A maintenance & repair manual for the DIY mechanic.

This book celebrates the many important contributions to philosophy by one of the leading philosophers in the analytic field, Michael Devitt. It collects seventeen original essays by renowned philosophers from all over the world. They all develop themes from Devitt ' s work, thus discussing

many fundamental issues in philosophy of linguistics, theory of reference, theory of meaning, methodology, and metaphysics. In a long final chapter, Devitt himself replies to the contributors. In so doing, he further elaborates his views on various of these issues, for example defending his claim (in opposition to Chomskyan orthodoxy) that languages are external rather than internal; his well-known causal theory of reference; his “ shocking ” idea that meanings can be causal, non-descriptive, modes of presentation; his methodological naturalism; his commitment to scientific realism; and his version of

biological essentialism. The volume will appeal to all scholars and students interested in contemporary theoretical analytic philosophy, and will be a must-read for any serious researcher in philosophy of language. It provides a deep insight into the work of one of the most important living philosophers, and will help readers to better understand language and reality from a naturalistic perspective.

Tea Shop owner Theodosia Browning may always be a bridesmaid, never a bride, but this groom is never going to make it to the altar... Theodosia Browning ' s dear friend Delaine Dish has asked her to be a bridesmaid for her wedding. But when the big day arrives, everything seems to be going wrong. First, a massive storm is brewing over Charleston. A bad omen? Second, Delaine ' s sister is late for the ceremony. And finally, the groom not only has cold feet—his whole body is cold. A murderer has crashed the wedding. As Theodosia comforts a devastated Delaine, she needs to sort out the

suspects on the groom ' s side from the suspects on the bride ' s side. One thing soon becomes apparent—revenge won ' t be the only dish served cold at this wedding. And if Theodosia doesn ' t watch her step, a cold-blooded killer may have a rude reception in store for her...

This open access book explores the concept of Industry 4.0, which presents a considerable challenge for the production and service sectors. While digitization initiatives are usually integrated into the central corporate strategy of larger companies, smaller firms often have problems putting Industry 4.0 paradigms into practice. Small and medium-sized enterprises (SMEs) possess neither the human nor financial resources to systematically investigate the potential and risks of introducing Industry 4.0. Addressing

this obstacle, the international team of authors focuses on the development of smart manufacturing concepts, logistics solutions and managerial models specifically for SMEs. Aiming to provide methodological frameworks and pilot solutions for SMEs during their digital transformation, this innovative and timely book will be of great use to scholars researching technology management, digitization and small business, as well as practitioners within manufacturing companies.

Sensory analysis is an important tool in new product development. There has recently been significant development in the methods used to capture sensory perception of a product. Rapid Sensory Profiling Techniques provides a comprehensive review of rapid methods for sensory analysis that can be used as alternatives or complementary to conventional descriptive methods. Part one

looks at the evolution of sensory perception capture methods. Part two focuses on rapid methods used to capture sensory perception, and part three covers their applications in new product development and consumer research. Finally, part four explores the applications of rapid methods in testing specific populations.

This book gathers a collection of extended papers based on presentations given during the SimHydro 2017 conference, held in Sophia Antipolis, Nice, France on June 14-16,

2017. It focuses on how to choose the right model in applied hydraulics and considers various aspects, including the modeling and simulation of fast hydraulic transients, 3D modeling, uncertainties and multiphase flows. The book explores both limitations and performance of current models and presents the latest developments in new numerical schemes, high-performance computing, multiphysics and multiscale methods, and better interaction with field or scale model data. It gathers the latest theoretical and

innovative developments in the modeling field and presents some of the most advance applications on various water related topics like uncertainties, flood simulation and complex hydraulic applications. Given its breadth of coverage, it addresses the needs and interests of practitioners, stakeholders, researchers and engineers alike.

It is commonly believed that during the interwar period, Kemalist secularism successfully eliminated religion from the public sphere in Turkey, leaving Turkish

national identity devoid of religious content. However, through its examination of the impact of the Ottoman millet system on Turkish and Balkan nationalisms, this book presents a different view point. Cagaptay demonstrates that the legacy of the Ottoman millet system which divided the Ottoman population into religious compartments called millets, shaped Turkey's understanding of nationalism in the interwar period. Providing a compelling examination of why and how religion shapes national identity in Turkey

*and the Balkans the book covers topics including: * Turkish nationalism * the Ottoman legacy * Kemalist citizenship policies and immigration * Kurds, Muslims and Jews and the ethno-religious limits of Turkishness. Incorporating documents from untapped Turkish archives, this book is essential reading for scholars and students with research interests in Turkey, Turkish nationalism and Middle East history. This text covers a broad spectrum of topics pertinent to the management of incinerator*

residues. Background information includes a history of incineration, and the influence of municipal waste composition, incinerator type air pollution control technologies on residue quality. Physical, chemical and leaching characteristics for the various ash streams are described, along with recommended sampling and evaluation methodologies. Residue handling and management options, including, treatment utilisation and disposal are also discussed in detail.

Value mounts a powerful critique of traditional conceptions of value, taste, judgment, and justification. Through incisive discussions of works by, among others, David Hume, Immanuel Kant, Northrop Frye, Georges Bataille, Jacques Derrida, Richard Rorty, and Jürgen Habermas, Smith develops an illuminating alternative framework for the explanation of these topics. All value, she argues, is radically contingent. Neither an objective property of things nor merely a subjective response to them, it is the variable effect of numerous interacting economies that is, systems of apportionment

and circulation of "goods." Aesthetic value, moral value, and the truth-value of judgments are no exceptions, though traditional critical theory, ethics, and philosophy of language have always tried to prove otherwise. Smith deals in an original way with a wide variety of contemporary issues--from the relation between popular and high culture to the conflicting conception of human motives and actions in economic theory and classical humanism. In an important final chapter, she addresses directly the crucial problem of relativism and explains why a denial of the objectivity of value does

The automobile sector is one of the most archetypal global industries and is seen by many as one of the main drivers behind the homogenisation of world markets due to firms' internationalization strategies and the social practices that firms impose. This book argues that this is not entirely the case due to the heterogeneity of firms and the diversity of strategies pursued. It highlights the diversity and forms of internationalization and the preference for

This book explores the life of Robert Lyall, surgeon, botanist, voyager, British Agent to the court of Madagascar. Born the year of the French Revolution, Lyall grew up in politically radical Paisley, Scotland, before studying medicine, in Edinburgh, Manchester, and subsequently St. Petersburg, Russia. His criticism of the Tsar and Russian aristocracy led to an abrupt departure for London where Lyall became the voice of liberalism and calls for political reform, before appointed British Resident Agent in Madagascar in 1827, representing

the interests of the Tory establishment that he had hitherto so roundly castigated. However, Lyall discovered that the Malagasy crown had turned against the British alliance of 1820, his scientific pursuits alienated the local elite, and his efforts to re-establish British influence antagonized the queen, Ranavalona I, who accused Lyall of sorcery and forced him and his burgeoning family to leave for Mauritius where he died an untimely death, of malaria, in 1831.

With a view towards driving dynamics, this book examines these conventional elements and their interaction with mechatronic systems. First, it describes the fundamentals and design of the chassis and goes on to examine driving dynamics with a particularly practical focus. This is followed by a detailed description and explanation of the modern components. A separate section is devoted to the axles and processes for axle development. With its revised illustrations and several updates in the text and list of references, this new edition already includes a number of improvements over the first edition. This study offers an introduction to an important branch of Spanish literature—the romance, or ballad. Although a great many of these poems have been translated into English by various authors, they are not generally known nor easily accessible. Collected here for the first time in a single volume is a broad and representative sampling of romances in translation that encompasses historical ballads (including those about Spain's greatest folk hero, el Cid), Moorish ballads, and ballads of chivalry, love, and adventure. For the collection, Shasta M. Bryant has written a perceptive

commentary and critique in which he discusses the individual poems and compares the translation with the original; both texts are presented to facilitate comparison. For those who wish to pursue their reading further there is an index of romances that have been translated into English, along with the names of the translators. Although the text has been written with the non-specialist in mind, this book will be equally valuable for students of comparative literature and of medieval Spain.
