

## Restraints Ohio Department Of Aging

Rules of state administrative agencies ... In full text, with tables and index ... including chart of proposed rules, with time and location of public hearings.

Among the issues confronting America is long-term care for frail, older persons and others with chronic conditions and functional limitations that limit their ability to care for themselves. Improving the Quality of Long-Term Care takes a comprehensive look at the quality of care and quality of life in long-term care, including nursing homes, home health agencies, residential care facilities, family members and a variety of others. This book describes the current state of long-term care, identifying problem areas and offering recommendations for federal and state policymakers. Who uses long-term care? How have the characteristics of this population changed over time? What paths do people follow in long term care? The committee provides the latest information on these and other key questions. This book explores strengths and limitations of available data and research literature especially for settings other than nursing homes, on methods to measure, oversee, and improve the quality of long-term care. The committee makes recommendations on setting and enforcing standards of care, strengthening the caregiving workforce, reimbursement issues, and expanding the knowledge base to guide organizational and individual caregivers in improving the quality of care.

Developments in Aging, 1991

**Health care and human service professionals often experience anxiety about potential adverse legal repercussions for actions taken or not taken in the course of caring for patients or clients. In this volume, professionally distinguished and diverse authors discuss both the real and perceived legal liability context within which health and human service delivery to older persons takes place. The benefits and costs of litigious, legislative, and regulatory interventions on the quality of care and the quality of life for recipients of geriatric services is evaluated. Most important, chapters present suggestions for ways to effectively reduce or manage legal risks and anxieties while improving patient care. This volume fills a gap in the literature by providing careful and accurate analysis of legal issues rarely translated into practical and useful advice for health care and human service professionals.**

**As more people live longer, the need for quality long-term care for the elderly will increase dramatically. This volume examines the current system of nursing home regulations, and proposes an overhaul to better provide for those confined to such facilities. It determines the need for regulations, and concludes that the present regulatory system is inadequate, stating that what is needed is not more regulation, but better regulation. This long-anticipated study provides a wealth of useful background information, in-depth study, and discussion for nursing home administrators, students, and teachers in the health care field; professionals involved in caring for the elderly; and geriatric specialists.**

A COMPREHENSIVE RESOURCE ON GERONTOLOGY AND GERIATRICS Since its inception in 1987, The Encyclopedia of Aging has proven to be the definitive resource for scholars and students across the burgeoning and increasingly interdisciplinary fields of gerontology and geriatrics. Like its three esteemed predecessors, the fourth edition contains concise, readable explorations of hundreds of terms, concepts, and issues related to the lives of older adults, as well as timely coverage of the many new programs and services for the elderly. Updated, under the distinguished stewardship of editor-in-chief Richard Schulz to reflect the infusion of new information across the scientific disciplines, this new edition brings readers up-to-the-moment significant advances in biology, physiology, genetics, medicine, psychology, nursing, social services, sociology, economics, technology, and political science. While retaining the format and standard of excellence that marked the first three editions, the fourth edition encompasses a wealth of new information from the social and health sciences. It contains the most current bibliography of an expanding literature, an exhaustive index, and extensive cross references. This much anticipated update of the field's most authoritative resource will take its place as an indispensable reference for specialists and non-specialists across a broad range of disciplines that now comprise the field of aging. SPRINGER--SERVING THE HEALTHCARE AND HELPING PROFESSIONS FOR MORE THAN 55 YEARS

"[This book is] the most authoritative assessment of the advantages and disadvantages of recent trends toward the commercialization of health care," says Robert Pear of The New York Times. This major study by the Institute of Medicine examines virtually all aspects of for-profit health care in the United States, including the quality and availability of health care, the cost of medical care, access to financial capital, implications for education and research, and the fiduciary role of the physician. In addition to the report, the book contains 15 papers by experts in the field of for-profit health care covering a broad range of topics--from trends in the growth of major investor-owned hospital companies to the ethical issues in for-profit health care. "The report makes a lasting contribution to the health policy literature."--Journal of Health Politics, Policy and Law.

**Ohio Elder Law - A Companion Book to Ohio Family Law is a one volume publication intended to serve as an accompanying piece to the highly successful Ohio Family Law. As our elderly population grows, this topic is a rapidly growing part of family law practice. Ohio Elder Law expands statutory material previously contained in Ohio Family Law and in addition features important administrative code sections critical to the practitioner.**

**This book provides health and social care professionals with an authoritative reading resource on the ethics and use of restraint. It provides an overview of the different forms of restraint, the conditions under which they are used, and their implications for the health and wellbeing of older people.**

**Nursing Home Care in the United States: The litany of nursing home abuses and an examination of the roots of controversy**

Documents released between Jan., 1978, through Dec., 1980, by GAO on subjects of medicine, health, nutrition, medical financing, health care management, and environmental hazards. Each entry gives bibliographical information, author, agency, and abstract. Subject index.

Since the late 1970s when Congressman Claude Pepper held widely publicized hearings on the mistreatment of the elderly, policy makers and practitioners have sought ways to protect older Americans from physical, psychological, and financial abuse. Yet, during the last 20 years fewer than 50 articles have addressed the shameful problem that abusersâ€”and sometimes the abused themselvesâ€”want to conceal. Elder Mistreatment in an Aging America takes a giant step toward broadening our understanding of the mistreatment of the elderly and recommends specific research and funding strategies that can be used to deepen it. The book includes a discussion of the conceptual,

methodological, and logistical issues needed to create a solid research base as well as the ethical concerns that must be considered when working with older subjects. It also looks at problems in determination of a reportâ€™s reliability and the role of physicians, EMTs, and others who are among the first to recognize situations of mistreatment. Elder Mistreatment in an Aging America will be of interest to anyone concerned about the elderly and ways to intervene when abuse is suspected, including family members, caregivers, and advocates for the elderly. It will also be of interest to researchers, research sponsors, and policy makers who need to know how to advance our knowledge of this problem.
