"This book uses a case study methodology with quantitative and qualitative elements, and draws on interviews with senior policy-makers in government departments and the chief executives of selected agencies." "The role of government departments, in establishing agencies and working in an increasingly agencified environment, is crucial. It appears that policy-making is relatively unchanged, which calls into question the openness of government departments to expert body advice." "The book concludes that the contribution of agencies is not significant in policy advice. Therefore, agencification may not be the most appropriate institutional response to social inclusion problems."--BOOK JACKET.

As with executives and managers in so many other business functions, pricing specialists are being challenged more and more to substantiate the added value of their activities.

Pricing is a core function of every business, and needs not only to contribute positively to short- and long-term results, but also to document its impact to the bottom line. A fundamental part of this is the pricing ROI calculations. This book, edited by globally renowned thought leaders Andreas Hinterhuber and Stephan Liozu, is the first to outline contemporary theories and best practices of documenting

pricing ROI. It provides proven methods, practices and theories on how to calculate the impact of pricing activities on performance. Scores of books and articles have been written in the popular press and mainstream marketplace about leadership: who leaders are, what they do, and why they matter. Yet in academia, there is a dearth of rigorous research, journal articles, or doctoral programs focused on leadership as a discipline. Why do top business schools espouse mission statements that promise to "educate the leaders of the future"- yet fail to give leadership its intellectual due? The Handbook of Leadership Theory and Practice seeks to bridge this disconnect. Based on the Harvard Business School Centennial Colloquium "Leadership: Advancing an Intellectual Discipline" and edited by HBS professors Nitin

Nohria and Rakesh Khurana, this volume brings together the most important scholars from fields as diverse as psychology, sociology, economics, and history to take stock of what we know about leadership and to set an agenda for future research. Featuring the thinking of today's most renowned scholars, the Handbook of Leadership Theory and Practice will be a catalyst for elevating leadership to a higher intellectual plane - and help shape the research agenda for the next generation of leadership scholars.

Corporate Political Behavior centers on why corporations do what they do in politics. The text draws upon insights from the author's forty years of government and political

Online Library Request Meeting With Ceo

experience—insights placed within an operating framework grounded in the political science and strategic issue management disciplines. Robert Healy argues that corporate political behavior results from the interplay of behavioral drivers—commercial objectives, competitive political advantage, corporate political culture and leadership—and behavioral enablers—political capital, corporate political reputation, corporate campaign financing, and corporate political clout. This interplay all functions within a three-world environment: market, non-market, and internal corporate. The book examines how these factors structure

a firm's political positioning, its business-political strategies, and its political behavior as it seeks to attain its marketplace goals. The text features in-chapter side bars— events, or circumstances or political happenings of which the author either knew or participated—along with longer mini-cases in which the author also participated or was consulted. Each chapter concludes with a summary and takeaway points.
