'A comprehensive, well-written and beautifully organized book on publishing articles in the humanities and social sciences that will help its readers write forward with a first-rate guide as good company.' - Joan Bolker, author of *Writing Your Dissertation in Fifteen Minutes a Day* 'Humorous, direct, authentic ... a seamless weave of experience, anecdote, and research.' - Kathleen McHugh, professor and director of the UCLA Center for the Study of Women Wendy Laura Belcher's *Writing Your Journal Article in Twelve Weeks: A Guide to Academic Publishing Success* is a revolutionary approach to enabling academic authors to overcome their anxieties and produce the publications that are essential to succeeding in their fields. Each week, readers learn a particular feature of strong articles and work on revising theirs accordingly. At the end of twelve weeks, they send their article to a journal. This invaluable resource is the only guide that focuses specifically on publishing humanities and social science journal articles.

Understanding and Evaluating Research: A Critical Guide aims to sensitize students to the necessity of learning how not to defer to the mysterious authority of the experts, but rather to learn how to be a critical consumer of others' research, and to gain confidence in their ability to be producers of research. Sue McGregor shows students how to be research literate, and how to find, critique and apply other people's scholarship. This textbook is grounded in a solid understanding of the prevailing research methodologies for creating new knowledge (philosophical underpinnings), which in turn dictate problem posing, theory selection, and research methods (tasks for sampling, collecting and analyzing data, and reporting results).

NEW YORK TIMES BEST SELLER • A beautiful, arresting story about race and the relationships that shape us through life by the legendary Nobel Prize winner—for the first time in a beautifully produced stand-alone edition, with an introduction by Zadie Smith “A puzzle of a story, then—a game.... When [Morrison] called Recitatif an ‘experiment’ she meant it. The subject of the experiment is the reader.” —Zadie Smith, award-winning, best-selling author of *White Teeth* In this 1983 short story—the only short story Morrison ever wrote—we meet Twyla and Roberta, who have known each other since they were eight years old and spent four months together as roommates in St. Bonaventure shelter. Inseparable then, they lose touch as they grow older, only later to find each other again at a diner, a grocery store, and again at a protest. Seemingly at opposite ends of every problem, and at each other's throats each time they meet, the two women still cannot deny the deep bond their shared experience has forged between them. Another work of genius by this masterly writer, *Recitatif* keeps Twyla's and Roberta's races ambiguous throughout the story. Morrison herself described *Recitatif*, a story which will keep readers thinking and discussing for years to come, as "an experiment in the removal of all racial codes from a narrative about two characters of different races for whom racial identity is crucial." We know that one is white and one is Black, but which is which? And who is right about the race of the woman the girls tormented at the orphanage? A remarkable look into what keeps us together and what keeps us apart, and how perceptions are made tangible by reality, *Recitatif* is a gift to readers in these changing times.

Narrative of the Life of Frederick Douglass First published in 1845, *Narrative of the Life of Frederick Douglass* is an eye-opening depiction of American slavery. Part autobiography, part human-rights treatise, it describes the everyday horrors inflicted on captive laborers, as well as the strength and courage needed to survive. *Narrative of the Life of Frederick Douglass Born into slavery on a Maryland plantation in 1818, Frederick Douglass spent years secretly teaching himself to read and write—a crime for which he risked life and limb. After two failed escapes, Douglass finally, blessedly boarded a train in 1838 that would eventually lead him to New York City and freedom. Narrative of the Life of Frederick Douglass* Few books have done more to change America's notion of African Americans than this seminal work. Beyond its historical and social relevancy, it is admired today for its gripping stories, the intensity of spirit, and heartfelt humanity. *Narrative of the Life of Frederick Douglass* This ebook has been professionally proofread to ensure accuracy and readability on all devices. *Narrative of the Life of Frederick Douglass Born into a life of bondage, Frederick Douglass secretly taught himself to read and write. It was a crime punishable by death, but it resulted in one of the most eloquent indictments of slavery ever recorded. His gripping narrative takes us into the fields, cabins, and manors of pre-Civil War plantations in the South and reveals the daily terrors he suffered. Narrative of the Life of Frederick Douglass* Written more than a century and a half ago by a Black man who went on to become a famous orator, U.S. minister to Haiti, and leader of his people, this timeless classic still speaks directly to our age. It is a record of savagery and inhumanity that goes far to explain why America still suffers from the great injustices of the past. *Narrative of the Life of Frederick Douglass*

Writing an Effective Introduction-How to Write a Research Paper: An Editage Series

This book is a result of the investigative attempts of linguistics professionals to identify and meet the challenges of developing communicative competence in future engineers, economists and other such specialists. The unifying feature of all the contributions brought together here is the active involvement of the authors in practical instruction of English for specific professional purposes at the tertiary (bachelors' and masters' programs) level in Russia. This volume covers a number of relevant areas in this field, including new developments in methodology, approaches to course and materials design, and the contribution of language theory to foreign language teaching in a professional context. The unique teaching approach advocated in this book denounces the traditional practice of transferring classical methodology of communicative-oriented teaching to language classes for students with a non-linguistic or non-teaching professional orientation. The underlying idea of this volume is that a change in professional context implies a change in language teaching methodology, including materials, techniques and target competences. The ideas and experiences analysed here will appeal to anyone interested in the current trends in foreign language teaching and learning and particularly to educationalists.

Paragraph Development helps students edit their own writing for clarity and accuracy and offers a three-phase strategy for building writing skills through planning, writing, and revising. The approach in each chapter is direct and functional: a model is provided and graphically explained, then students use the model to write their own paragraphs.-- Offers controlled information-transfer exercises, a choice of writing topics, and peer consultation and writing-evaluation methods. Book Five of the Learning to Apply Series, is a consolidated version of two former manuals, titled Fieldworks (Duncan, 2010) and Applying Research (Duncan, 2010), used in 10th and 11th grades at West College High School. This reform, at the suggestion of Director Cynthia Delgado, is consistent with the fact that the undergraduate paper that West's students prepare is developed precisely over these two academic years as a single project. During level ten-eleven, students consolidate their capacity for self-education -learning how to learn, learning how to comprehend the subjects studied, and learning how to apply the knowledge acquired when faced with today's challenging and changing reality, thereby achieving the final aim of the Series. Students will design and develop an undergraduate report, ("tesina" in Spanish) which is the final research-report that they are expected to present as part of their graduation process. The tesina is basically an individual study that each student carries out to demonstrate his capacity to formulate a problem, confront it with a basic theoretical framework, using proper methodology and adequate techniques required to close this stage of his academic experience. The course is divided in two parts: Fieldworks, designed to recap formerly acquired knowledge, to set up a professionally oriented research plan and to complete preliminary investigation. The second part, Applying Research, guides students to the completion of their investigation and to the delivery of a competent report.

Research Methods for Political Science

Umberto Eco's wise and witty guide to researching and writing a thesis, published in English for the first time. By the time Umberto Eco published his best-selling novel *The Name of the Rose*, he was one of Italy's most celebrated intellectuals, a distinguished academic and the author of influential works on semiotics. Some years before that, in 1977, Eco published a little book for his students, *How to Write a Thesis*, in which he offered useful advice on all the steps involved in researching and writing a thesis—from choosing a topic to organizing a work schedule to writing the final draft. Now in its twenty-third edition in Italy and translated into seventeen languages, *How to Write a Thesis* has become a classic. Remarkably, this is its first, long overdue publication in English. Eco's approach is anything but dry and academic. He not only offers practical advice but also considers larger questions about the value of the thesis-writing exercise. *How to Write a Thesis* is unlike any other writing manual. It reads like a novel. It is opinionated. It is frequently irreverent, sometimes polemical, and often hilarious. Eco advises students how to avoid “thesis neurosis” and he answers the important question “Must You Read Books?” He reminds students “You are not Proust” and “Write everything that comes into your head, but only in the first draft.” Of course, there was no Internet in 1977, but Eco's index card research system offers important lessons about critical thinking and information curating for students of today who may be burdened by Big Data. *How to Write a Thesis* belongs on the bookshelves of students, teachers, writers, and Eco fans everywhere. Already a classic, it would fit nicely between two other classics: *Strunk and White* and *The Name of the Rose*. Contents The Definition and Purpose of a Thesis • Choosing the Topic • Conducting Research • The Work Plan and the Index Cards • Writing the Thesis • The Final Draft

This volume is a call for integrity in autoethnographic research. Stephen Andrew weaves together philosophy, critical theory, and extended self-reflections to demonstrate how and why qualitative researchers should assess the ethical quality of their work. He also offers practical tools designed to limit the likelihood of self-indulgence and solipsism in first-person writing. Equally instructive and exemplary, his work: Is written in a relatable style that draws readers in and encourages them to think critically about the implications and effects of their writing. Examines the history of qualitative and autoethnographic research. Provides implementable strategies for textualizing lived experiences and relationships with others.

Voted America's Best-Loved Novel in PBS's The Great American Read Harper Lee's Pulitzer Prize-winning masterpiece of honor and injustice in the deep South—and the heroism of one man in the face of blind and violent hatred One of the most cherished stories of all time, To Kill a Mockingbird has been translated into more than forty languages, sold more than forty million copies worldwide, served as the basis for an enormously popular motion picture, and was voted one of the best novels of the twentieth century by librarians across the country. A gripping, heart-wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of great beauty and savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime.

This Second Edition of Diana Ridley's bestselling guide to the literature review outlines practical strategies for reading and note taking, and guides the reader on how to conduct a systematic search of the available literature, and uses cases and examples throughout to demonstrate best practice in writing and presenting the review. New to this edition are examples drawn from a wide range of disciplines, a new chapter on conducting a systematic review, increased coverage of issues of evaluating quality and conducting reviews using online sources and online literature and enhanced guidance in dealing with copyright and permissions issues.

It is one thing to write a good scientific paper; it is quite another thing to get it published. Don Harris draws upon nearly a quarter of a century of experience as an author and reviewer of research papers, and ultimately as a journal editor. By his own admission, it contains all the things he wished that his mentors had told him 25 years ago, but did not. The material in the book is drawn from many years of finding all these things out for himself.

All of us in biomedicine understand the urgency of getting experimental results into print as quickly as possible. Yet this critical step in the cascade from research conception to publication receives almost no attention in our formal training. It is as if we have been put to sea without a compass. Our collective failure to achieve widespread literacy in our own language - Biomedical Language - seriously impedes the important process of d- seminating new biomedical knowledge and thereby improving the human condition. It is also a significant personal concern for researchers and clinicians in the highly competitive, publish-or-perish environment of c- temporary academia. Of course, if we are clever or lucky enough to come up with that Nobel Prize-winning discovery, great science will carry the day and we are likely to get published even if our writing is fairly horrid. But most of us who publish are “bread-and-butter” scientists. We compete for space in journals which may only accept 10% or 20% of the submissions that they receive each year. For us, convincing, engaging writing will make the difference between being published or rejected, or at least it will make the difference between being published on ? rst submission or having to go through a number of revisions (or journals). None of this is to propose that good writing can make a silk purse out of a sow's ear. Scienti? c content is the sine qua non of biomedical writing.

George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Politics and the English Language, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's Politics and the English Language is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can – and must – be rediscovered with every age.' — Irish Times

This is an open access book. The book provides an overview of the state of research in developing countries – Africa, Latin America, and Asia (especially India) and why research and publications are important in these regions. It addresses budding but struggling academics in low and middle-income countries. It is written mainly by senior colleagues who have experienced and recognized the challenges with design, documentation, and publication of health research in the developing world. The book includes short chapters providing insight into planning research at the undergraduate or postgraduate level, issues related to research ethics, and conduct of clinical trials. It also serves as a guide towards establishing a research question and research methodology. It covers important concepts such as writing a paper, the submission process, dealing with rejection and revisions, and covers additional topics such as planning lectures and presentations. The book will be useful for graduates, postgraduates, teachers as well as physicians and practitioners all over the developing world who are interested in academic medicine and wish to do medical research.

This book provides introductory materials on research methods and report writing that aim at guiding students and researchers towards effective research and reporting of their findings. Unlike the many volumes on research that are mostly theoretical, this book originated in the classroom and grew out of the students' own needs to design and conduct satisfactory research in order to meet academic requirements. It is also designed to help experienced researchers in their research ventures. In fulfilling this purpose, the author uses simple, straightforward language. He also provides appropriate examples and illustrations to enable the reader to grasp the basic concepts of research. The book will prove a useful guide for students and researchers in social sciences and humanities who wish to transform research theory into real and feasible research projects.

Carefully edited for modern readers to allow for easier reading Obsessed with the secret of creation, Swiss scientist Dr. Victor Frankenstein cobbles together a body he's determined to bring to life. And one fateful night, he does. When the creature opens his eyes, the doctor is repulsed: his vision of perfection is, in fact, a hideous monster. Dr. Frankenstein abandons his creation, but the monster won't be ignored, setting in motion a chain of violence and terror that shadows Victor to his death. Mary Shelley's Frankenstein, a gripping story about the ethics of creation and the consequences of trauma, is one of the most influential Gothic novels in British literature. It is as relevant today as it is haunting.

The Broadview Guide to Writing is a concise yet uncommonly thorough text with a fresh approach to the craft of essay writing. The first part of the book discusses the style and structure of essay writing, and includes a useful discussion of the intangibles involved in the writing process—such as confidence, perseverance, and a willingness to deal with criticism constructively. The second part of the book provides thorough coverage of grammar and usage in a comprehensive reference guide, ranging from the simplest mechanical issues (such as subject verb agreement) to subtle distinctions between words that have similar meanings. A wide range of examples is included throughout the book. The fifth edition incorporates the 2008 changes to MLA Style guidelines for documentation and includes a number of other changes that make it far better suited than previous editions to the needs of American writers in the twenty-first century.

The ability to communicate in writing is an essential skill, particularly for nurses at the graduate level. This is a bestselling, comprehensive, and widely used resource on writing for nurse clinicians, graduate students, researchers, and faculty. It covers all types of writing that beginning and experienced nurse-authors may be required or choose to do: E-B research papers, journal articles, book chapters, clinical project findings and innovations, and preparing manuscripts for courses and all types of publication, including open access journals. Brimming with helpful examples, the book takes the reader step-by-step through the entire process of writing, from the generation of an idea through searching the nursing literature, preparing an outline, writing and revising a draft, and onward toward disseminating the finished product. This third edition includes an entirely new chapter on writing articles regarding quality improvement studies, and new information about writing for open access publications. It is also replete with practical examples of the type of writing required for successful DNP capstone projects.

This comprehensive text is designed to help political science students learn what to research, why to research, and how to research. It integrates both the quantitative and qualitative approaches to research, including the most detailed coverage of qualitative methods currently available. The book provides specific instructions in the use of available statistical software programs such as Excel and SPSS. It covers such important topics as research design, specifying research problems, designing questionnaires and writing questions, designing and carrying out qualitative research, and analyzing both quantitative and qualitative research data. Copiously illustrated and thoroughly classroom tested, the book presents statistical methods in a conversational tone to help students surmount "math phobia."

In What Writing Does and How It Does It, editors Charles Bazerman and Paul Prior offer a sophisticated introduction to methods for understanding, studying, and analyzing texts and writing practices. This volume addresses a variety of approaches to analyzing texts, and considers the processes of writing, exploring textual practices and their contexts, and examining what texts do and how texts mean rather than what they mean. Included are traditional modes of analysis (rhetorical, literary, linguistic), as well as newer modes, such as text and talk, genre and activity analysis, and intertextual analysis. The chapters have been developed to provide answers to a specified set of questions, with each one offering: "a preview of the chapter's content and purpose; "an introduction to basic concepts, referring to key theoretical and research studies in the area; "details on the types of data and questions for which the analysis is best used; "examples from a wide-ranging group of texts, including educational materials, student writing, published literature, and online and electronic media; "one or more applied literatures, with a clear statement of procedures for analysis and illustrations of a particular sample of data; and "a brief summary, suggestions for additional readings, and a set of activities. The side-by-side comparison of methods allows the reader to see the multi-dimensionality of writing, facilitating selection of the best method for a particular research question. The volume contributors are experts from linguistics, communication studies, rhetoric, literary analysis, document design, sociolinguistics, education, ethnography, and cultural psychology, and each utilizes a specific mode of text analysis. With its broad range of methodological examples, What Writing Does and How It Does It is a unique and invaluable resource for advanced undergraduate and graduate students and for researchers in education, composition, ESL and applied linguistics, communication, L1 and L2 learning, print media, and electronic media. It will also be useful in all social sciences and humanities that place importance on texts and textual practices, such as English, writing, and rhetoric.
