children? How much is “ enough ” ? There ’ s a lot of bad information in our culture today about wealth and the wealthy. Worse, there ’ s a growing backlash in America against our most successful citizens, but why? To many, wealth is seen as the natural result of hard work and wise money management. To others, wealth is viewed as the ultimate, inexcusable sin. This has left many godly men and women confused about what to do with the resources God ’ s put in their care. They were able to build wealth using God ’ s ways of handling money, but then they are left feeling guilty about it. Is this what God had in mind?

Retirement is a once-in-a-lifetime opportunity to be yourself and do what you want to do. It offers new possibilities for personal growth through learning, retraining, travelling and friendship. But it is also one of the biggest

transitions we face, and brings huge psychological and emotional challenges. It's not surprising that many people struggle with the adjustment to a different pace of life. Not Fade Away guides the reader through these challenges: dealing with the loss of status and routine, reinventing relationships, managing money, and above all, finding new meaning and purpose. It brings together expert advice and insights from people retiring now, who speak from the heart about the lessons they've learned and the new sources of fulfilment they've discovered. By cutting a clear path through the maze of choices on offer for people retiring today - which may or may not involve giving up work completely - Not Fade Away inspires you to make up your own mind and take control of your future. And that, experts agree, is the key to a good retirement.

Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times-for all the right reasons-but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions.

Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came home disillusioned with school. He was bored and tired of studying. "Why should I put time into studying subjects I will never use in real life?" he protested. Without thinking, I responded, "Because if you don't get good grades, you won't get into college." "Regardless of whether I go to college," he replied, "I'm going to be rich."

For the amazing female pioneers who shattered the glass ceiling, a practical and inspiring guide to reinventing what's next. Boomer women have been trailblazers throughout their professional lives. Now that their careers are losing their edge and children leave the nest, these women are ready to do for retirement what they did for the working world--redefine it. The first book from The Transition Network focuses on the unique needs of women as they explore new possibilities and redesign the old model of retirement, which no longer offers the challenges that these women experienced throughout their careers. This book shows how to create new and exciting work and volunteer opportunities and how to discover new outlets for creativity and passion. Rich in practical advice and stories from women who have successfully navigated this stage, **SMART WOMEN DON'T RETIRE -- THEY BREAK FREE** is a blueprint for women seeking a whole new set of life choices. **THE TRANSITION NETWORK** is a nation-wide community of women who are creating exhilarating new transition possibilities. Members network through monthly programs; online; and through dynamic peer groups. Members have had successful careers in

government, finance, international corporations, and the arts. Here is a single-sit read than can change the course of your retirement. Written by Dr. Teresa Ghilarducci, an economics professor, a retirement and savings specialist, and a trustee to two retiree health-care trusts worth over \$54 billion, *How to Retire with Enough Money* cuts through the confusion, misinformation, and bad policy-making that keeps us spending or saving poorly. It begins with acknowledging what a person or household actually needs to have saved—the rule of thumb is eight to ten times your annual salary before retirement—and how much to expect from Social Security. And then it delivers the basic principles that will make the money grow, including a dozen good ideas to get current expenses under control. Why to “get rid of your guy”—those for-fee (or hidden-fee) financial planners that suck up valuable assets. Why it’s always better to pay off a loan or a mortgage. There are no gimmicks, no magical thinking—just an easy-to-follow program that works. Hogan shows that God's way of managing money really works. Millionaire status doesn't require inheriting a bunch of money or having a high-paying job. The path to becoming a millionaire is paved with

tools that you either already have or that you can learn. Take personal responsibility; practice intentionality; be goal-oriented, a hard worker; and be consistent. If you adopt this mindset, you, too, can become a millionaire. -- adapted from foreword and introduction

In Smart Money Smart Kids, Financial expert and best-selling author Dave Ramsey and his daughter Rachel Cruze equip parents to teach their children how to win with money. Starting with the basics like working, spending, saving, and giving, and moving into more challenging issues like avoiding debt for life, paying cash for college, and battling discontentment, Dave and Rachel present a no-nonsense, common-sense approach for changing your family tree.

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In The Psychology of Money, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

7 Money Habits for Living the Life You Want

And How to Know What Enough Is

"In the dark, bewildering, trap-infested jungle of misinformation and opaque riddles that is the world of investment, JL Collins is the fatherly wizard on the side of the path, offering a simple map, warm words of encouragement and the tools to forge your way through with confidence. You'll never find a wiser advisor with a bigger heart." -- Malachi Rempen: Filmmaker, cartoonist, author and self-described ruffian This book grew out of a series of letters to my daughter concerning various things-mostly about money and investing-she was not yet quite ready to hear. Since money is the single most powerful tool we have for navigating this complex world we've created, understanding it is critical. "But Dad," she once said, "I know money is important. I just don't want to spend my life thinking about it." This was eye-opening. I love this stuff. But most people have better things to do with their precious time. Bridges to build, diseases to cure, treaties to negotiate, mountains to climb, technologies to create, children to teach, businesses to run. Unfortunately, benign neglect of things financial leaves you open to the charlatans of the financial world. The people who make investing endlessly complex, because if it can be made complex it becomes more profitable for them, more expensive for us, and we are forced into their waiting arms. Here's an important truth: Complex investments exist only to profit those

who create and sell them. Not only are they more costly to the investor, they are less effective. The simple approach I created for her and present now to you, is not only easy to understand and implement, it is more powerful than any other. Together we'll explore: Debt: Why you must avoid it and what to do if you have it. The importance of having F-you Money. How to think about money, and the unique way understanding this is key to building your wealth. Where traditional investing advice goes wrong and what actually works. What the stock market really is and how it really works. Why the stock market always goes up and why most people still lose money investing in it. How to invest in a raging bull, or bear, market. Specific investments to implement these strategies. The Wealth Building and Wealth Preservation phases of your investing life and why they are not always tied to your age. How your asset allocation is tied to those phases and how to choose it. How to simplify the sometimes confusing world of 401(k), 403(b), TSP, IRA and Roth accounts. TRFs (Target Retirement Funds), HSAs (Health Savings Accounts) and RMDs (Required Minimum Distributions). What investment firm to use and why the one I recommend is so far superior to the competition. Why you should be very cautious when engaging an investment advisor and whether you need to at all. Why and how you can be conned, and how to avoid becoming prey. Why I don't recommend dollar cost averaging. What

financial independence looks like and how to have your money support you. What the 4% rule is and how to use it to safely spend your wealth. The truth behind Social Security. A Case Study on how this all can be implemented in real life. Enjoy the read, and the journey!

What is your definition of a fulfilling life and how does an enjoyable retirement fit into that vision? Life is short; we have a limited time to choose our path, reach our dreams and goals and make our lives gratifying and our legacy everlasting. I wrote *The Art of Retirement* to serve as a guide; a book to help you with your life's journey by educating and inspiring you to make the most of your time on this planet or as Ronnie Lott would say, "Exhaust life." Retirement planning is much more than making sure you have enough money. Of course this is important and thoroughly discussed; certainly the security and lifestyle that money provides is a key part of your life. However, the financial aspect of planning your retirement is just part of the picture. Life is like art in many respects. It is unique to each one of us. It has the opportunity to be great as well as the potential for less-than-desired results. Like a sculpture, it can be molded and changed. Or like a painter standing in front of a blank canvas, the future is limited only by creativity and resources--whether that is money or the number of colors available for your palette. In keeping with the art metaphor, I have woven the story of

Michelangelo's life and art into The Art of Retirement to help you create your own life's masterpiece. As you read this book and begin the process of creating your masterpiece, you will:

- * Gain perspective on what you value. I will share the story of my dear friend and former NFL player, O.J. Brigance, and his battle with ALS to help you gain perspective and appreciate even with adversity (i.e. poor health, poor investment performance, unable to save enough, etc.) you can still strive to achieve the most rewarding life given your circumstances.
- * Understand how your emotions (and decisions) can be impacted by our 24/7 access to financial news through broadcast media, print media, and the Internet. Being armed with knowledge of behavioral finance will allow you to avoid costly mistakes due to how our brain deals with money and financial issues.
- * Be inspired by real-life stories of people:
 - o Who turned hobbies into second careers
 - o Who used the skill set they learned in the business world to improve a non-profit organization
 - o Who used their unique skills from their occupation (i.e., eye doctor) to help those less fortunate around the world
- * Learn the difference between planning retirement haphazardly without a plan, using rules-of-thumb, or using financial planning software to analyze retirement needs to compare to your resources.
- * How to accurately determine your risk tolerance and capacity, the most important and first step to building an investment portfolio.
- * Gain perspective of how

investments behave while understanding current and potential future economic trends that may affect the traditional approaches of investment management.* Learn when active vs. passive management may be the best investment solution and how to implement alternative investments, such as hedge funds and private equity, to potentially minimize risk through diversification while increasing investment performance.* Introspectively look at your life to determine if you have the time, training and temperament to manage your own investments and plan for your retirement.* Appreciate the differences among the multitude of advisors and how to select a competent one that can become your trusted partner. Through the lens of both my personal life and experiences--raised by my father and growing up in a blue collar, welfare-dependent home--and through my occupation as a CERTIFIED FINANCIAL PLANNER(tm) practitioner, I will share my experience and knowledge to help you enjoy a beautiful life and create a legacy that stands the test of time--a Masterpiece!

Every parent wants the best for their child. That's why they send them to college! But most parents struggle to pay for school and end up turning to student loans. That's why the majority of graduates walk away with \$35,000 in student loan debt and no clue what that debt will really cost them.¹ Student loan debt doesn't open doors for young adults—it closes them. They postpone getting married and

starting a family. That debt even takes away their freedom to pursue their dreams. But there is a different way. Going to college without student loans is possible! In *Debt-Free Degree*, Anthony O'Neal teaches parents how to get their child through school without debt, even if they haven't saved for it. He also shows parents:

- *How to prepare their child for college
- *Which classes to take in high school
- *How and when to take the ACT and SAT
- *The right way to do college visits
- *How to choose a major

A college education is supposed to prepare a graduate for their future, not rob them of their paycheck and freedom for decades. *Debt-Free Degree* shows parents how to pay cash for college and set their child up to succeed for life.

A practical yet humorous guide to aging solo gracefully and achieving a happy retirement. In *Essential Retirement Planning for Solo Agers*, certified retirement coach Sara Zeff Geber coins the term "Solo Ager" to refer to the segment of society that either does not have adult children or is single and believes they will be on their own as they grow older. This book explores the path ahead for this group. That includes choices in housing, relationships, legal arrangements, finances, and more. Geber reviews the role of adult children in an aging parent's world and suggests ways in which Solo Agers can mitigate the absence of adult children by relationship building and rigorous planning for their future. Geber

shares her expertise on what constitutes a fulfilling older life and how Solo Ager can maximize their opportunities for financial security, physical health, meaning and purpose in the second half of life, and, finally, planning for the end game. Through real-life stories and anecdotes, the author explores housing choices, relationships, and building a support system. You will learn about:

- different levels of care and independence in various types of living arrangements
- how to initiate discussions among friends and relatives about end-of-life treatment
- “what if” scenarios
- who to talk to about legal and financial decisions

And it's not just the Solo Ager that can learn from this book. Financial advisors, elder law and estate attorneys, senior care managers, and others whose clientele is on the far side of sixty will benefit as well.
