand for vehicles, the structure of costs, economies of large-scale production, the nature of competition and profits and sources of funds.
