

Rhs Garden Flowers Ultimate Sticker Book Ultimate Stickers

' How to Grow Plants from Seeds is a great little book - a hand-holding, step-by-step guide with clear pictures and instructions. It demystifies the process and covers flowers as well as vegetables and herbs. A most useful present for anyone wanting to get started on sowing seeds.' Country Living How To Grow Plants From Seeds does away, once and for all, with the idea that there's something difficult about growing direct from seed. There's no need to rely on the professionals to raise seedlings for you: seeds are not only cheap to buy and environmentally friendly but, if you follow a few basic rules, they're also fantastically rewarding, not least because a single packet will usually leave you with plenty of spares to swap with fellow enthusiasts. Whether you're a novice or an experienced gardener, if you want to nurture an impressive cutting garden or aim to have a bounteous harvest of fruit and vegetables, here's what you need to know, presented in a straightforward and accessible way. You'll discover the basic rules for different seeds, their sowing preferences (Indoor, under cover or direct- to-plot? Surface-sow or cover up? Water or spray?), how long they take to germinate, and how to prick out, pot on and raise your infant plants to become sturdy, productive adults. The book opens with a basic primer showing how seeds work, to give every grower the best chance at success. This is followed by extensive chapters on raising food and flowers from seed with plenty of detailed plant profiles included, and finally there's a guide to collecting seeds from your plants and how to save and swap - so that you, too, can become a seed evangelist.

Learn how to propagate virtually every type of plant, from fruit trees and ornamental shrubs to exotic orchids and succulents. Packed with hundreds of step-by-step tutorials, this new edition of RHS Propagating Plants is your go-to guide for clear and instructive propagation advice. How long do your seedlings need to germinate? What makes a healthy stem cutting? How do you know what type of rootstock to use when grafting plants? Find all the answers within, alongside more than 1,800 detailed illustrations and photos to refer to, plus the experts' secrets to perfect plant propagation. Ideal for the thrifty gardener who wants plants for free, or who wants to gift favourite plant cuttings to friends and family; and useful for budding house plant owners with an interest in propagating succulents and other house plants. Fill your garden with beautiful plants for next-to-nothing with this brand new edition of the most comprehensive guide to propagating plants ever published.

From lions and butterflies to sharks and spiders, there's an animal for everyone in this animal encyclopedia with a twist! Rev. ed. of: Gardening through the year / Hazel Evans.

"Climbing plants are hugely underrated—this book with its lively expression of deep knowledge should encourage everyone to grow more of them." —Noël Kingsbury Climbing plants constitute a huge, and largely untapped, resource for today's gardeners. Because their habit of growth is primarily vertical, they can be used for utilitarian as well as ornamental purposes like providing privacy, or screening eyesores. In this comprehensive reference, renowned horticulturist Allan Armitage selects and profiles the most useful and attractive climbing plants for a wide range of sites and conditions, from well-known favourites like clematis, morning glories, and wisteria to more unusual plants like Dutchman's pipe, passion flowers, and the tropical mandevillas. Each profile includes a general description (enlivened by Armitage's trademark wry humour) along with the plant's hardiness, plant family, best method of propagation, method of climbing, and etymology of botanical and common names. "Climbing plants are hugely underrated—this book with its lively expression of deep knowledge should encourage everyone to grow more of them." —Noël Kingsbury

Annual publication from the RHS listing 81,000 plants with over 3,300 new plants and where to find them.

Make the most of your balconies and windowsills with this handy gardening guide from the author of the award-winning RHS Grow Your Own Crops in Pots. RHS Little Book of Small-space Gardening is packed with practical information and inspirational ideas for anyone who wants to grow plants in a variety of outside spaces, from balconies to stairways, windowsills to doorsteps. Look inside to discover a host of creative step-by-step projects, such as speedy salads, wildlife pots, fragrant baskets and green garden walls. Handy plant profiles tell you what's best to grow in a variety of conditions, such as wind, shade and drought.

Whether you choose to start with a simple pot or tackle a more ambitious project, with this beautifully illustrated book you'll soon see how even the smallest spaces can be amazing growing spaces.

In this brilliant official companion to Gardeners' World, lead presenter Toby Buckland offers a complete guide to making you a better gardener. Toby sees the garden as connected to the kitchen, the compost heap and the world beyond. He encourages us to turn gardening into an adventure rather than a list of chores. It becomes a workshop to fashion an apple press from skip-scavenged timber, or a warm greenhouse sanctuary. Borders aren't just for weeding, they're for strawberries by the punnet-load. Piles of golden leaves along the roadside aren't just the soggy debris of autumn but the potential for soil-enriching leaf mould. Opening our eyes to these connections helps us appreciate the joy of gardening, and this book teaches you the craft. However big or small your plot, whether you are starting from scratch or looking for new ideas to refresh an established scheme, the Practical Gardening Handbook will show you how to bring your garden alive.

Wildlife is a more significant and mainstream issue for gardeners than when this best-selling book was published in 1985 as How to Make a Wildlife Garden. Fully revised, updated and freshly illustrated, this new edition brings RHS research and best practice to a multitude of controversial areas: from the use of pesticides to bird boxes, bird tables and planting for birds; whether tidiness in the garden is a good thing for wildlife; the planting of native species over introduced ones; the idea of habitat creation to preserve diversity; how to attract and sustain butterflies; pollinating insects and the crash in bee populations and how gardeners are involved. Wildlife forms an increasingly important part of a gardener's responsibility and that responsibility become integral to their decision-making processes. Future gardeners can use this volume to be better informed guardians of the planet's resources. Chris Baines is the UK's foremost wildlife gardening expert and Vice President of the Wildlife Trusts.

Produced in association with the Royal Horticultural Society, the titles in this series have become standard works of practical gardening reference. Each book is illustrated with easy-to-follow, step-by-step illustrations that clearly guide the reader through all the essential techniques of successful gardening. This manual supplies information on growing conventional and more exotic fruits, from soft, tree, and warm temperate fruits to nuts and currants.

Growing indoors has never been easier or more fun. Become a star gardener without leaving your home with this beginner's guide to houseplants for the whole family. Whatever the size of your home, and even if you don't have much spare time on your hands, house plants are an exciting way to bring some low-maintenance greenery into your life. As well as looking luscious, house plants improve air quality and our sense of well-being - and caring for them is an endlessly enchanting hobby for both adults and children. See how a knobbly ginger root sprouts huge exotic leaves, or how plants can grow without any soil at all. Children can get up close and personal with the natural world and try their hand at growing with ease. Best of all, the plants provide year-round interest and there's never any need to go out into the rain. In RHS Little Book of Happy House Plants, every technique and project is explained and illustrated in clear, down-to-earth steps. Even beginners will want to have a go!

Choose the right plants for your garden and find all the inspiration and guidance you need with the Encyclopedia of Plants & Flowers. Drawing on expert advice from the RHS, this best-selling book features a photographic catalogue of more than 4,000 plants and flowers, all organized by color, size, and type, to help you select the right varieties for your outdoor space. Discover perennials, bulbs, shrubs, and trees, succulents, and ornamental shrubs, all showcased in beautiful, full-color photography. Browse this photographic catalogue to find at-a-glance plant choice inspiration. Or use the extensive plant dictionary to look up more than 8,000 plant varieties and the best growing conditions. This new edition features the latest and most popular cultivars, with more than 1,380 new plants added, as well as updated photography, comprehensive hardiness ratings, and a brand-new introduction. Fully comprehensive yet easy to use, the Encyclopedia of Plants & Flowers is the inspirational, informative guide every gardener needs on their bookshelf.

In this colorful guide featuring 30 easy gardening projects, kids will learn to grow their own fruits and vegetables, attract wildlife such as butterflies and bees, and recycle household items into animal habitats and fun decorations. Whether they've got a big backyard or just a windowsill, kids can grow all sorts of plants with this beginner's gardening book. Packed with step-by-step activities, this book teaches children ages 5-8 how to grow garden staples like tomatoes, pumpkins, and zucchini with photographic examples. Each project includes a complete materials list, planting guide, and tips on harvesting your fruits and vegetables, providing plenty of support for kids from start to finish. The book also offers advice on creating creature-friendly spaces within your garden, such as a bee hotel, a ladybug sanctuary, and a home for frogs and toads. By caring for the wildlife around them, kids can grow to better understand the relationship between humans and nature, and how we can support local habitats wherever we happen to live. Beyond the gardening basics, Let's Get Gardening also helps kids learn about conservation, recycling, and sustainability through simple, hands-on projects. From making mini greenhouses out

of leftover glass jars, to growing strawberries in an old pair of rain boots, to repurposing an empty milk carton as a hanging bird feeder, there are so many practical ways for kids to help cut waste and reduce pollution. So grab your potting soil and let's get gardening!

With 80 experiments for the whole family to discover and enjoy, The Pocket Book of Garden Experiments contains easy-to-follow instructions for activities that will stretch your imagination and bring out your inner scientist. x Make an ecosystem in a jar x Find out why leaves change colour x Turn potatoes into slime x Calculate the heights of trees x Make a sound map of your garden Each experiment takes inspiration from the natural world and the fascinating things that live in it.

Creating colour and interest in a small urban garden by growing a range of flowers and other decorative plants brings with it many rewards. Carolyn Dunster shows you what to grow and how to use your own blooms, leaves and berries in a range of indoor displays and hand-tied bouquets. Locally-grown flowers in season is a significant and welcome trend in floristry, and just as eating a tasteless strawberry in December pricks our consciences, so too does purchasing a bouquet of tulips in September, however stunning they may be to look at. The most local, seasonal flowers, which are the most satisfying to give and to display, are the ones you have grown yourself. Carolyn Dunster shows you how to do this in the smallest of spaces.

Shares expert coverage of the latest approaches to gardening, design essentials, and tools and materials, providing a glossary of plants while demonstrating step-by-step techniques that reflect popular contemporary trends.

RHS Little Book of Small-Space Gardening

The European Garden Flora is the definitive manual for the accurate identification of cultivated ornamental plants and has been designed to meet the highest scientific standards. The vocabulary has nevertheless been kept as uncomplicated as possible so that the work is fully accessible to the informed nurseryman, gardener, and landscape architect, as well as the professional botanist. Volume VI concludes the Flora and contains accounts of 38 families of dicotyledons, including Compositae (with over 190 genera), the largest family of flowering plants. Many other genera of horticultural importance such as Calceolaria, Penstemon, Hebe, Solanum, Buddleia, and Sencio are also discussed.

Comprehensive keys are provided at the level of family, genus and species and line diagrams are included to illustrate important diagnostic features of critical taxa. References are made to useful illustrations and taxonomic accounts, and a small amount of guidance on cultivation is also included for many genera.
