This research project investigates the governing of Europe's external border. It analyses how the common Schengen short-stay visa policy has been applied in practice by member states in the period from 2005 to 2010. So far, little systematic theoretical and empirical research has been carried out on the implementation of Schengen. The contributions of the thesis

Online Library Requirements For A Schengen Visa Germany

are two-fold. Firstly, it makes available a comprehensive and easily accessible database on the visa requirements, issuing-practices and consular representation of EU states in all third countries. It enables researchers to map out and compare how restrictively the visa policy is implemented by different member states and across sending countries. Secondly, the project provides three separate papers that in different ways make use of the database to explore and explain the varying

openness of Europe's border and dynamics of cooperation among member states. The three papers are tied together by a framework conceptualising Schengen as a border regime with two key dimensions: restrictiveness and integration. The first paper asks to what extent, and why, Europe's border is more open to visitors of some nationalities rather than others. The second paper investigates to what extent, and why, EU states cooperate on sharing consular facilities in the

visa-issuing process. The third paper examines to what extent, and why, Schengen participation has a restrictive impact on the visa-issuing practices of member countries. The analyses test existing theories and develop new concepts and models. The three papers engage with rationalist and constructivist theories and seek to assess their relative explanatory power. In doing so, the project makes use of different quantitative comparative approaches. It employs regression analysis, social

network analytical tools and quasi-experimental design. Overall, the thesis concludes that Schengen is characterized by extensive cooperation and restrictive practices towards especially visitors from poor, Muslim-majority and refugee-producing countries.

The increasing internationalization of business leads to a cornucopia of differing cross-border exchanges in one's daily work.

Participants and other beneficiaries of this internationalization include

not only multi-national companies but also SMEs (small and mid-sized enterprises), for which the increased global market access offers substantial opportunities. With the growth of internationalization, too, comes an increase in employee assignments. In business practice, the number of questions from foreign companies, management, HR, tax and legal professionals, investors and non German employees etc., is growing. In order to be certain that sending

employees to or from Germany on work assignments can take place as smoothly and efficiently as possible, relevant questions asked by companies and workers need to be taken into consideration. This text does just that with a focus on answering common expat-relevant questions posed by professionals. It is a reference work for those foreigners subject to and applying German law. The Commission is proposing the digitalisation of the Schengen visa process: - introducing the ability to submit Schengen visa applications online through a European online visa platform, - replacing the visa sticker with a digital visa.

Since 1999, the EU has adopted legislation harmonizing many areas of immigration law, in particular rules on borders, visas, legal migration, and irregular

migration. The much-enlarged and fully updated second edition of this book contains the text of and detailed commentary upon every significant measure in this field proposed or adopted up until 1 September 2011. It includes commentary on the EU visa code, the Schengen Borders Code, the Frontex Regulation, the Returns Directive, the Directives on family reunion, long-term residents and single permits for migrant

workers, and many more besides. This is the essential guide for any lawyers, academics, civil servants, NGOs and students interested in this area of law.

The book focuses on the common visa policy as a case study on the constitutional structure of the European Union. After introducing the nature of visas, the book concentrates on the difficulties in forging a common visa policy at European level.

Cooperation on visas has

been characterized by a continuous reformulation of the framework for cooperation. The book describes cooperation before the Treaty on European Union adopted at Maastricht, under the Maastricht Treaty, and under the Treaty of Amsterdam. Furthermore, the book traces the essential characteristics of the common visa policy.

The upheavals of the Arab Spring grabbed the world's immediate attention, and concern quickly grew over their potential aftermath, with the fear that a 'tidal wave' of immigrants and refugees would 'flood' European territory. The Arab Spring has highlighted the Mediterranean as a migration region, and new research is now required to bring to light too often neglected mobility patterns and border practices that predate and outlast

the tumultuous spring of 2011. The edited volume *Space, Mobility and Borders in the Western Mediterranean* tackles these contemporary issues related to migration in the Mediterranean region. It brings together high-quality, original academic contributions from both empirical and theoretical points of view by scholars from diverse disciplines, who draw upon Anglophone, Francophone, Spanish and Italian research. It reexamines borders in the light of a now full-blown body of literature that seeks to capture the complexity of their contemporary features beyond their most direct visual

enactments, in particular the sweeping deployment of policing devices and operations along the North/South fault line. Another distinctive binding thread in this book is that it emphasizes migrants as active subjects interacting with local events, national policies and the bordering process. Offering an examination of the intricate interplay among the events of the Arab Spring, migration's multiple types and actors, and the evolving relationship between migration control and borders in the region, this book is an essential resource for students and scholars of migration studies,

Union Structure

This book focuses on the Visa Information System (VIS): a large-scale data infrastructure interconnecting a multiplicity of state authorities that enact border security and migration management in the European Union. The VIS is embedded within a setting of pan-European IT systems that filter international mobility, identify threatening elements, hamper the travels of poor, racialized, and alienated subjects, while at the same time facilitate the circulation of those expected to generate financial and other kinds of capital. The book examines the engineering of the VIS by analyzing how it was designed before its deployment in the field of border security, and how it is maintained to ensure continuous and

secure operation. It illustrates how engineering processes that render the VIS functional are not just technoscientific, but inherently political, as they (re)configure and maintain the power to govern international mobility by digital means. It presents a comprehensive study of the emerging pan-Euro-Mediterranean regional integration and analyses the economic, political and social strategies adopted by the EU and will be an indispensable reference work for those working on issues related to EU enlargement and integration.

into the complex and contradictory world of migration regulation and control, covering the wide range of different policy approaches that aim to control the entry and residence of non-EU citizens. Revealing the common framework, tendencies, and policy convergences brought about less by design than a common concern about migration's impact on the future of the EU, Modes of Migration Regulation and Control in Europe questions the effectiveness of

This book explores the everyday practices of border control and implementation of mobility policy in the European Schengen area by analyzing consular visas services on the edges of the territory. Using an original case study, private contractors that implement EU visa policy on governments' behalf, the author focuses on visa application

centers located in Morocco and run by the two major contractors of European Member States, the transnational corporations VFSGlobal and TLSContact. The analysis builds on ethnographic research that encompasses the making of EU visa policy at the European, national and local levels. It aims at uncovering the reasons that have led to the adoption of outsourcing as a normal and legitimized mode to implement EU visa policy and the effects of that choice.

We take stock of the Schengen Agreement that celebrated its

30th birthday on June 14th, 2015. We argue that the abolition of internal border controls in most European Union member states is rightly considered a blessing to EU citizens.

Internally, the Agreement facilitates social and economic interactions without impeding the security of EU citizens.

Externally, the Schengen Agreement has also helped to spread liberal norms and promote EU policies across EU borders, whenever Schengen borders prove permeable enough to allow for legal migration or if the relaxation of Schengen visa requirements is

Online Library Requirements For A Schengen Visa Germany

used as a carrot to trigger reforms in EU candidate and neighboring countries. The recent humanitarian crisis at the EU borders reveals that the Schengen system still lacks an appropriate joint asylum policy to counterbalance the loss of internal border controls. This weakness may undermine one of the main achievements of European integration. This Policy Brief revisits the accomplishments of 30 years of Schengen. We first ask how Schengen has affected member states and their citizens and which effects it has exerted on non-Schengen states outside of

the EU's borders. We subsequently elaborate on appropriate reforms of a communitarized asylum policy that is needed to safeguard the accomplishments of the Schengen Agreement in the future.

When immigration policy and the treatment of Roma collide in international relations there are surprising consequences which are revelatory of the underlying tensions between internal and external policies in the European Union. This book examines the relationship of citizenship, ethnicity and international relations and how these three

Online Library Requirements For A Schengen Visa Germany

aspects of the State, its people and its neighbours relate to one another. It studies the wide issue of international relations, citizenship and minority discrimination through the lens of the case study of European Roma who seek refugee status in Canada on account of their persecution in Europe. The volume assesses the relationships among citizenship, state protection and persecution and minority status, and how they can intersect with and destabilize foreign affairs. The central background to the book is the European treatment of Roma, their linkages with visa

and asylum policies and their human rights repercussions .

The various contributions reveal how modern liberal democracies can find themselves in contradictory positions concerning their citizens - when these are looking for protection abroad - and foreigners - in search of international protection - as a consequence of visa and pre-border surveillance policies and practices.

Policies and Implementation in
Consulates

The constitution of the
European visa regime has
deservingly received much
scholarly attention. It has been
analyzed as part of the policy
toolkit that displaces migration
control away from the edges of
the territory of Europe.

Nevertheless, the street-level
implementation of this
European policy in national
consulates remains
understudied. This dissertation

Online Library Requirements For A Schengen Visa Germany

sheds ethnographic light on Schengen visa policy implementation that is conceptualized as bordering policy. By delivering Schengen visas, state and nonstate organizations achieve the filtering work of borders; this dissertation therefore investigates the day-to-day bordering of Europe abroad and using a comparative approach and focusing on from the theoretical perspective of street-level policy implementation. The analysis builds on a comparative case study: it focuses on the visa sections of the consulates of two old immigration countries,

Online Library Requirements For A Schengen Visa Germany

Belgium and France, and one new immigration country, Italy, which implement visa policy in a same third country, i.e. Morocco. This study highlights cross-national differences of visa policy day-to-day implementation that are due to shifting historical backgrounds, national sense-making of visa policy, and distinct organizational conditions. However, the comparative research design and the inductive epistemological approach deployed have revealed processes of transfer at the implementation level, which result in transnational policy-

topic of controlling the borders of the European Schengen Area. It considers the state perspective on border regulation, subjecting day-to-day practices of EU visa policy implementation to close analytical scrutiny. The objects of the analysis are three European Member States—France, Belgium, and Italy—that implement EU visa policy in Morocco, a country whose nationals are considered to be a migratory ‘risk’ for the EU. The book focuses on the implementation of EU visa policy in the consulates of Belgium, France and Italy in Casablanca. The

empirical research and the comparative perspective make this book distinct. The book uses a 'comprehensive implementation approach' by taking account of the local, national and supranational locations of policy-making. It builds on in-depth pioneering fieldwork and a comparative research design that includes those three locations. The research design has determined the evolving of the puzzle and the realizing of the unanticipated: cross-national differences diminish when policy is put into practice. Extensive research into the visa sections of those EU

Rethinking People in the Context of Border Controls and Visas

In recent years the borders of Europe have been perceived as being besieged by a staggering refugee and migration crisis. The contributors to *The Borders of "Europe"* see this crisis less as an incursion into Europe by external conflicts than as the result of migrants exercising their freedom of movement. Addressing the new technologies and technical forms European states use to curb, control, and constrain what contributors to the volume call the autonomy of migration, this book shows how the continent's amorphous borders present a premier site for the enactment and disputation of the very

idea of Europe. They also outline how from Istanbul to London, Sweden to Mali, and Tunisia to Latvia, migrants are finding ways to subvert visa policies and asylum procedures while negotiating increasingly militarized and surveilled borders. Situating the migration crisis within a global frame and attending to migrant and refugee supporters as well as those who stoke nativist fears, this timely volume demonstrates how the enforcement of Europe's borders is an important element of the worldwide regulation of human mobility.
