

## Research Paper On Motivation

*The Psychology of Learning and Motivation publishes empirical and theoretical contributions in cognitive and experimental psychology, ranging from classical and instrumental conditioning to complex learning and problem solving. Volume 46 contains chapters on category learning, prototypes, prospective memory, event memory, memory models, and musical prosody. Discusses the concepts of category learning, prototypes, prospective memory, event memory, memory models, and musical prosody Volume 46 of the highly regarded Psychology of Learning and Motivation series An essential reference for researchers and academics in cognitive science*

*First Published in 2015. Routledge is an imprint of Taylor & Francis, an Informa company.*

*What really sets the best managers above the rest? It's their power to build a cadre of employees who have great inner work lives—consistently positive emotions; strong motivation; and favorable perceptions of the organization, their work, and their colleagues. The worst managers undermine inner work life, often unwittingly. As Teresa Amabile and Steven Kramer explain in *The Progress Principle*, seemingly mundane workday events can make or break employees' inner work lives. But it's forward momentum in meaningful work—progress—that creates the best inner work lives. Through rigorous analysis of nearly 12,000 diary entries provided by 238 employees in 7 companies, the authors explain how managers can foster progress and enhance inner work life every day. The book shows how to remove obstacles to progress, including meaningless tasks and toxic relationships. It also explains how to activate two forces that enable progress: (1) catalysts—events that directly facilitate project work, such as clear goals and autonomy—and (2) nourishers—interpersonal events that uplift workers, including encouragement and demonstrations of respect and collegiality.*

*Brimming with honest examples from the companies studied, The Progress Principle equips aspiring and seasoned leaders alike with the insights they need to maximize their people's performance. This edited volume in SIOP's Organizational Frontiers Series presents the current thinking and research on the important area of motivation. Work Motivation is a central issue in Industrial organizational psychology, human resource management and organizational behavior. In this volume the editors and authors show that motivation must be seen as a multi-level phenomenon where individual, group, organizational and cultural variables must be considered to truly understand it. The book adopts an overall framework that encompasses "internal" - from the person - forces and "external" - from the immediate and more distant environment - forces. It is destined to challenge scholars of organizations to give renewed emphasis and attention to advancing our understanding of motivation in work situations.*

**With the “discursive turn” has come a distrust - a complete rejection by some - of theories that seek deeper reasons for surface phenomena. Rong Chen argues that this distrust, with its accompanying overemphasis on specificity and fluidity of linguistic meaning and**

**social values, is unwarranted and unhelpful. Drawing on insights from social theories and various strands of pragmatics, he proposes a motivation model of pragmatics (MMP), contending that language use can be adequately, coherently, and elegantly studied via the motivation behind it in its varied and dynamic contexts. The model, with its well-laid out components, is then applied to (im)politeness research, cross-cultural pragmatics, diachronic pragmatics, discourse and genre analysis, conversation analysis, identity construction, and the study of metaphor, sarcasm, parody, and lying. MMP is thus a framework aimed at accounting for fluidity with stable notions, specificity with general principles, and differences with similar underlying factors. As such, the book should appeal to students of pragmatics, (im)politeness, conversation analysis, sociolinguistics, applied linguistics, communication, sociology, and psychology.**

**Academic Paper from the year 2017 in the subject Business economics - Personnel and Organisation, , course: Thesis, language: English, abstract: The purpose of this study was to investigate the role of motivation on employee performance in public organization: a case of ministry of national development planning Hargeisa, Somaliland. This**

**study guided by the following research questions. To determine the methods used by employers to motivate employees in the MoNDP, to know the extent that extrinsic motivation affects employees' performance in the MoNDP, To examine how intrinsic motivation affect employees' performance in the MoNDP, To identify how motivation link with employee work performance. This study adopted a descriptive research design. The population of the study was 90 employees' of the MoNDP. A census sampling was done and so the 90 employees constituted the sample size. A structured questionnaire was used to collect the data. The questionnaire was to administer by the researcher. The completed questionnaires were edited for completeness. The data were analyzed using the statistical package for social sciences (SPSS) computer package. The data were interpreted using descriptive statistics through frequencies, percentages and correlation analysis. The findings were presented in the form of tables and figures. The study found out that the ministry uses many different tools to motivate its employees. These include; payments on time, employee rotation within the ministry and salary provision. However, the study also found out that NDP does not use provide fringe benefits**

**to its employees. It was also found out that ministry doesn't pay its workers according to the amount of work they have done also when employees meet targets ministry doesn't provide bonuses the ministry does not carry out training of its employees. The study also found out that the organization does not make sure that that employee's work is challenging or involve them in decision making as a way of motivating them. The research results indicated that there is a positive correlation between motivation and work performance. This means that changes in one variable are strongly correlated with changes in the second variable. Pearson's  $r$  is .440\*\*. This number is very close to one. For this reason, we can conclude that there is a strong relationship between motivation and employee performance variables**

**A high level of literacy in both print and digital media is required for negotiating most aspects of 21st-century life, including supporting a family, education, health, civic participation, and competitiveness in the global economy. Yet, more than 90 million U.S. adults lack adequate literacy. Furthermore, only 38 percent of U.S. 12th graders are at or above proficient in reading. Improving Adult Literacy Instruction synthesizes the research on literacy and learning to**

**improve literacy instruction in the United States and to recommend a more systemic approach to research, practice, and policy. The book focuses on individuals ages 16 and older who are not in K-12 education. It identifies factors that affect literacy development in adolescence and adulthood in general, and examines their implications for strengthening literacy instruction for this population. It also discusses technologies for learning that can assist with multiple aspects of teaching, assessment, and accommodations for learning. There is inadequate knowledge about effective instructional practices and a need for better assessment and ongoing monitoring of adult students' proficiencies, weaknesses, instructional environments, and progress, which might guide instructional planning. Improving Adult Literacy Instruction recommends a program of research and innovation to validate, identify the boundaries of, and extend current knowledge to improve instruction for adults and adolescents outside school. The book is a valuable resource for curriculum developers, federal agencies such as the Department of Education, administrators, educators, and funding agencies.**

**Written by leading researchers in educational and social psychology,**

**learning science, and neuroscience, this edited volume is suitable for a wide-academic readership. It gives definitions of key terms related to motivation and learning alongside developed explanations of significant findings in the field. It also presents cohesive descriptions concerning how motivation relates to learning, and produces a novel and insightful combination of issues and findings from studies of motivation and/or learning across the authors' collective range of scientific fields. The authors provide a variety of perspectives on motivational constructs and their measurement, which can be used by multiple and distinct scientific communities, both basic and applied.**

consultant to organizations. It is written with a 'mentor voice' that is highly personal and rich in examples, including enduring influences of mentors on researchers in the field. This cutting-edge Research Handbook brings together international scholars to provide a comprehensive overview of motivation within and beyond the field of public administration. Discussing the implications of contemporary research for theory and practice, it offers suggestions for the development of future research in the field.

Bachelor Thesis from the year 2017 in the subject Business economics - Personnel and Organisation, grade: A, , language: English, abstract: Motivation is an important research area for academics and practice area for managers. Various theories, approaches and concepts were developed to describe different forms of motivation. Today it is widely accepted that motivation is very important for managers since it is a way that leads to better work performance. This study investigates and ranks in order of importance the motivational factors that enhance motivation in the Maltese Courts of Justice (MCOJ). Moreover, it evaluates the impact of motivation on its employees' work performance. Both qualitative and quantitative techniques were used to collect and analyse information for this research. The data was collected from a sample of 30 employees and another sample of the MCOJ Managers. Later the responses are analysed with different methods and presented in different formats. This study compares the findings with literature and provides areas for discussions. The result is that MCOJ employees are motivated by different factors but the most influential are

## Read Free Research Paper On Motivation

trust, recognition/ praise and interpersonal relationships. The impact of motivation on job performance is presented from two different perspectives: the management and the employees. These results are compared to each other where differences in opinion are revealed. At the end of the paper, the conclusion sums up all the findings and various recommendations to be implemented by the organisation are presented. Finally, the author recommends different areas where this research study can be used so that future research may reveal a better understanding of the concept of motivation and job performance.

The rapid pace at which digital printing is advancing is posing a very serious challenge to the U.S. Department of the Treasury's Bureau of Printing (BEP). The BEP needs to stay ahead of the evolving counterfeiting threats to U.S. currency. To help meet that challenge, *A Path to the Next Generation of U.S. Banknotes* provides an assessment of technologies and methods to produce designs that enhance the security of U.S. Federal Reserve notes (FRNs). This book presents the results of a systematic investigation of the trends in digital imaging and printing and how they enable emerging counterfeiting threats. It also provides the identification and analysis of new features of FRNs that could provide effective countermeasures to these threats and an overview of a requirements-driven development process that could be adapted to develop an advanced-generation currency.

The Surprising Truth About What Motivates Us

Research Paper (postgraduate) from the year 2016 in the subject Business economics - Personnel and Organisation, grade: Merit, , course: MA in Human Resource Management, language: English, abstract: For many years, motivation has been a key indicator of productive employee performance within an organisation, so it has been an area of major concern for the organisation and human resource managers. There are wide ranges of factors related to management, employees, organisation and the workplace which make it a complex and challenging job to motivate employees in an organisation. Therefore, different strategies and methods should be used by the organisation and human resource managers to motivate employees. There are different needs and expectations for an employee to join any organisation. Monetary and non-monetary factors are used by human resource managers to achieve different employee and organisation related objectives. The present research works investigates the impact of motivation on the performance of employees in Ramchandrapur High School. Descriptive method and questionnaires embedded with Likert scale was used as main instruments for collecting necessary data to carry out this research work. Data is collected from the sample size of 50 where faculty

## Read Free Research Paper On Motivation

members, employee assistants, office helpers, and employees in training and security personnel were included. The critical review of the literature and the quantitative analysis of the survey data pointed that both extrinsic and intrinsic motivational factors play an important role in motivating employees. The study revealed that salary is the most effective motivational factor among various extrinsic and intrinsic motivational factors like job security, advancement in career, the good relationship among co-workers, achievement sense, training and development and sense of recognition. The study further reveals that level of motivation among the employees of Ramchandrapur High School is low as compared to the expectation of employees. Although both extrinsic and intrinsic factors are responsible for motivating employees in an organisation, this study reveals that employees of Ramchandrapur High School are motivated more by extrinsic factors than by intrinsic ones. The management of the school should focus more towards satisfying the extrinsic need of employees to hold the employees for long which subsequently helps to increase the quality of the output produced by it.

The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these

into action in a unique book that will change how we think and transform how we live.

As I begin to write this Preface, I feel a rush of excitement. I have now finished the book; my gestalt is coming into completion. Throughout the months that I have been writing this, I have, indeed, been intrinsically motivated. Now that it is finished I feel quite competent and self-determining (see Chapter 2). Whether or not those who read the book will perceive me that way is also a concern of mine (an extrinsic one), but it is a wholly separate issue from the intrinsic rewards I have been experiencing. This book presents a theoretical perspective. It reviews an enormous amount of research which establishes unequivocally that intrinsic motivation exists. Also considered herein are various approaches to the conceptualizing of intrinsic motivation. The book concentrates on the approach which has developed out of the work of Robert White (1959), namely, that intrinsically motivated behaviors are ones which a person engages in so that he may feel competent and self-determining in relation to his environment. The book then considers the development of intrinsic motivation, how behaviors are motivated intrinsically, how they relate to and how intrinsic motivation is extrinsically motivated behaviors, affected by extrinsic rewards and controls. It also considers how changes in intrinsic motivation relate to changes in attitudes, how people attribute motivation to each other, how the attribution process is motivated, and how the process of perceiving motivation (and other internal states) in oneself relates to perceiving them in others.

When it comes to motivating people to learn, disadvantaged urban adolescents are usually perceived as a hard sell. Yet, in a recent MetLife survey, 89 percent of the low-income students claimed "I really want to learn" applied to them. What is it about the school environment—pedagogy, curriculum, climate, organization—that encourages or discourages engagement in school activities? How do peers, family, and community affect adolescents' attitudes towards learning? Engaging Schools reviews

current research on what shapes adolescents' school engagement and motivation to learn" including new findings on students' sense of belonging" and looks at ways these can be used to reform urban high schools. This book discusses what changes hold the greatest promise for increasing students' motivation to learn in these schools. It looks at various approaches to reform through different methods of instruction and assessment, adjustments in school size, vocational teaching, and other key areas. Examples of innovative schools, classrooms, and out-of-school programs that have proved successful in getting high school kids excited about learning are also included.

Seminar paper from the year 2018 in the subject Medicine - Hospital Environment, Clinical Medicine, grade: 1.5, Egerton University, language: English, abstract: Human beings have brains which respond to various signals in different manners. The nature of the attitude and the environment serve as the principal determinants of an individual appropriate response. Motivation which entails that aspect of acquiring positive attitudes in the surrounding environment and incorporating them into one's behavior, purposely aimed at enhancing performance. Consequently, a motivational behavior appear to be the only influential aspect of human nature that holds promise to realization of one's intended goals in life as an individual. From the work performance perspective, motivation has been known to be a basic tool for

## Read Free Research Paper On Motivation

improving productivity at the workplace. For this reason therefore, it is important to nature precepts of motivational behavior for profitable output to be realized. In life, individual's strive towards attaining success at last at the end of all tasks that one commits himself/herself to undertake. On the hand, it is observed that all organizations' main objective is to achieve success. It's absolutely true to assert that all these adorable rewards from any form of work cannot be realized fully if motivation is deficient. In this research paper, all aspects of motivation are going to be discussed for general understanding as well as for identifying the most appropriate way of nurturing motivational behavior in employees for improved performance at the workplace. At the work place, motivation plays a very fundamental role especially with regard to attitudes of the staff and their employees or rather their managers, who are primarily concerned with supervisory matters to achieve a particular task. Motivation therefore serves as the basic tool at the workplace for managers so as to ensure efficient alignment of aims, values and purpose especially among employees in any organization. Owing to human nature, motivational efforts appear to face a great challenge as each individual possesses personal preferences or attitudes which may be difficult to change or modify. As a result, it is important for managers to first identify and comprehend precisely for their employees motivational needs, after which they will take the most appropriate approaches to align their aims and values so as to improve performance hence increased chances of success.

motivation in school, in sports, and in the aged.

"[A] solid contribution to the growing popular literature on the subject."—PUBLISHERS WEEKLY From one of Time Magazine's "Forty Most Influential Minds in Technology" comes an essential collection of candid, first-hand accounts of women in technology. Women in technology are on the rise in both power and numbers, and now it's more important than ever to not lose momentum, to "lean in" and close the gender gap. Although they make up half of the population, only 14% of engineers in the United States are women. They take the seeds of technological advancement and build something life-changing, potentially life-saving. The future of technology depends on the full and active participation of women and men working together, and it is vital that women are both educated and encouraged to go into the tech sectors. Hailed by Foreign Policy Magazine as a "Top 100 Global Thinker," professor, researcher, and entrepreneur Vivek Wadhwa, alongside award-winning journalist Farai Chideya, set out to collect anecdotes and essays from global leaders, sharing how their experiences in innovative industries frame the future of entrepreneurship. With interviews and essays from hundreds of women in STEM fields, including Anousheh Ansari the first female private sector space explorer, former Google[X] VP and current CTO of the USA Megan Smith, Ory Okolloh of the Omidyar Network, venture capitalist Heidi Roizen and CEO of Nanobiosym Dr. Anita Goel, MD, PhD, *Innovating Women* offers perspectives on the challenges that women face, the strategies that they employ in the workplace, and how an organization can succeed or fail in its attempts to support the career advancement of women.

**Originally published in 1978, this volume provided a broad survey of the latest research and theory, at the time, concerning the potential detrimental effects of inappropriate uses of tangible rewards to modify behaviour. Overall, this research questions the dominant paradigm within which reinforcers, by definition, have positive effects on performance and subsequent behaviour, and suggests new directions for the study of human motivation. In a series of five original integrative essays, the contributors summarize their own and related research programmes. These theoretical essays are complemented by two introductory chapters, that provide a historical context for this research, and four discussion chapters, that speak to broader issues, including both the implications and limitations of the research presented. At the time, this was the latest information on a most provocative area.**

**An important part of every manager's job is changing people's behavior: to improve someone's performance, get them to better manage relationships with colleagues, or to stop them doing something. Yet, despite the fact that changing people's behavior is such an important skill for managers, too many are unsure how to actually go about it. This book reveals the simple, but powerful techniques for changing behavior that experts from**

**a range of disciplines have been using for years, making them available to all managers in a single and comprehensive toolkit for change that managers can use to drive and improve the performance of their staff. Based on research conducted for this book, it introduces practical techniques drawn from the fields of psychology, psychotherapy, and behavioral economics, and show how they can be applied to address some of the most common, everyday challenges that managers face. #changingpeople**

**Designed for professionals and graduate students in the personality/social, military, and educational psychology, and assessment/evaluation communities, this volume explores the state of the art in motivational research for individuals and teams from multiple theoretical viewpoints as well as their effects in both schools and training environments. The great majority of education and training R&D is focused on the cognitive dimensions of learning, for instance, the acquisition and retention of knowledge and skills. Less attention has been given in the literature and in the design of education and training itself to motivational variables and their influence on performance. As such, this book is unique in the following montage of factors: \* a focus on motivation of teams or groups as well as individuals; \* an examination of the impact of motivation on performance (and, thus, also on cognition) rather than only on motivation itself; \* research in training as well as educational settings. The data reported were collected in various venues including schools, laboratories and field settings. The chapter authors are the researchers that, in many cases, have defined the state of the art in motivation.**

understanding of the important roles and applications of educational games in terms of teaching strategies, instructional design, educational psychology and game design"--Provided by publisher.

Motivation is an important factor in and for all education levels. However, as learners in online distance education milieus are away from both teachers, other learners, and the learning environments physically, this concept becomes more important for online education. Motivating learners in distance education and keeping their motivation alive throughout the learning process is an issue that should be emphasized and taken care of for teachers and instructional designers. At this point, although there are many approaches, models, and theories regarding enhancing and sustaining motivation and engagement in the education processes, it is seen that there is not enough work and/or effective and efficient strategies that can be applied in online distance learning environments. *Motivation, Volition, and Engagement in Online Distance Learning* evaluates motivational obstacles in online distance education both theoretically and practically, identifies the strengths and weaknesses of the online education environments regarding motivation, and provides actionable motivational and volitional strategies for online educators. This book offers coverage of topics such as learning theories, motivation research, and synchronous online learning environments, making it a valuable resource for researchers, professionals, decision makers, institutions in all education levels, academicians, pre-service teachers, and most importantly, online

## Read Free Research Paper On Motivation

educators from various disciplines and learners from all educational landscapes. There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, *How People Learn: Brain, Mind, Experience, and School: Expanded Edition* was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. *How People Learn II: Learners, Contexts, and Cultures* provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. *How People Learn II* will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.

This volume covers the current status of research in the neurobiology of motivated behaviors in humans and other animals in healthy condition. This includes consideration of the psychological processes that drive motivated behavior and the anatomical, electrophysiological and neurochemical mechanisms which drive these processes and regulate behavioural output. The volume also includes chapters on pathological disturbances in motivation including apathy, or motivational deficit as well as addictions, the pathological misdirection of motivated behavior. As with the chapters on healthy motivational processes, the chapters on disease provide a comprehensive up to date review of the neurobiological abnormalities that underlie motivation, as determined by studies of patient populations as well as animal models of disease. The book closes with a section on recent developments in treatments for motivational disorders.

This book provides a unique behavioral science framework for motivating employees in organizational settings. Drawing upon his experiences as a staff psychologist and consultant, Latham writes in a "mentor voice" that is highly personal and rich in examples. The book includes anecdotes about the major thought leaders in the field of motivation, together with behind-the-scenes accounts of research and the researchers. It offers a chronological review of the field, and a taxonomy for the study and practice of motivation. Controversies of theoretical and practical significance such as the importance of money, the relationship between job satisfaction and performance, and the distinction between intrinsic and extrinsic motivation are discussed.

The #1 New York Times bestseller. Over 4 million copies sold! Tiny Changes, Remarkable Results: No Matter Your Goals, Atomic Habits Offers a Proven Framework for Improving--Every Day. James Clear, one of the world's leading experts on habit formation, reveals practical strategies that will tell you exactly how to form good habits, break bad ones, and master the tiny behaviors that lead to remarkable results. If you're having trouble changing your habits, the problem isn't you. The problem is your system. Bad habits repeat themselves again and again not because you don't want to change but because you have the wrong system for change. You do not rise to the level of your goals; you rise to the level of your systems. Here, you'll get a proven system that can take you to new heights. Clear is known for his ability to distill complex topics into simple behaviors that can be easily applied to life and work. Here, he draws on the most proven ideas from biology, psychology, and neuroscience to create an easy-to-understand guide for making good habits inevitable and bad habits impossible. Along the way, readers will be inspired and entertained with true stories from Olympic gold medalists, award-winning artists, business leaders, life-saving physicians, and star comedians who have

science of small habits to master their craft and vault to the top of their field. Learn how to find time for new habits (even when life gets crazy); • overcome a lack of motivation and willpower; • design your environment to make success easier; • get back on track when you fall off course; and much more. Atomic Habits will reshape the way you think about progress and success, and give you the tools and strategies you need to transform your habits--whether you are a team looking to win a championship, an organization hoping to redefine an industry, or simply an individual who wishes to quit smoking, lose weight, reduce stress, or achieve any other goal.

The Handbook of Motivation at School presents the first comprehensive and integrated compilation of theory and research on children's motivation at school. It covers the major theoretical perspectives in the field as well as their application to instruction, learning, and social adjustment at school. Features: Comprehensive – no other book provides such a comprehensive overview of theory and research on children's motivation at school. Theoretical & Applied – the book provides a review of current motivation theories by the developers of those theories as well as attention to the application of motivation theory and research in classrooms and schools. Chapter Structure – chapters within each section follow a similar structure so that there is uniformity across chapters. Commentary – each section ends with a commentary that provides clear directions for future research.

### Innovating Women

This book provides a unique reference and comprehensive overview of the issues pertinent to conceptualizing, measuring, researching and nurturing writing motivation. Abdel Latif covers these theoretical, practical and research issues by drawing on the literature related to the eight main constructs of writing motivation: writing apprehension, attitude, anxiety, self-efficacy, self-concept, learning goals, perceived value of writing and motivational regulation. Specifically, the book covers the historical research developments of the field, the measures of the main writing motivation constructs, the correlates and sources of writing motivation, and profiles of motivated and demotivated writers. The book also describes the types of the instructional research of writing motivation, provides pedagogical guidelines and procedures for motivating students to write, and presents suggestions for advancing writing motivation research, measurement and pedagogy. Detailed, up-to-date, and with a glossary which includes definitions of the main terms used in the six chapters, this book will be of great interest to academics, researchers and post-graduate students in the fields of language education, applied linguistics, psycholinguistics and educational psychology.

In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls “grit.” “Inspiration for non-geniuses everywhere” (People). The daughter of a scientist who frequently noted her lack of “genius,” Angela

Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In *Grit*, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she's learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. “Duckworth's ideas about the cultivation of tenacity have clearly changed some lives for the better” (The New York Times Book Review). Among *Grit*'s most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, *Grit* is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is “a fascinating tour of the psychological research on success” (The Wall Street Journal).
