The New York Times bestselling author of Being Mortal and Complications reveals the surprising power of the ordinary checklist We live in a world of great and increasing complexity, where even the most expert professionals struggle to master the tasks they face. Longer training, ever more advanced technologies—neither seems to prevent grievous errors. But in a hopeful turn, acclaimed surgeon and writer Atul Gawande finds a remedy in the humblest and simplest of techniques: the checklist. First introduced decades ago by the U.S. Air Force, checklists have enabled pilots to fly aircraft of mind-boggling sophistication. Now innovative checklists are being adopted in hospitals around the world, helping doctors and nurses respond to everything from flu epidemics to avalanches. Even in the immensely complex world of surgery, a simple ninety-second variant has cut the rate of fatalities by more than a third. In riveting stories, Gawande takes us from Austria, where an emergency checklist saved a drowning victim who had spent half an hour underwater, to Michigan, where a cleanliness checklist in intensive care units virtually eliminated a type of deadly hospital infection. He explains how checklists actually work to prompt striking and immediate improvements. And he follows the checklist revolution into fields well beyond medicine, from disaster response to investment banking, skyscraper construction, and businesses of all kinds. An intellectual adventure in which lives are lost and saved and one simple idea makes a tremendous difference, The Checklist Manifesto is essential reading for anyone working to get things right.

This study had a research purpose and a pedagogical purpose. Research disclosed the dynamic, changing nature of (learner-internal and learner-external) variables that influence strategic competence for developing EFL/ESL writers. This competence was found necessary for international graduate students to move from writer-centered learning to reader-centered communication. The research instruments proved to be practical tools for guiding learners' processes of learning and writing a scholarly paper or article and avoiding plagiarism. The implication for teachers and program administrators is a systematic approach for developing self-regulation (control) in EFL/ESL writing. The first part of the book reports on the mixed methods (quantitative and qualitative) research. The second part gives an in-depth report of the 6 cases used in the research. The third part presents tools for systematically developing self-regulation in scholarly (and academic) writing with (a) student and teacher checklists for formative assessment that are valid and reliable; and (b) a model syllabus for teachers that can be adapted across disciplines and genres. These tools deal with learning strategies and their applications to writing and writing instruction.

"These assessment tools make progress in writing as transparent, concrete, and obtainable as possible and put ownership for this progress into the hands of learners, allowing students and teachers to work toward a very clear image of what good writing entails." -Lucy Calkins, Writing Pathways Lucy Calkins' groundbreaking performance assessments offer instructional tools to support continuous assessment, timely feedback, and clear goals tied to learning progressions that have been aligned with world-class standards. Originally published as part of the bestselling Units of Study in Opinion/Argument, Information, and Narrative Writing, grades K-8, Writing Pathways is ideal for writing workshop, but suitable for any writing instruction context or curriculum. This practical guide includes: Learning progressions for

opinion/argument, information, and narrative writing, which map the specific benchmarks students will master for every grade level On-demand writing prompts that support schoolwide performance assessment Student checklists to help students set goals and integrate crucial self-assessment into their work Rubrics to support individual teachers and professional learning communities as they evaluate mastery and plan instruction within and across grade levels Student writing samples that illustrate different ways students have exemplified standards and highlight essential features of each writing genre Annotated exemplar pieces of writing on the same topic for every grade level that highlight the traits you can expect to see at each level of the learning progressions. Who needs Writing Pathways? Educators who are not yet ready to implement the full Units of Study curriculum can use Writing Pathways to get started with Lucy Calkins' proven approach to writing assessment and instruction. Coaches and administrators who are supporting implementation of Lucy Calkins' Units of Study will find Writing Pathways to be an ideal resource to guide their work. Who doesn't need Writing Pathways? The content in this stand-alone edition is the same as in the previous editions found in Lucy Calkins' Units of Study (K-5 and 6-8 are combined in this new edition). Teachers who have the Units of Study do not need this new edition.

State education departments and school districts face an important challenge in implementing a new law that requires disadvantaged students to be held to the same standards as other students. The new requirements come from provisions of the 1994 reauthorization of Title I, the largest federal effort in precollegiate education, which provides aid to "level the field" for disadvantaged students. Testing, Teaching, and Learning is written to help states and school districts comply with the new law, offering guidance for designing and implementing assessment and accountability systems. This book examines standards-based education reform and reviews the research on student assessment, focusing on the needs of disadvantaged students covered by Title I. With examples of states and districts that have track records in new systems, the committee develops a practical "decision framework" for education officials. The book explores how best to design assessment and accountability systems that support high levels of student learning and to work toward continuous improvement. Testing, Teaching, and Learning will be an important tool for all involved in educating disadvantaged students—state and local administrators and classroom teachers.

This invaluable guide offers step-by-step, research-based strategies that will help you increase your students' reading comprehension, strengthen writing skills, and build vocabulary across content areas. Ten Steps to the Perfect Research Paper is a must-have for every student. It is a common-sense systematic approach to writing that is backed by decades of experience. Using this ten-step method, Dr. Goring-Rodriguez is able to guide her students through the process of writing a research paper using a very creative approach—one that is extremely simple and straight forward. After following the steps in this guide, the student will gain a better understanding of how to select a research topic, conduct research, select appropriate research sources and write an excellent research paper.

Academic attention to science fiction and fantasy began in 1958, when the Modern Language Association scheduled its first seminar on science fiction at its New York meeting. Over the years science fiction emerged as a popular subject that achieved critical attention and acceptance as an academic discipline. A Research Guide to Science Fiction Studies, originally published in 1977, is designed to provide the reader – whether they be scholar, teacher, librarian, or fan – with a comprehensive listing of the important research tools that have been published in the United States and England through 1976. The volume contains over 400 selected, annotated entries covering both general and specialized sources, including general surveys, histories, genre studies, author studies, bibliographies, and indices, which span the entire range of science fiction and fantasy scholarship.

Strategies for Teaching Science, Levels K-5

A Checklist For Everything (eBook)

Research question(s): How will teaching the use of a graphic organizer and a checklist help struggling fourth and fifth grade students improve their structure and content of summary writing after reading a news article? (1) Will using Step Up to Writing strategies that are organized into one graphic organizer help the structure of students' summaries to include a topic sentence, details, and a conclusion? (2) Will using a checklist, which include the questions: who, what, where, when, why, and how, improve students' ability to recognize whether their summaries include the most important information from the news article reading? (3) Will using Step Up to Writing strategies that are organized into one graphic organizer help students'

ability to figure out a logical progression of ideas in their news article summaries? Research activities: Context: The study took place in combination class of fourth and fifth grade students at a public school in the Bay Area. The intervention was especially focused on five students. Two of the students were fourth grade students and three of the students were fifth grade students who were all struggling with summarization. Although I had English language learners in my class, these five students who were not English language learners were having the most trouble with summarizing articles. Methods and Data: The whole-class intervention lasted six weeks, but three of the weeks were an interruption due to the Winter Break. Each day varied between 45 minutes to an hour and a half depending on students' needs. The students were expected to use a graphic organizer created using Step Up to Writing strategies and a checklist in order to help students with their article summaries. The data sets used were the grading of summaries based on a rubric done as a pre- and a post-intervention assessment, attitudinal data found through a survey also done as a pre- and a post-assessment, and in-the-midst notes written daily. Results: Comparisons of baseline data to outcome data suggested that using a graphic organizer and a checklist improved students' ability to write an article summary. My target students improved their average score from a 4.8 to a 9.5. The class average improved from 6.8 to 9.8 out of a total of 12 points. The graphic organizer was able to assist students in organizing their ideas in a logical progression, help students create a topic sentence, conclusion sentence, and indicate where details are expected in a paragraph. The checklist helped students pull out the most important information of the article to include in their summary. Together, these two strategies led to drastic improvement in writing. Grade Level: 4 and 5. Data collection methods: Survey-attitude, Observation-Student engagement/behavior tallies, Student work, Writing samples, Writing assessment. Curriculum Areas: English Language Arts, Writing. Instructional Approaches: Graphic Organizer/concept maps and Writing-Summary.

Essential advice and resources for helping kids with dyslexia The Dyslexia Checklist is a valuable guide for parents and teachers that can help them better understand children and teenagers with dyslexia and other reading- and language-based disabilities. The book relays the most current research available and is filled with practical strategies, supports, and interventions. Using these tools teachers and parents can accommodate the needs and strengthen the skills of students with reading and writing disabilities across all age levels. The book is presented in a simple, concise, easy-to-read checklist format and is filled with useful advice and information on a wide range of topics. Explains what we now know about dyslexia from decades of research Contains games to strengthen a child's literacy and language skills Provides important information for hooking in reluctant and struggling readers Offers suggestions for enhancing skills in vocabulary, comprehension, composition and written expression, spelling, math, and more The book also provides information on the educational rights of students with dyslexia.

Research Question: How does the teaching of an organizational checklist and graphic organizers affect struggling second grade students in their informational writing? Sub Questions: (1) Would an organizational checklist lead to better informational writing? (more writing samples with a level 3 according to AUSD rubric); (2) Would a graphic organizer lead to better informational writing? (more writing samples with a level 3 according to AUSD rubric). Research Activities: This research focuses on teaching students to organize their writing better by using the Step Up to Writing approach. The students were introduced to a graphic organizer which they used throughout the inquiry. The students then were taught to use a writing checklist to help them organize and improve their writing skills. Context: The study took place in a self contained second grade classroom in a public school. The intervention was implemented with the whole class, but focused on four focus students. Out of the four students, one was an English language learner, whose primary language was Chinese. Methods

and Data: The intervention lasted a period of six weeks and incorporated a variety of writing activities to practice the tools being taught in the inquiry. In addition, peer work through the use of the writing checklist increased collaboration. Data sets include a pre and post writing assignment, an attitudinal survey and a series of observations. Results: The comparisons of pre and post intervention data indicate that the use of the graphic organizer and writing checklist positively increased students' scores. The writing activities, with the use of the writing tools improved the students' with the organization of their writing and their ability to focus on one topic. Using the checklist gave students the ability to work with one another creating a sense of responsibility. Grade Level: Second Grade. Data Collection Methods: Observation-behavior tallies, student work, Survey - attitude, writing assessment, writing samples. Curriculum Areas: English Language Arts, Writing. Instructional Approaches: Writing-Prompts, Writing-Organization, Writing-Explicit instruction, Writing-Peer response/feedback, Writing-Self-evaluation.

Using Strategic Inquiry to Improve Teaching and Learning

Developed for grades 6-12, this rich resource provides teachers with practical strategies to enhance science instruction. Strategies and model lessons are provided in each of the following overarching topics: inquiry and exploration, critical thinking and questioning, real-world applications, integrating the content areas and technology, and assessment. Research-based information and management techniques are also provided to support teachers as they implement the strategies within this resource. This resource supports core concepts of STEM instruction.

A Checklist for Everything! is chock-full of research-based checklists that meet national standards and promise to save you valuable time and energy. Checklists are effective as an assessment and reporting tool, to write a grant proposal, sit on a committee for curriculum change or search for a direct new way to inform parents. You will find exactly what you need in this book.

For courses in Research Writing, Documentation Writing, and Advanced Composition. Featuring an engaging, direct writing style and inquiry-based approach, The Curious Researcher: A Guide to Writing Research Papers emphasizes that curiosity is the best reason for investigating ideas and information. An appealing alternative to traditional research texts, this popular research guide stands apart for its motivational tone, its conversational style, and its conviction that research writing can be full of rewarding discoveries. Offering a wide variety of examples from student and professional writers, this popular guide shows that good research and lively writing do not have to be mutually exclusive. Students are encouraged to find ways to bring their writing to life, even though they are writing with "facts." A unique chronological organization sets up achievable writing goals while it provides week-by-week guidance through the research process. Full explanations of the technical aspects of writing and documenting source-based papers help students develop sound research and analysis skills. The text also includes up-to-date coverage of MLA and APA styles.

Action Research: Using Strategic Inquiry to Improve Teaching and Learning is a core text for the Action Research course in Education. The proposed text seeks to address the needs of practitioners as it will be primarily written for use within a graduate level action research class. It will be oriented towards proactive planning as part of an organized, efficient process for developing and conducting an action research study. The book will be organized around implementation of the action research process using self-regulatory principles, which is characterized by four phases: task definition, goal setting and planning, enacting, and adapting. These four phases will be addressed as the learner considers what action research encompasses and a topic to be studied, then proceeds to establish a plan and enact it. This overall process is organized as can be seen in the Table of Contents. Michael Putnam and Tracy Rock will highlight methods and processes that incorporate formative data that is readily available to teachers, facilitating associations

between classroom instruction and the action research process. The text will also reinforce how action research can improve the teaching and learning process by reinforcing or changing perceptions about the use of informal data, including anecdotal notes or observations, in the research process.

The third and final book in Stanley's three-volume group for all grade levels, this work simplifies teaching the research process with step-by-step instructions that are adaptable and comprehensive, geared especially for your youngest students. This study analyzes the website choices that English as a Second Language (ESL) students make when they choose authoritative information for academic purposes. For this study, students from four sections of ENGL 1110 for international students at the University of Toledo participated in a web information literacy course that took place during one of their class sessions. During this section, a website evaluation checklist, called the C.R.A.P. test, was explained to the students. This checklist is intended to be a guide that helps students choose credible (or authoritative) websites. After the web literacy class, each of the four classes participated in a different procedure in order to see which procedure was more effective in helping ESL students choose authoritative websites. Group A was requested to ask a professor for suggestions regarding what authoritative websites to use for their research paper. Group B was requested to use a librarian approved web portal. Group C was required to complete the C.R.A.P. website evaluation form for each website that they chose for research paper. Group D was the control group.
