For the 9-1 Exams

Revise OCR GCSE (9-1) Computer Science Revision Workbook

First written in response to a JACT survey of over 100 schools, and now endorsed by OCR, this textbook has become a standard resource for students in the UK and for readers across the world who are looking for a clear and thorough introduction to the language of the ancient Greeks. Revised throughout and enhanced by coloured artwork and text features, this edition will support the new OCR specification for Classical Greek (first teaching 2016). Part 1 covers the basics and is self-contained, with its own reference section. It covers the main declensions, a range of active tenses and a vocabulary of 250 Greek words to be learned. Pupil confidence is built up by constant consolidation of the material covered. After the preliminaries, each chapter concentrates on stories with one source or subject: Aesop, Homer's Odyssey and Alexander the Great, providing an excellent introduction to Greek culture alongside the language study. Written by a long-time school teacher and examiner, this two-part course is based on experience of what pupils find difficult, concentrating on the essentials and on the understanding of principles in both accidence and syntax: minor irregularities are postponed and subordinated so that the need for rote learning is reduced. It aims to be user-friendly, but also to give pupils a firm foundation for further study. The aim of this book is to provide an accessible text for students, covering each of the elements in the OCR GCSE (9-1) Computer Science specification J276. It will be invaluable both as a course text and in revision for students nearing the end of the course. It is divided into eight sections, each broken down into manageable chapters of roughly one lesson. Sections 5 and 6 of the textbook cover algorithms and programming concepts with a theoretical approach to provide students with experience of writing, tracing and debugging pseudocode solutions without the aid of a computer. These sections would complement practical programming experience. Each of the eight sections cover one of the major topics in this course, and each subtopic contains sample examination questions from past papers, which can be set as homework.

Exam Board: OCR Level: GCSE Subject: RS First Teaching: September 2016 First Exam: June 2018 Motivate every student to deepen their understanding and fulfil their potential by following a stimulating, well-paced course through the strengthened content requirements; produced by subject specialists and OCR's Publishing Partner. - Equips students with the detailed knowledge they need to succeed with clear, lively explanations that make key concepts accessible to all ability levels. - Provides opportunities for students to learn, review and develop their knowledge and skills through a variety of engaging activities, discussion points and extension tasks to stretch high achievers. - Ensures that your lessons are both innovative and inclusive, supplying a bank of tasks that draw on best practice teaching methods. - Encourages students to take an active interest in every topic, using relevant news articles, real-life viewpoints and quotations from sacred texts to bring religious principles and practices to life. - Boosts students' confidence approaching assessment via practice questions and guidance on tackling different question types. - Enables you to teach the systematic study content confidently with comprehensive coverage of Christianity and Islam. **OCR GCSE RS Spec Content covered: Christianity - Beliefs and teachings - Practices Islam - Beliefs and teachings - Practices Religion, philosophy and ethics in the modern world from a Christian perspective - Relationships and families - The existence of God - Religion, peace and conflict - Dialogue between religious and non-religious beliefs and attitudes - Covers the short course content.**
