As U.S. military forces appear overcommitted and some ponder a possible return to the draft, the timing is ideal for a review of how the American military transformed itself over the past five decades, from a poorly disciplined force of conscripts and draft-motivated "volunteers" to a force of professionals revered throughout the world. Starting in the early 1960s, this account runs through the current war in Iraq, with alternating chapters on the history of the all-volunteer force and the analytic background that supported decisionmaking. The author participated as an analyst and government policymaker in many of the events covered in this book. His insider status and access offer a behind-the-scenes look at decisionmaking within the Pentagon and White House. The book includes a foreword by former Secretary of Defense Melvin R. Laird. The accompanying DVD contains more than 1,700 primary-source documents-government memoranda, Presidential memos and letters, staff papers, and reports-linked directly from citations in the electronic version of the book. This unique technology presents a treasure trove of materials for specialists, researchers, and students of military history, public administration, and government affairs to draw upon.

In 2003, the National Commission on the Public Service, chaired by Paul Volcker, issued a report detailing problems within the federal government today and recommending changes in its organization, leadership, and operations. This book suggests practical ways to implement the recommendations and defines a research agenda for the future. Thirteen essays address the primary problem areas identified by the Volcker Commission, and the commission report itself is included.

The strengths and abilities children develop from infancy through adolescence are crucial for their physical, emotional, and cognitive growth, which in turn help them to achieve success in school and to become responsible, economically self-sufficient, and healthy adults. Capable, responsible, and healthy adults are clearly the foundation of a well-functioning and prosperous society, yet America's future is not as secure as it could be because millions of American children live in families with incomes below the poverty line. A wealth of evidence suggests that a lack of adequate economic resources for families with children compromises these children's ability to grow and achieve adult success, hurting them and the broader society. A Roadmap to Reducing Child Poverty reviews the research on linkages between child poverty and child well-being, and analyzes the poverty-reducing effects of major assistance programs directed at children and families. This report also provides policy and program recommendations for reducing the number of children living in poverty in the United States by half within 10 years.

It is a matter of common knowledge among mystics that the evolutionary career of mankind is indissolubly bound up with the divine hierarchies who rule the planets and the signs of the Zodiac, and that the passage of the Sun and the planets through the twelve signs of the Zodiac marks man's progress in time and in space. Therefore, it is not to be wondered at, that in the course of their investigations into the spiritual development of mankind, the writers have also encountered much that deals with the Zodiac, which is the boundary of our evolutionary sphere at the present time. So much has been perceived in the memory of nature that sheds light upon obscure passages of the Bible, that notes have been made from time to time of different points, but how to collect and collate these dissociated writings into a united whole has been a great problem for a long time. Even now, the writers know and feel that what they are bringing forth is only a very, very weak attempt to set before the students that great body of facts which have come to them through the memory of nature. They feel, however, that this will give a 3 4 THE MESSAGE OF THE STARS new and more profound meaning to the old symbols, and that by passing on what has been found out they put themselves in line to receive more light. Concerning the future evolution of planets, The Rosicrucian Cosmo-Conception teaches, on page 256, that "when the beings upon the planet have evolved to a sufficient degree, the planet becomes a Sun, the fixed center of the Solar System. When the beings there have evolved to a still greater degree, and consequently it has reached its maximum of brilliancy, it breaks up into a Zodiac and becomes, so to speak, the womb of a new Solar System. Thus the Great hosts of Divine beings who, until then, were confined upon that Sun gain freedom of action upon a great number of stars whence they can affect, in different ways, the system which grows up within their sphere of influence. The planets or man-bearing worlds within the Zodiac are constantly being worked upon by these forces but in various ways according to the stage they have reached in evolution. Our Sun could not have become a sun until it set out from itself all the beings who were not sufficiently evolved to endure the high rate of vibration and the great luminosity of the beings who were qualified for that evolution. All the beings upon the different planets would have been consumed had they remained in the Sun. This visible Sun, however, though it is a source of evolution for beings vastly above man, is not by any means the Father of the other planets, as EVOLUTION AS SHOWN IN THE ZODIAC 5 material science supposes. On the contrary, it is itself an emanation from the central Sun, which is the invisible source of all that is in our solar system."

Our national debt is careening toward \$19 trillion (yes, that is a 19 followed by 12 zeros), and federal regulations are expanding at a record pace. Meanwhile families struggle to get home loans, and small businesses struggle to make ends meet. States are constantly handed unfunded mandates and executive fiat's that they are forced to implement with minimal direction and no way to pay for them. I present this report as a demonstration of ways we can cut back on wasteful federal spending and burdensome regulations to help families, small businesses, and our economy begin to get out from under the weight of federal stagnation. Cited here are not only prime examples of wasteful spending, but also federal departments or agencies that regulate outside the scope of the federal government's constitutional role. I firmly believe my staff and I have the obligation to solve the troubles of our nation, not just complain, which is why for every problem identified, you will also find a recommended solution. There is a way to eliminate wasteful, ineffective, or duplicative program spending; develop oversight methods to prevent future waste; and find ways to get us back on track.
